

For every problem: lay the blocks flat, cover the whole shape, and do not let any block stick out or sit on top of another.

Problem 1: Cover a hexagon below using green, blue, or red blocks, then color it to match. Find as many ways as you can, using different blocks each time.

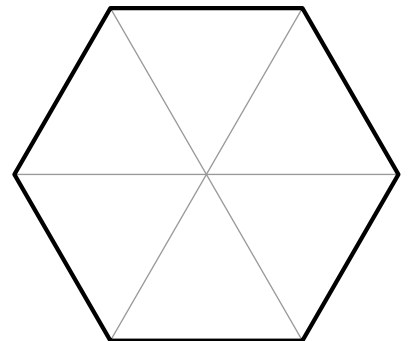

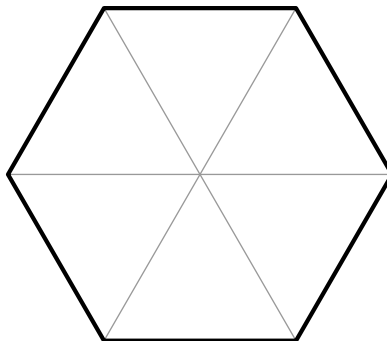

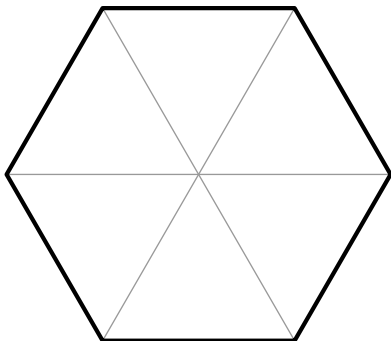

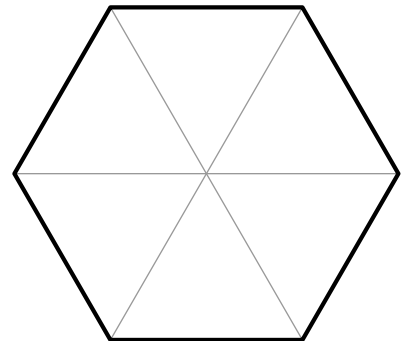

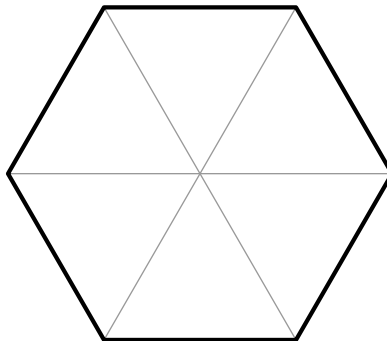

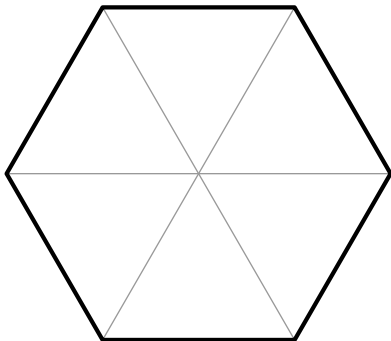

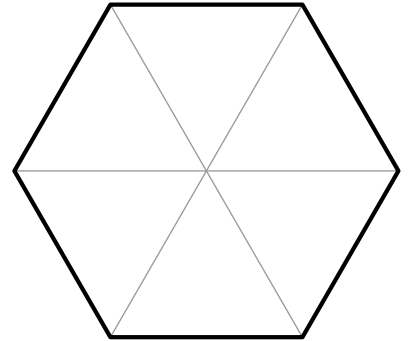

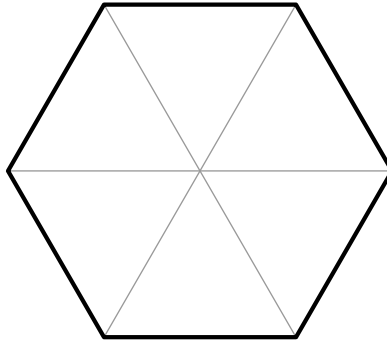

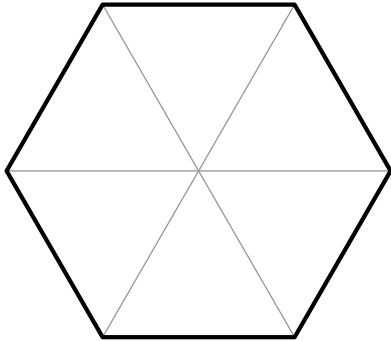

green triangles

blue rhombuses

red trapezoids

Problem 2: Cover each shape using as few blocks as you can. Write how many blocks you used.

