

Blocks go on the lines of the shape. They must stay inside it and must not overlap.

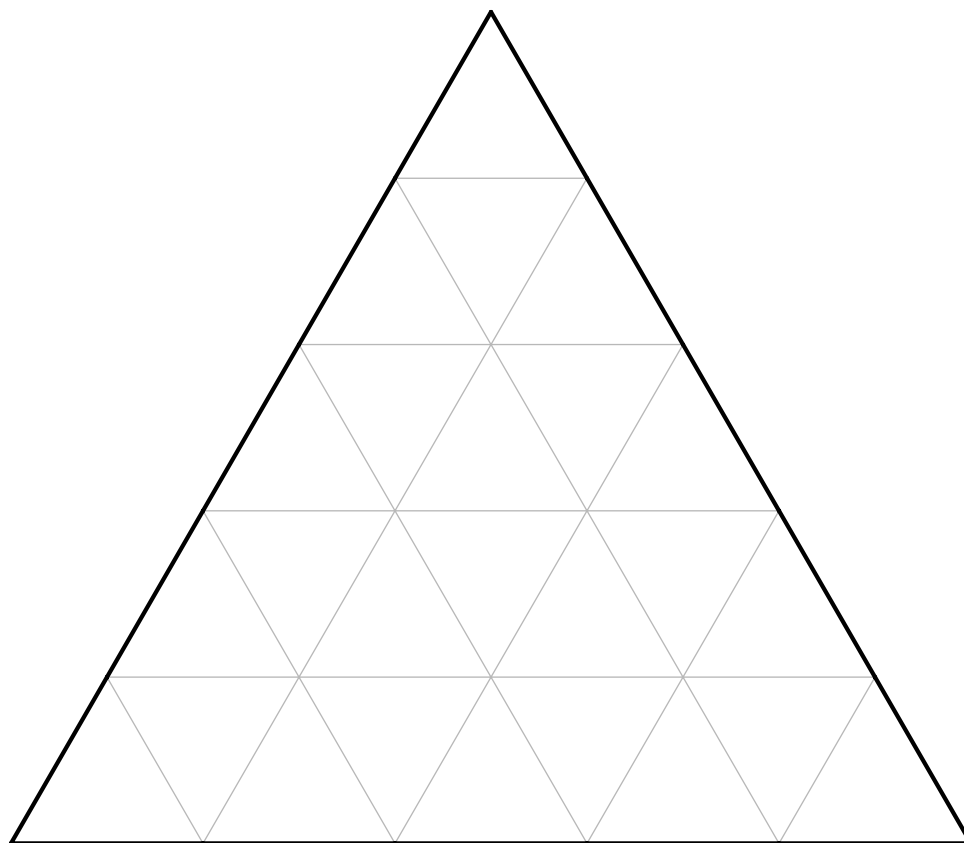

Problem 1: Cover each shape with blue blocks only. Put an X on each shape that cannot be covered.

Problem 2: Cover each triangle with blue blocks and as few green blocks as you can. Write how many green blocks you used.

