A hidden end can be anywhere in its gray band, including the edges. Each trial may use new lengths. Join strips end to end from 0, with no gap or overlap.

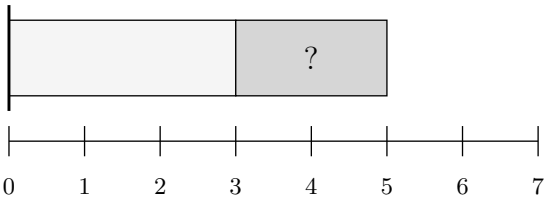

A: 2 to 3 units

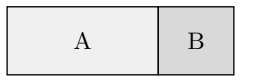

B: 1 to 2 units

A + B: 3 to 5 units

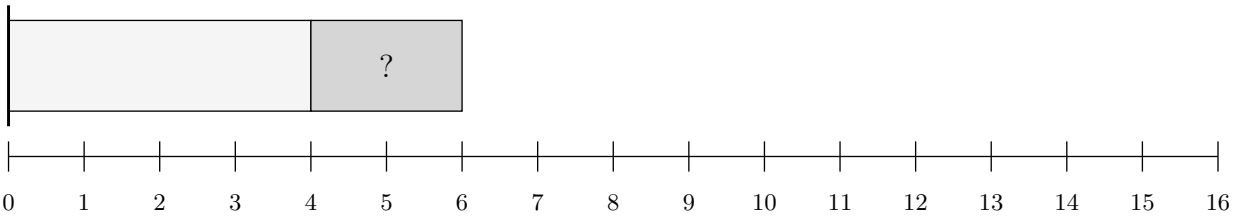

3

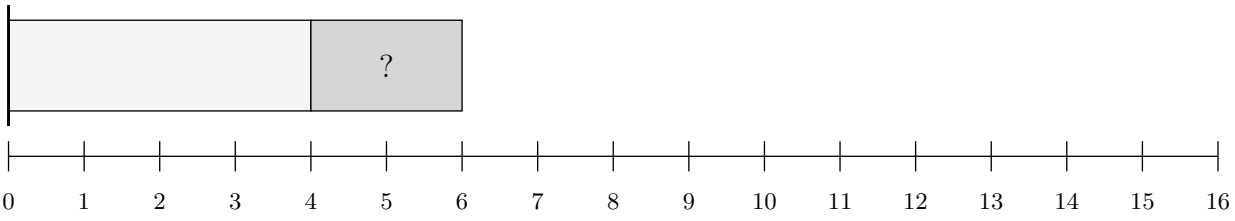

5

Problem 4: Find how small and how big each end gap can be. Start at 0 and keep A unchanged within each comparison; B may vary separately.

