

1 How many greens?

Name: _____

Put green triangles  on each shape. Cover it all up!
How many greens fit? Write the number.

 greens greens greens greens

Talk about it. Which shape needs the most greens? Which needs the fewest? Can you cover the yellow shape with blue blocks instead?

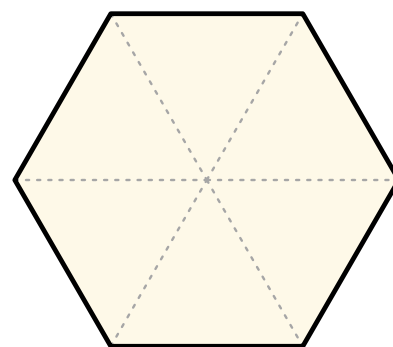

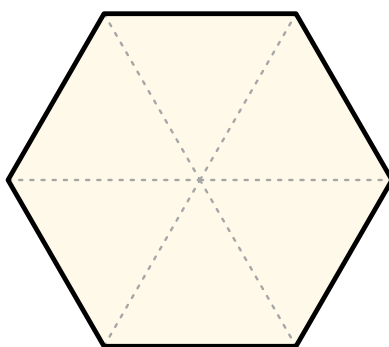

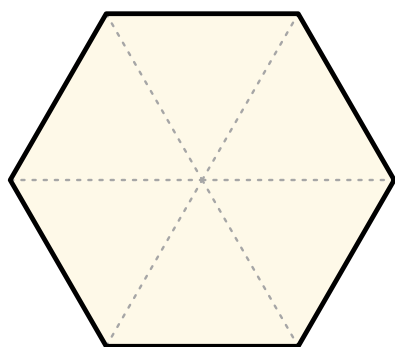

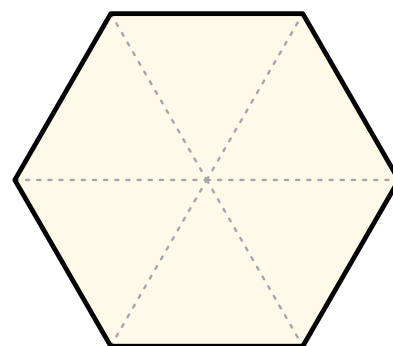

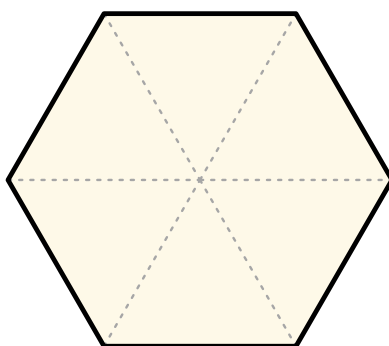

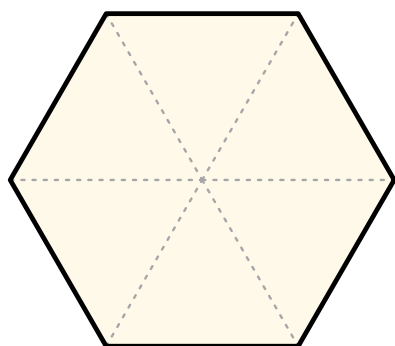

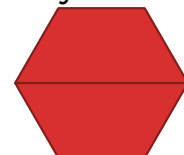

2 Fill the hexagon

Fill a hexagon with blocks. Trace around each block.
Then fill the next hexagon a **new** way!

You can use:

One way: 2 reds

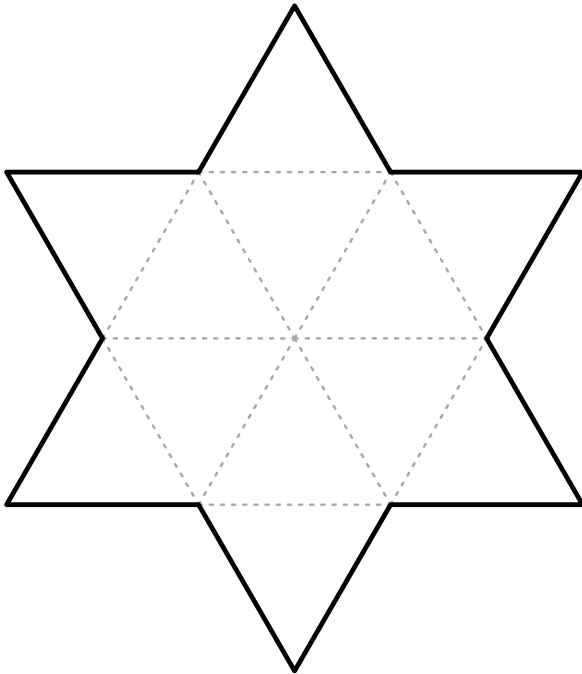

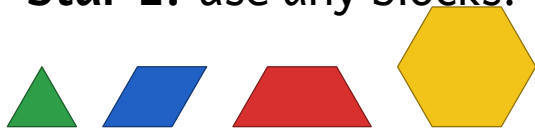

How many different ways did your group find?

