

Version W

Week 1 tiling · K–1

Problem 1: Fill the sailboat and the cat. Use any small pieces. Turn them to fit, with no gaps or overlaps.

Sailboat

Cat

Problem 2: Fill each shape two different ways. You can use different kinds of small pieces. Ask an adult to trace your pieces before you lift them to use again.

Problem 3: Fill the arrow and the star using only small purple chevrons. Turn the pieces as needed. Use them again for the next shape.

Arrow

Star

Problem 4: Fill the long hexagon using only small blue rhombi. Then fill it again with any small pieces you like.

Long hexagon

Problem 5: Fill the mountain using only small green triangles. Then fill it again with any small pieces you like.

Mountain

Version X

Week 1 tiling · K–1

Blocks must fit inside the thick line and sit on the thin lines. Blocks may not overlap.

Problem 1: Cover each shape with blue blocks . If a shape cannot be covered, put an X on it and say why.

Problem 2: Cover each triangle with blue blocks  and green blocks . Use as few green blocks as you can, and write how many in the box.

Problem 3: Find all the ways to cover each shape with blue blocks . Put each way on a shape of its own.

Problem 4: Cover each shape with as few blocks as you can, and write how many blocks you used in the box. You may use any of these blocks:

Problem 5: Take turns with a partner putting one blue block  on a board, and whoever puts down the last block wins. On each board, circle whether you should go first or second to be sure to win.

Problem 6: Find all the ways to cover the big shape with blue blocks . Draw each way on a small shape.

Version Y

Week 1 tiling · K–1

Use only the small blocks. Blocks must fit inside the thick line and line up with the thin lines. Blocks may not overlap.

Problem 1: Cover each shape with blue blocks . If a shape cannot be covered, put an X on it and say why.

Problem 2: Cover each triangle with blue blocks  and green blocks . Use as few green blocks as you can, and write how many in the box.

Problem 3: Find all the ways to cover the top shape with blue blocks . Put each way on a different copy. Then do the same with the bottom shape.

Problem 4: Cover each shape with as few blocks as you can, and write how many blocks you used in the box. You may use any of these small blocks:

Problem 5: Take turns with a partner putting one blue block  on the board. Whoever puts down the last block wins. On each board, should you go first or second to be sure to win? Circle it.

Problem 6: Find all the ways to cover this shape with blue blocks . Put each way on a different copy. There are more copies on the next page.

More copies for Problem 6.

Version Z

Week 1 tiling · K–1

1 How many greens?

Name: _____

Put green triangles  on each shape. Cover it all up!
How many greens fit? Write the number.

 greens greens greens greens

Talk about it. Which shape needs the most greens? Which needs the fewest? Can you cover the yellow shape with blue blocks instead?

2 Fill the hexagon

Fill a hexagon with blocks. Trace around each block.
Then fill the next hexagon a **new** way!

You can use:

One way: 2 reds

How many different ways did your group find?

Talk about it. Did anyone use a purple block? Which way uses the most blocks? Which way uses the fewest?

3 Fill the star

Fill each star with blocks. Trace around your blocks if you like.

Star 1: use any blocks.

How many blocks did you use?

Star 2: use **only** blue blocks!

Could you do it? YES NO

How many blues?

Talk about it. How many points does a star have? Which blocks can fill a point? In Star 2, is there more than one way to use only blues?

Your turn! Build a shape with blocks on the table. Trace around the outside on paper. Can a friend fill your shape with only blue blocks?

4 Big triangles

Cover each big triangle with small greens . How many fit?
Then find the **big** green blocks. Which triangle does each one fit?

 small greens

 small greens

 small greens

Talk about it. Guess first, then count! Can you cover this triangle with the big green blocks?

5 Only blue blocks?

Cover each triangle with blue blocks . Are there holes left?
Fill the holes with greens . Use as **few** greens as you can!

 greens

 greens

 greens

Talk about it. Can anyone cover a big triangle with **only** blue blocks? Look at your three numbers. What do you notice?