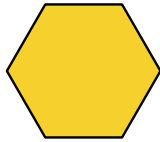

green triangles

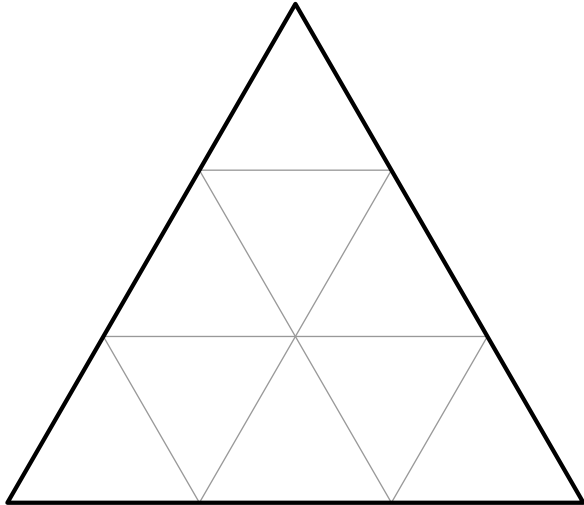

blue rhombuses

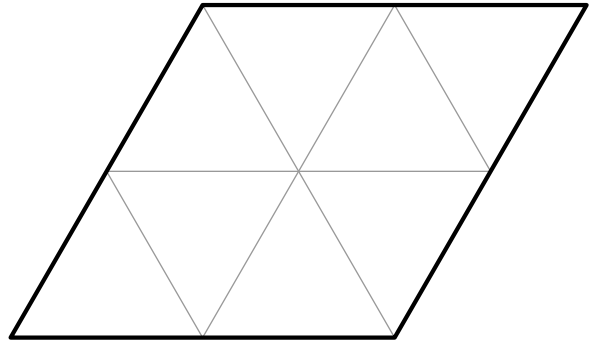

red trapezoids

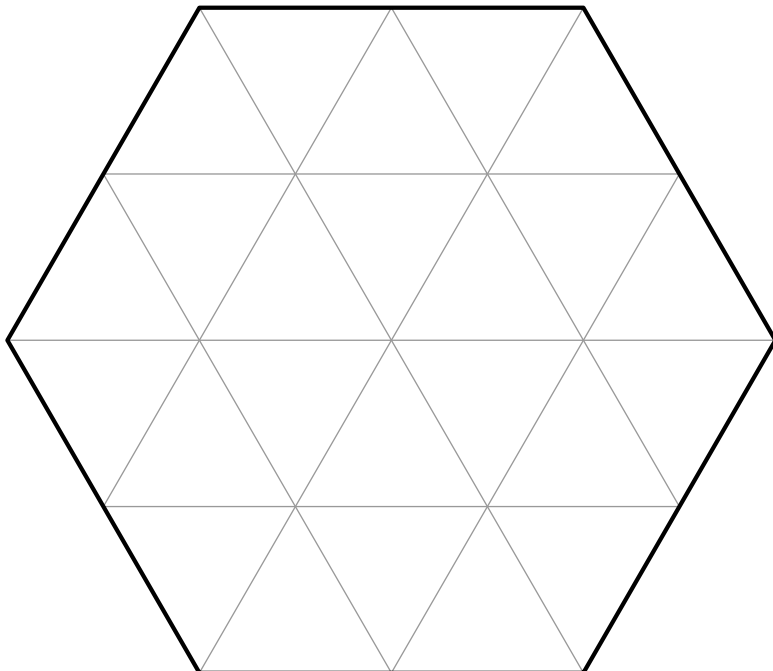

yellow hexagons

blocks: _____

blocks: _____

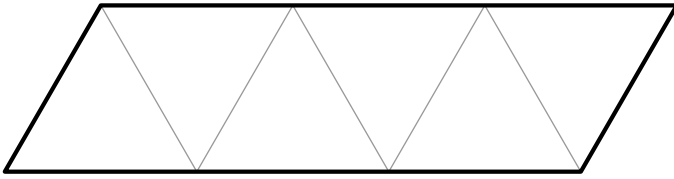

blocks: _____

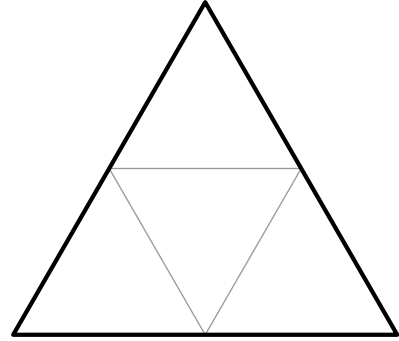

Problem 3: Can you cover each shape using only blue rhombuses? Circle yes or no.