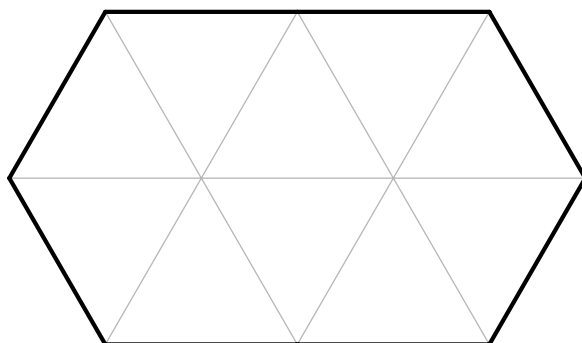

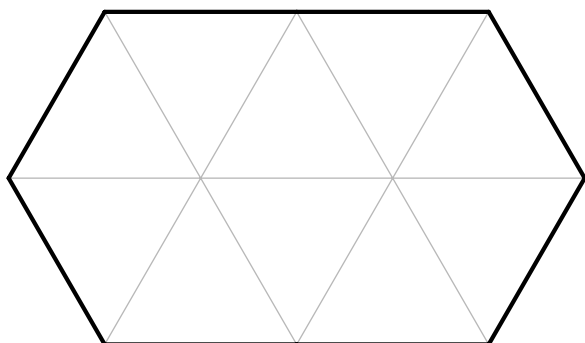

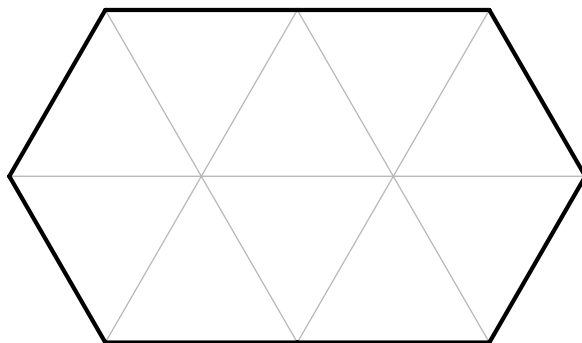

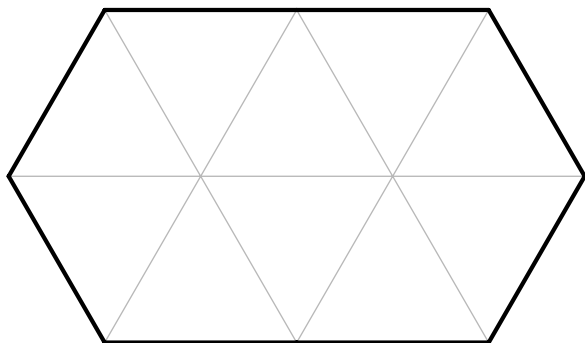

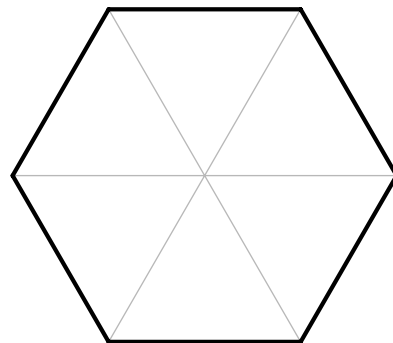

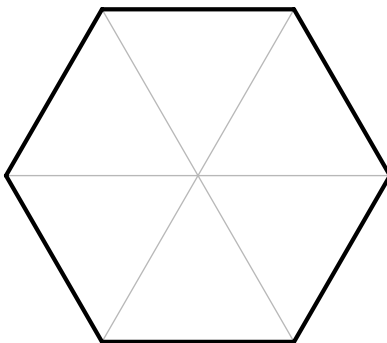

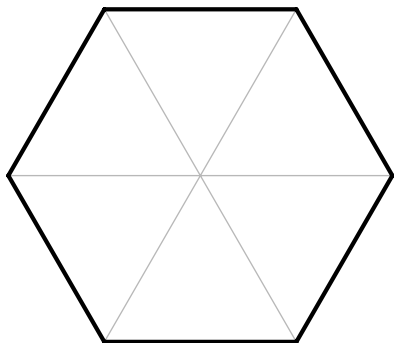

Problem 3: Guess how many green blocks this big triangle needs. Then cover it with blue blocks and as few green blocks as you can.

