Week 10 / Bridges / Problem menu

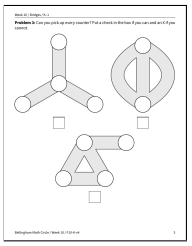

for adults: pick, then print

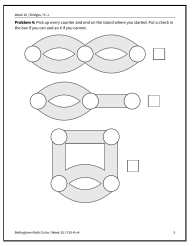

Pick up every counter in four towns
K–1 P1
first route

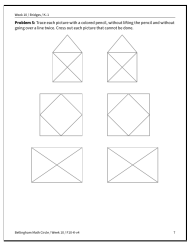

Every island where a walk can start
K–1 P2
first route

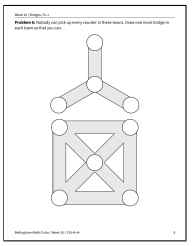

Can you pick up every counter?
K–1 P3
first route

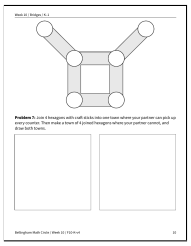

End on the island where you started
K–1 P4
return route

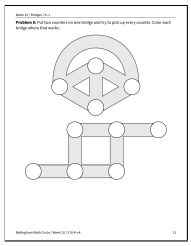

Trace each picture in one stroke
K–1 P5
return route

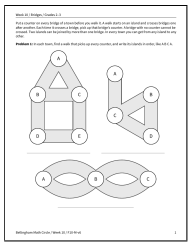

One more bridge in each town
K–1 P6
return route

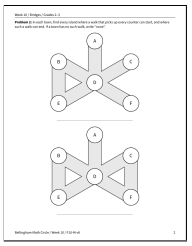

Build towns with hexagons and craft sticks
K–1 P7
return route

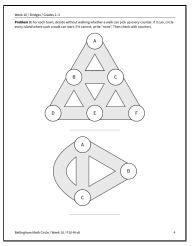

A bridge with two counters
K–1 P8
return route

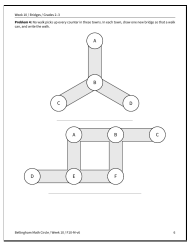

Find a walk in each town
Grades 2–3 P1 · Grades 4–5 P1
first route
wording differs by band

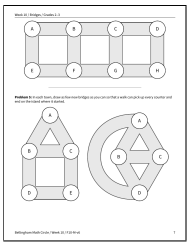

Where walks start and end
Grades 2–3 P2 · Grades 4–5 P2
first route
wording differs by band

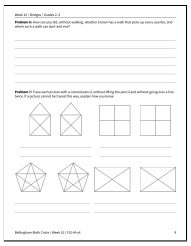

Decide without walking
Grades 2–3 P3
first route

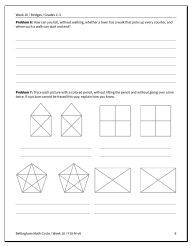

One new bridge so that a walk can
Grades 2–3 P4
first route

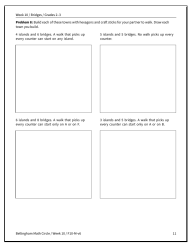

Fewest new bridges for a walk that comes home
Grades 2–3 P5
return route

How to tell without walking
Grades 2–3 P6
return route

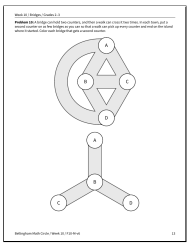

Trace each picture, or explain why not
Grades 2–3 P7
return route

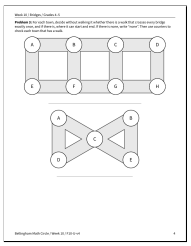

Build towns to a description
Grades 2–3 P8
return route

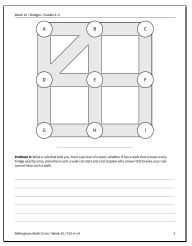

A walk that can start on only one island?
Grades 2–3 P9
return route

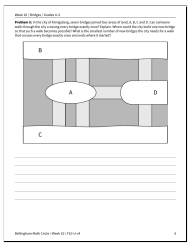

Second counters for a walk that comes home
Grades 2–3 P10
return route

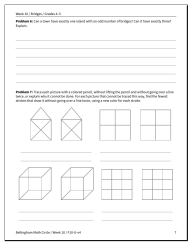

Decide without walking, and where walks start and end
Grades 4–5 P3
first route

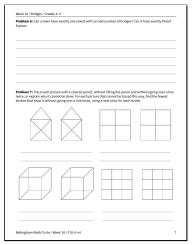

Write the rule and explain it
Grades 4–5 P4
first route

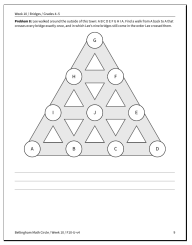

The bridges of Königsberg
Grades 4–5 P5
first route

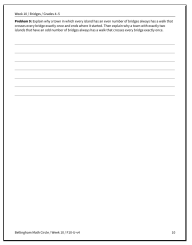

Exactly one or three odd islands?
Grades 4–5 P6
return route

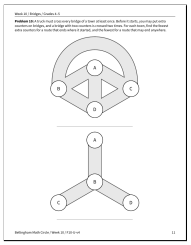

Trace each picture, or find the fewest strokes
Grades 4–5 P7
return route

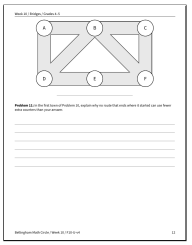

Lee's walk around the outside
Grades 4–5 P8
return route

Why every town that fits the rule has a walk
Grades 4–5 P9
return route

The truck's fewest extra counters
Grades 4–5 P10
return route

Why no route uses fewer extra counters
Grades 4–5 P11
return route