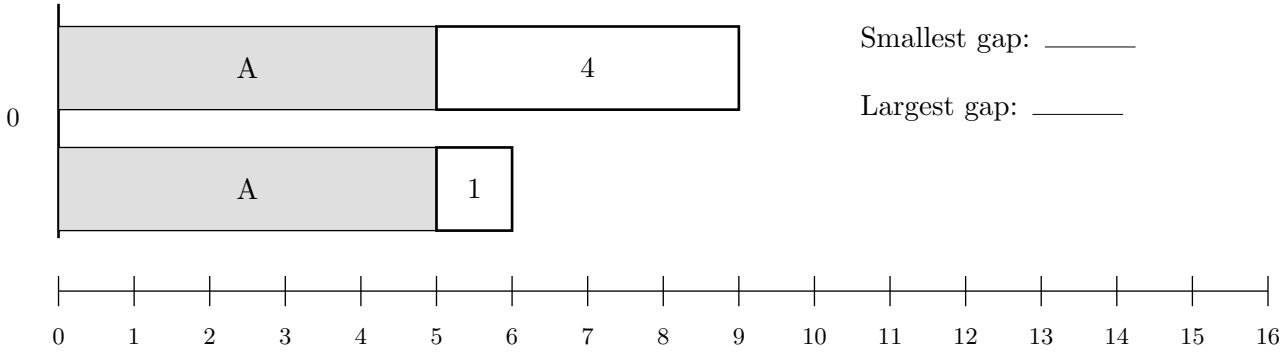

A: 4 to 6 units

B: 4 to 6 units

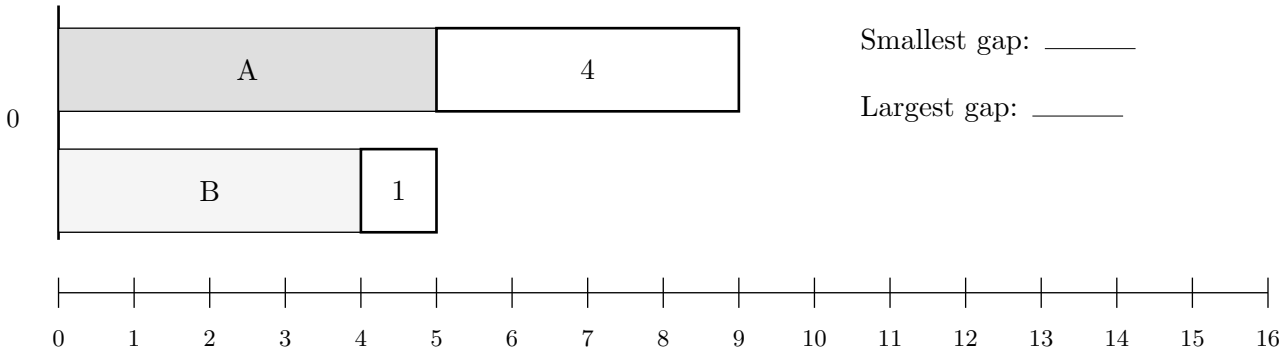

One possible setting; the white pieces are exactly 4 and 1 units long.

Smallest gap: _____

Largest gap: _____

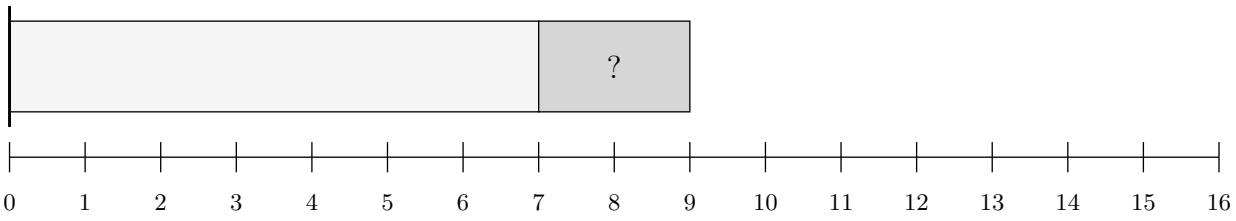

Smallest gap: _____

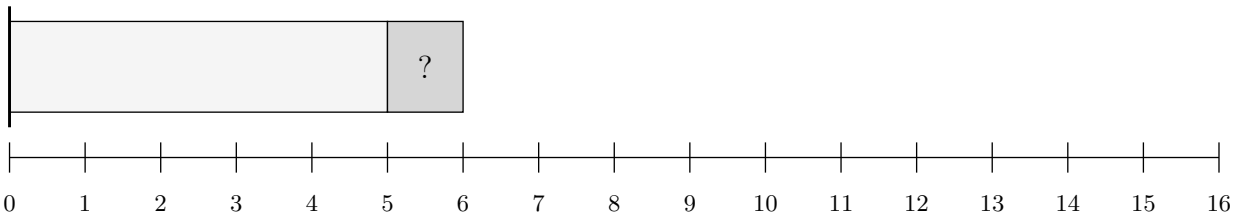

Largest gap: _____

Problem 5: Put both starts at 0. Make the biggest gap between the ends, then the smallest.

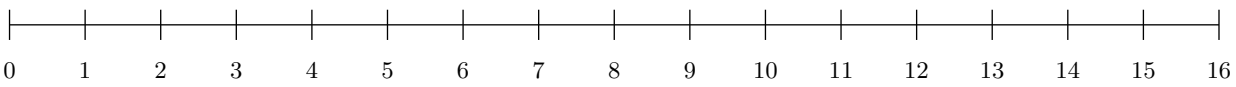

long strip: 7 to 9 units

short strip: 5 to 6 units

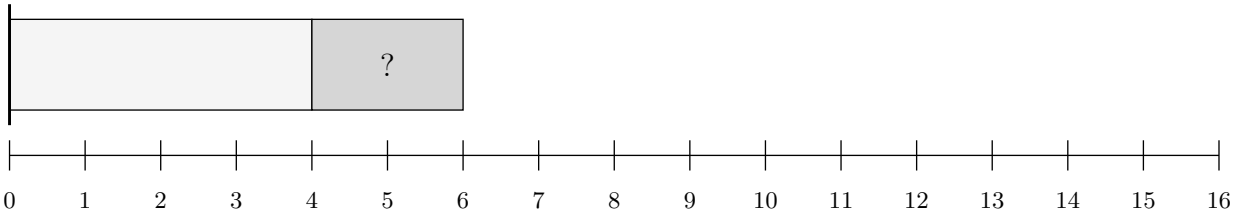

Problem 6: Using these two strips, make a gap of 3 in two different ways.

Problem 7: A and B must fill 9 units exactly. Find every pair of whole-unit lengths that fits both cards.

A: 4 to 6 units

B: 3 to 5 units
