Blue removes one blue (B) segment. Red removes one red (R) segment. All segments cut off from the ground disappear. Take turns; change one stalk per turn. If you cannot move, you lose.

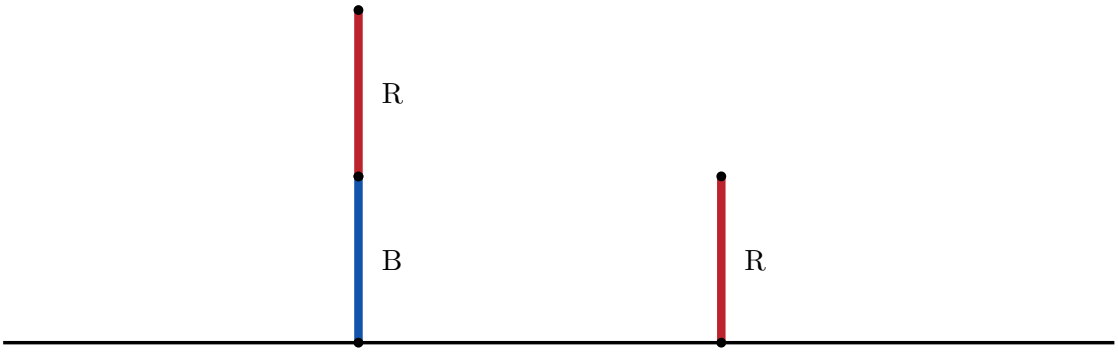

Problem 1: Play each board with Blue starting, then with Red starting. On which boards can one color always win?

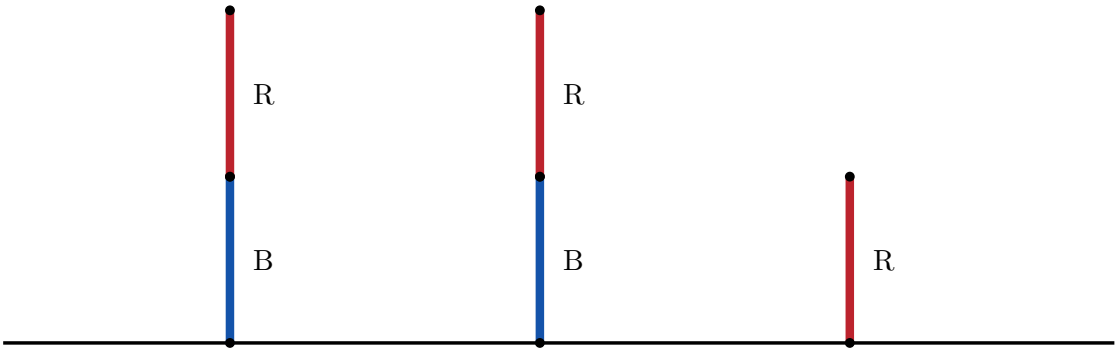

Problem 2: A board balances when the second player can always win, whichever color starts. Which of these boards balance?

