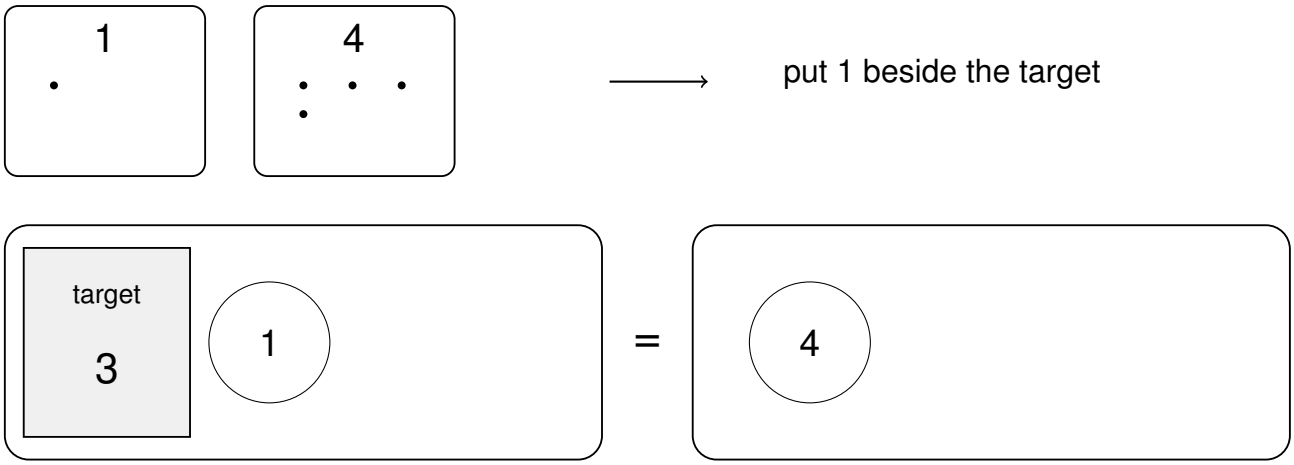
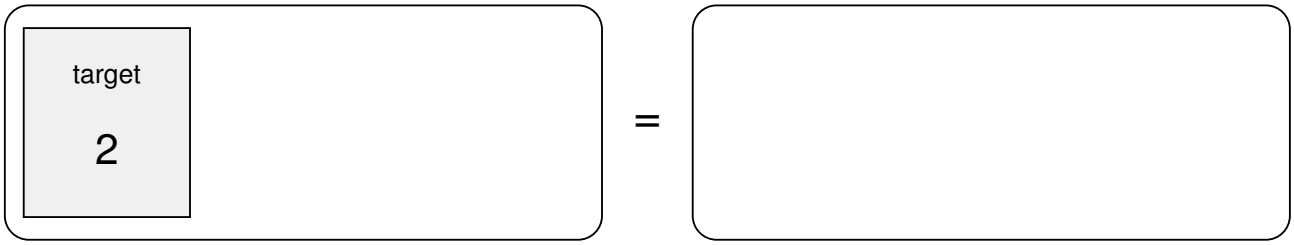
Keep the target on the left. Each weight may go on either pan or stay off. Use each weight at most once. Equal totals balance.

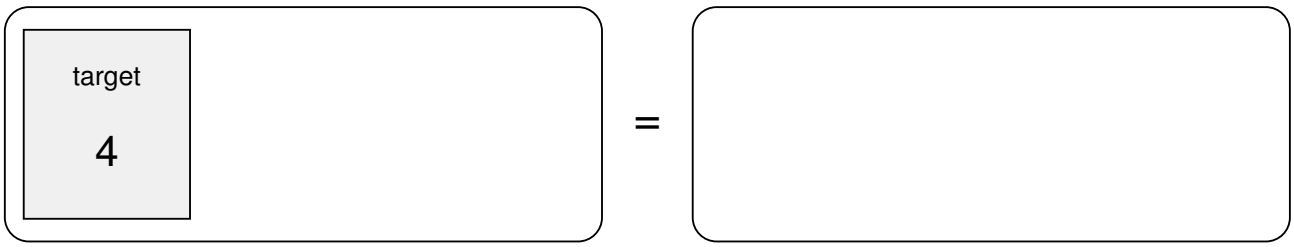
Target 3; weights 1 and 4



3 + 1 = 4

Problem 1: Choose two different whole-number weights that balance every target from 1 through 4. Find every possible kit.





Problem 2: Add one weight to 1 and 3. Which choice balances the longest unbroken run of targets starting at 1? Explain why a smaller or larger choice cannot do better.

1	2	3	4	5	6	7	8
9	10	11	12	13	14	15	

target 5 = ____

target 7 = ____
