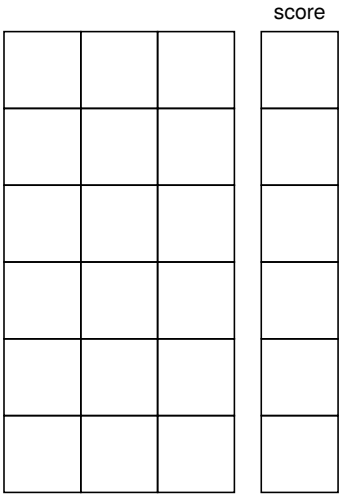
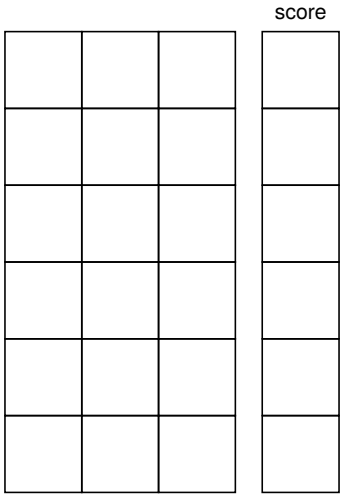
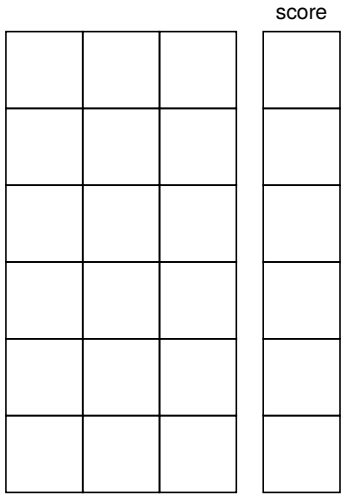
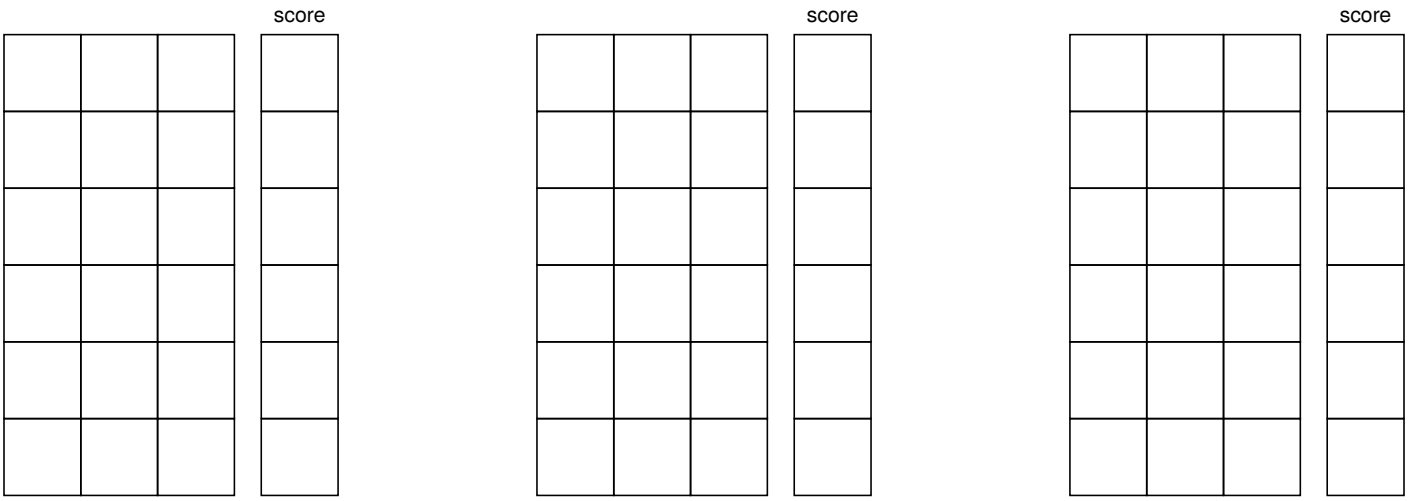
Problem 8: Find a way to choose your tests so that you always know a three-counter secret after three tests or fewer. Write it down so that someone else could use it.







Problem 9: Play the three-counter game again, but now the game ends only when a test scores 3. Can the breaker always end the game by the fourth test? Explain.



Problem 10: Play the code game with four counters. Find each secret with as few tests as you can.