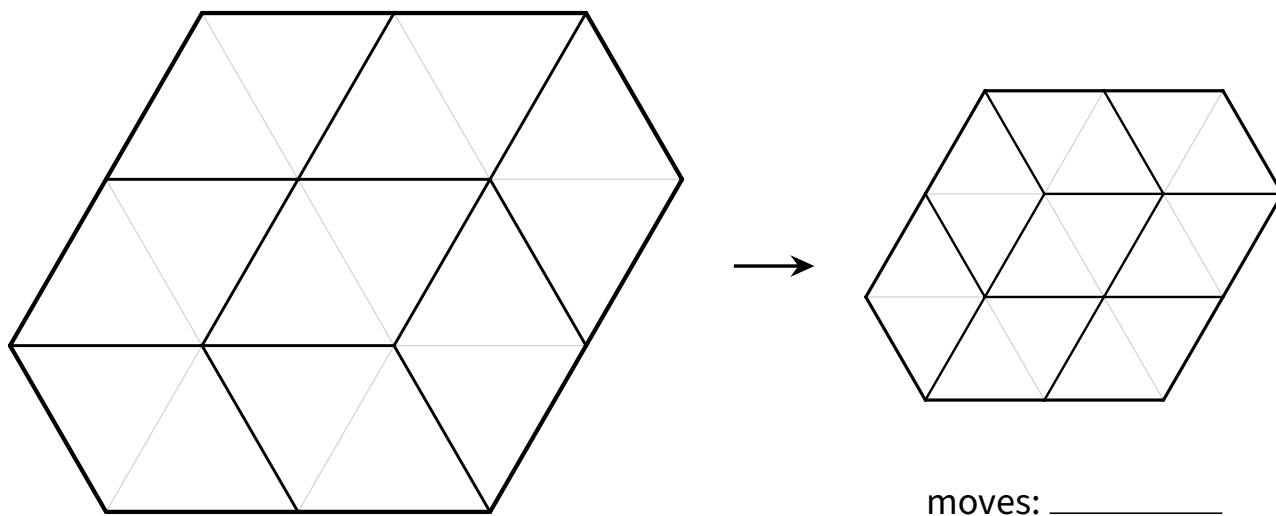

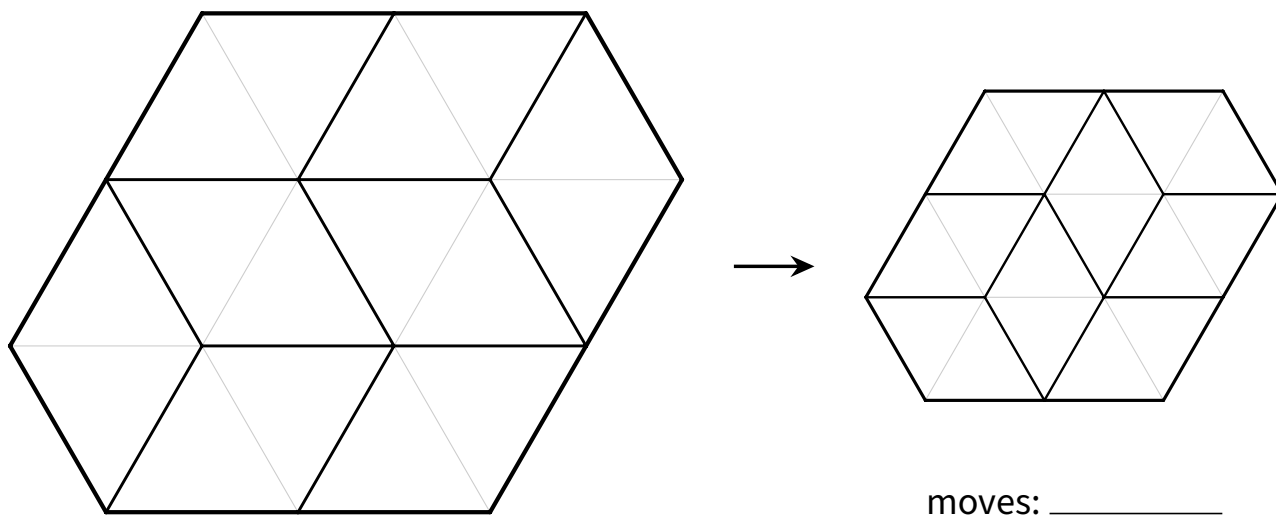

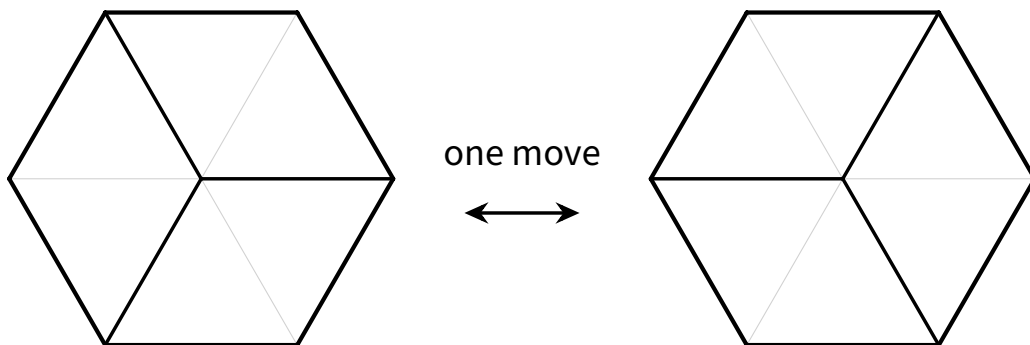

My guess: _____

I used:  _____

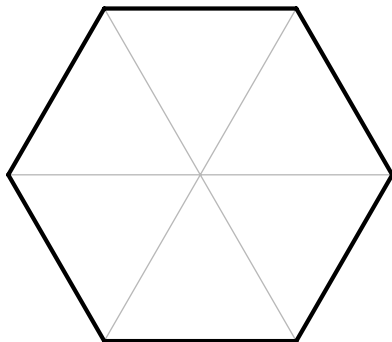

Problem 4: Find every way to cover each shape with blue blocks. Draw each way in its own copy.

Problem 5: Build the left picture with blue blocks. Change it into the right picture with as few moves as you can.

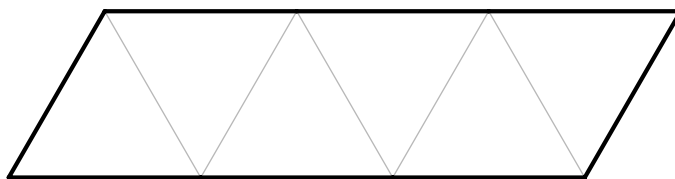

Problem 6: Take turns putting one green or one blue block on the shape. The player who puts down the last block wins. Circle who you would rather be: first or second.
