

Play with a partner, using real counters. Take turns taking counters. Whoever takes the last counter wins.

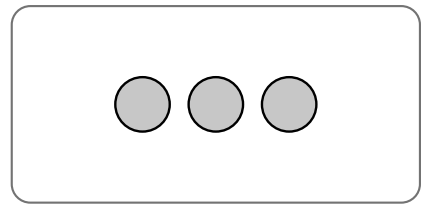

Problem 1: Take 1 or 2 each turn, and you go first. Color the star under each pile where you can always win.

Problem 3: Take 1 or 2 each turn. Circle the number under each pile where your partner can always win if you go first.

Problem 4: Take 1 or 2 each turn, and play a grown-up with 20 counters. You choose who goes first, and you color a star each time you win.

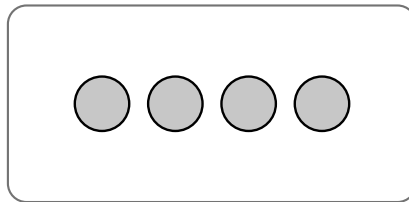

Problem 5: Now take 1, 2, or 3 each turn. Circle 1st or 2nd to show whether you would rather go first or second.

Problem 7: Take 1 or 2 counters from just one row each turn.
Circle whether you would rather go 1st or 2nd, and tell how you win.