Talk about it. Did anyone use a purple block? Which way uses the most blocks? Which way uses the fewest?

3 Fill the star

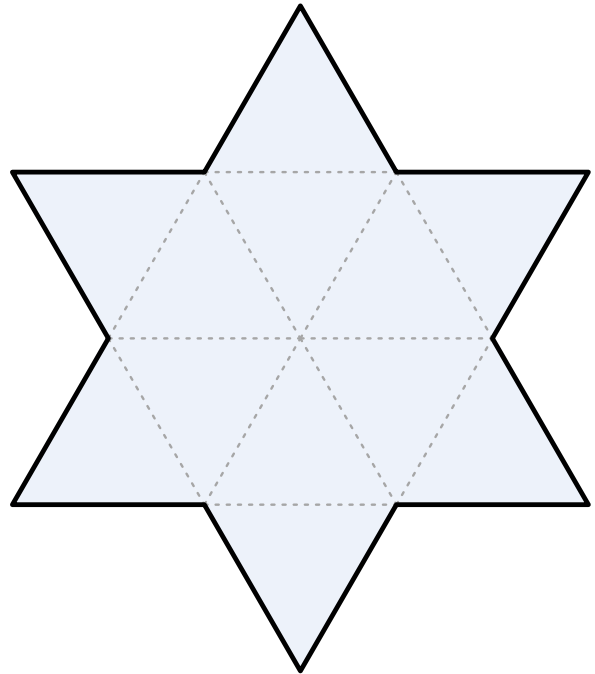

Fill each star with blocks. Trace around your blocks if you like.

Star 1: use any blocks.

How many blocks did you use?

Star 2: use **only** blue blocks!

Could you do it? YES NO

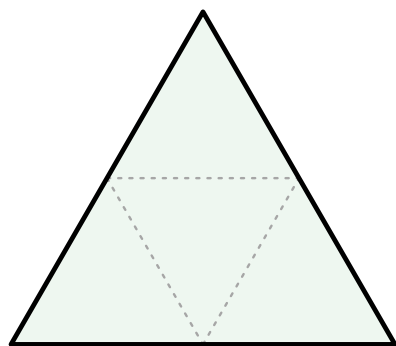

How many blues?

Talk about it. How many points does a star have? Which blocks can fill a point? In Star 2, is there more than one way to use only blues?

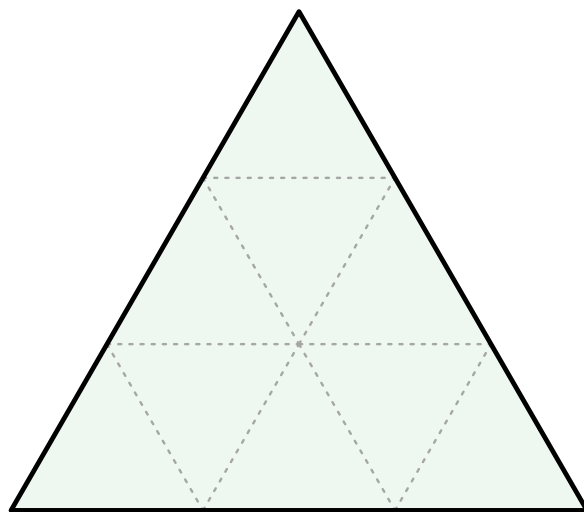

Your turn! Build a shape with blocks on the table. Trace around the outside on paper. Can a friend fill your shape with only blue blocks?