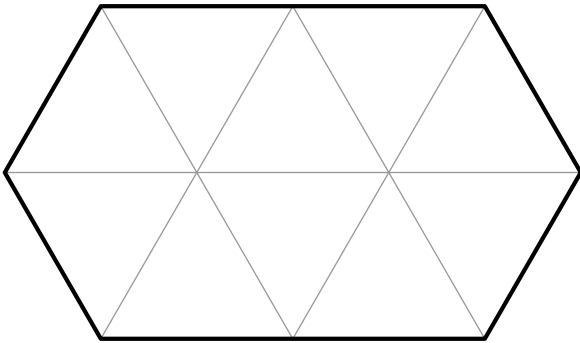

blue rhombuses

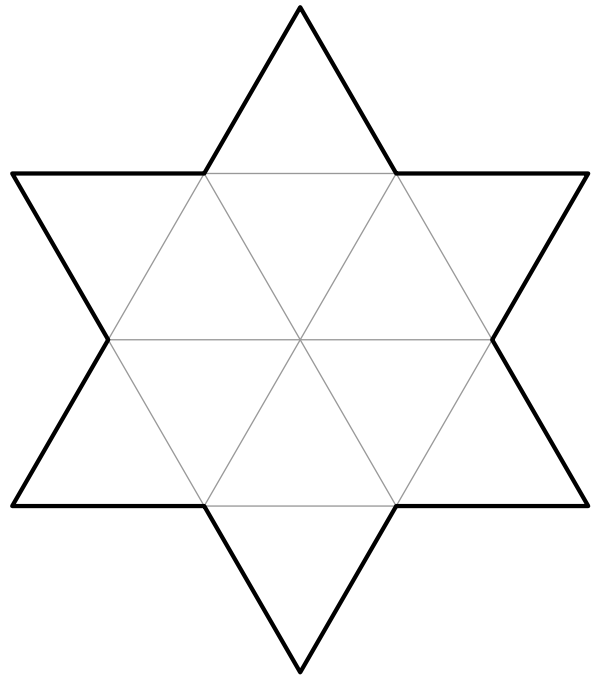

yes no

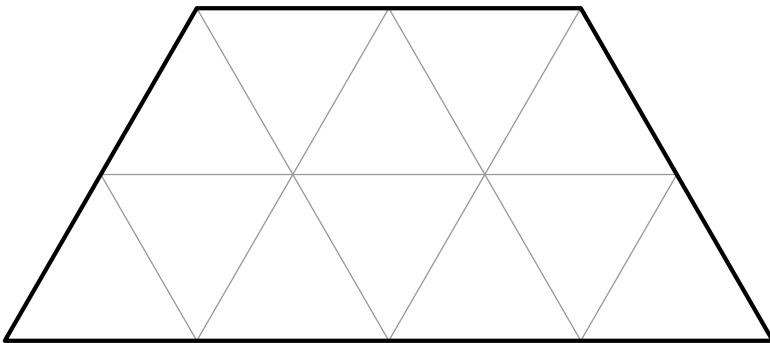

yes no

yes no

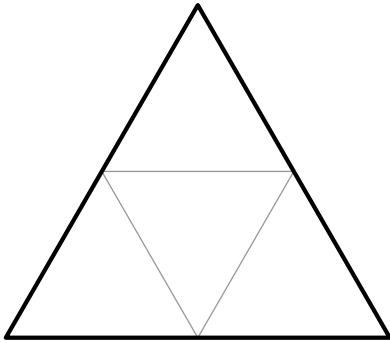

yes no

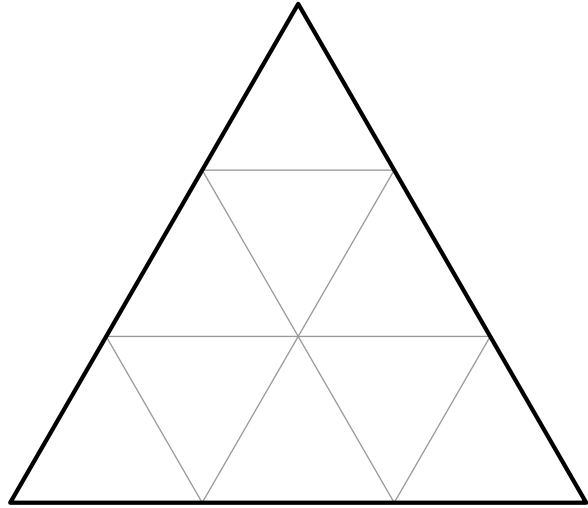

yes no

Problem 4: Cover each triangle with blue rhombuses and green triangles. Use as few green triangles as you can.

 blue rhombuses  green triangles

green triangles: _____

green triangles: _____

green triangles: _____

Problem 5: Cover each shape with blue rhombuses, then trace around the blocks. Find all the different ways.

blue rhombuses