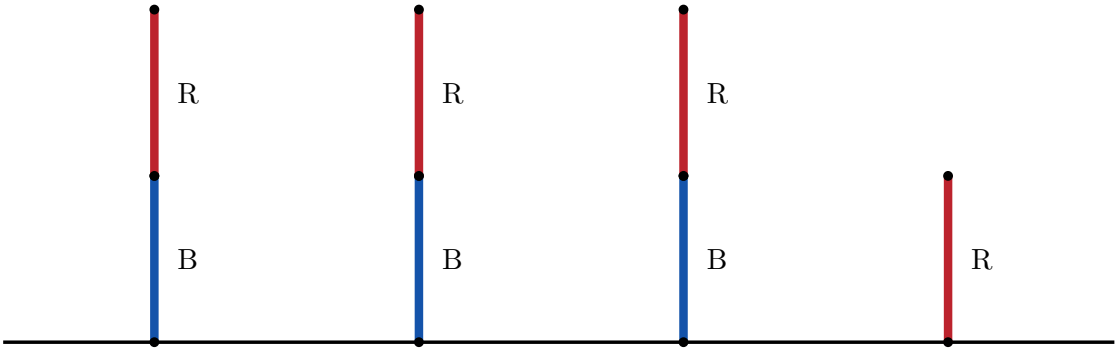

A

B

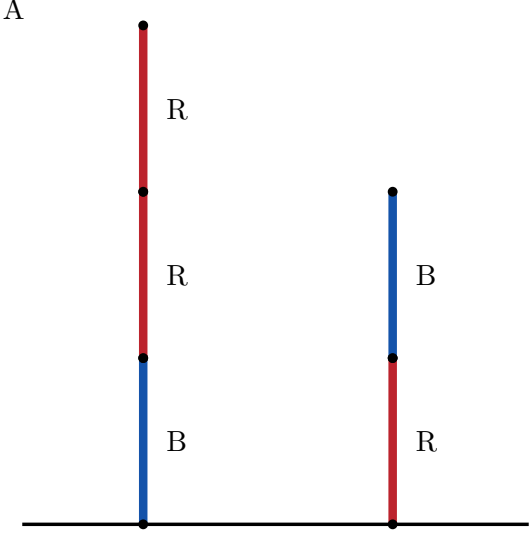

C

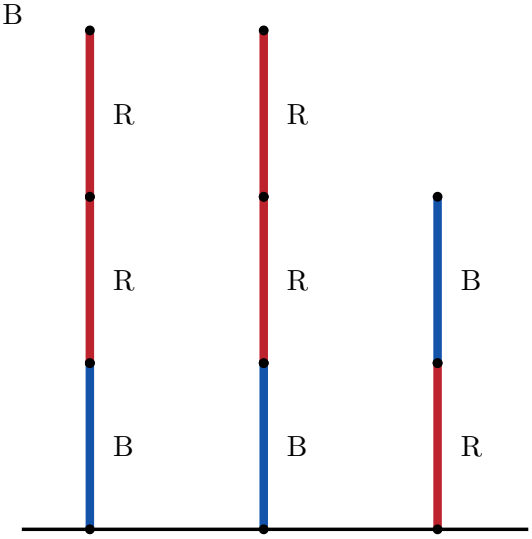

Problem 3: Which of these boards balance? Find a way for the winning color to win each other board, whoever starts.

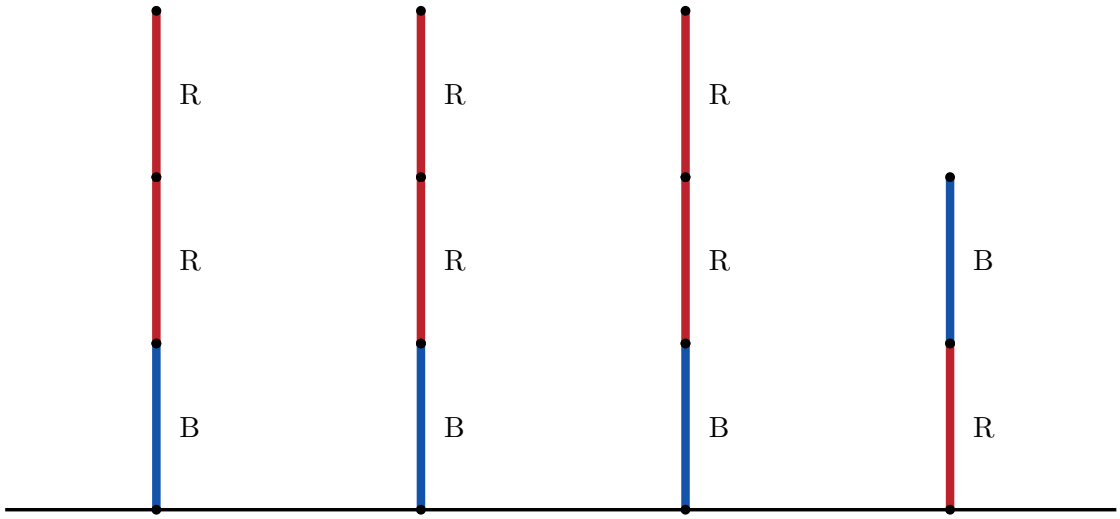

A

B

C

Problem 4: Make two different boards that balance. Each board must include a stalk with at least two segments.