4 Big triangles

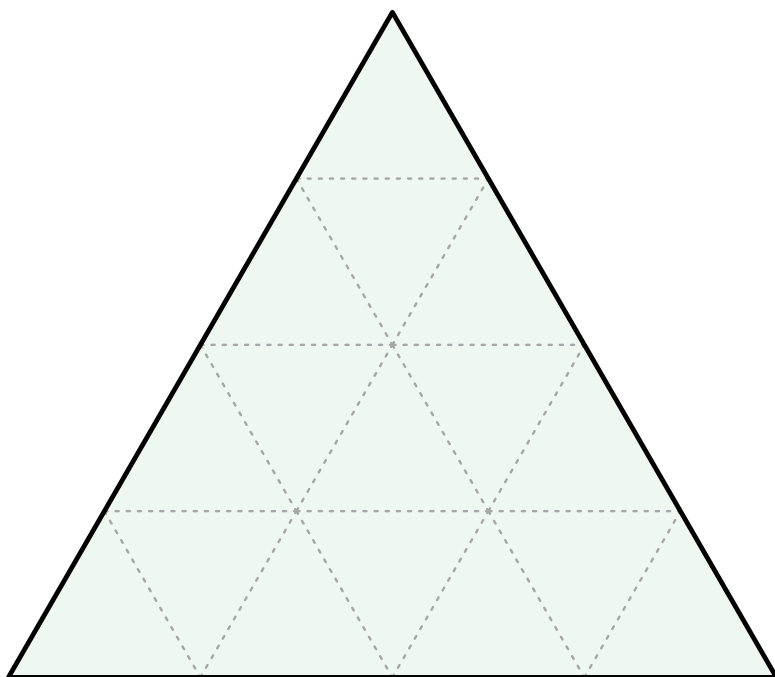

Cover each big triangle with small greens ▲. How many fit?
Then find the **big** green blocks. Which triangle does each one fit?

▲ small greens

▲ small greens

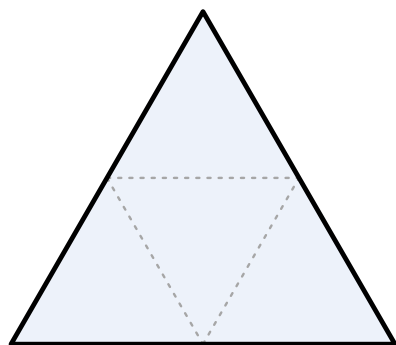

▲ small greens

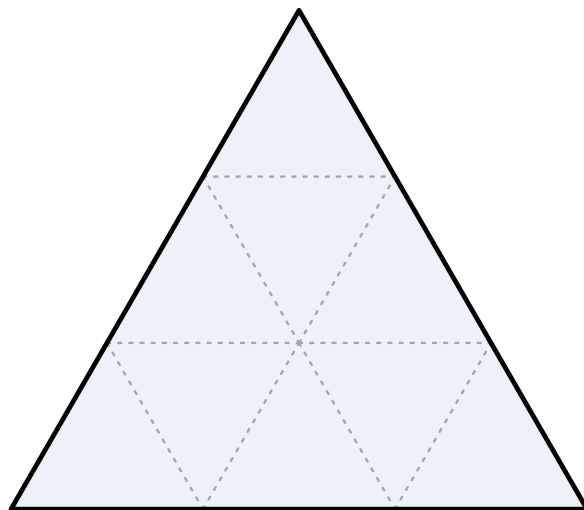

Talk about it. Guess first, then count! Can you cover this triangle with the big green blocks?

5 Only blue blocks?

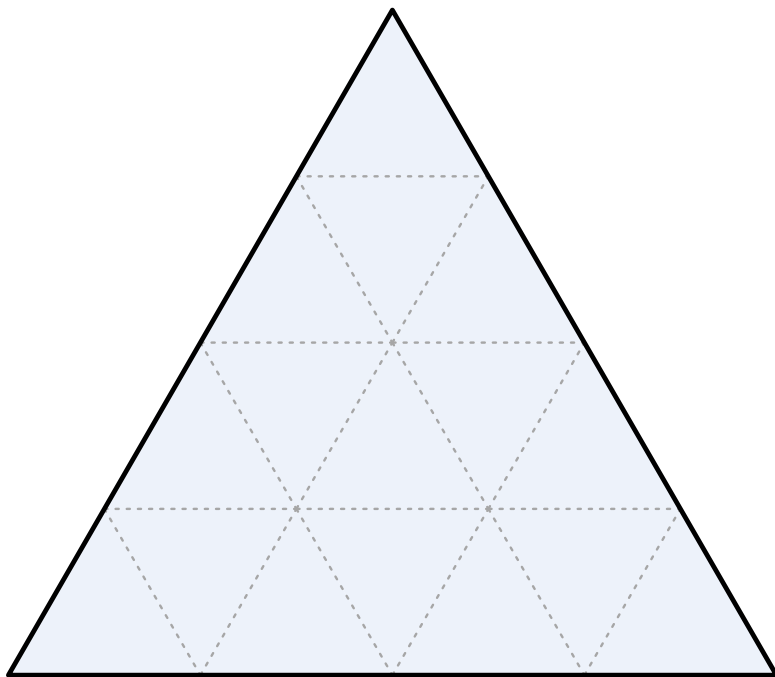

Cover each triangle with blue blocks . Are there holes left?
Fill the holes with greens . Use as **few** greens as you can!

 greens

 greens

 greens

Talk about it. Can anyone cover a big triangle with **only** blue blocks? Look at your three numbers. What do you notice?
