

Play with a partner. Take turns. On your turn, take 1 counter or 2 counters. Whoever takes the last counter wins.

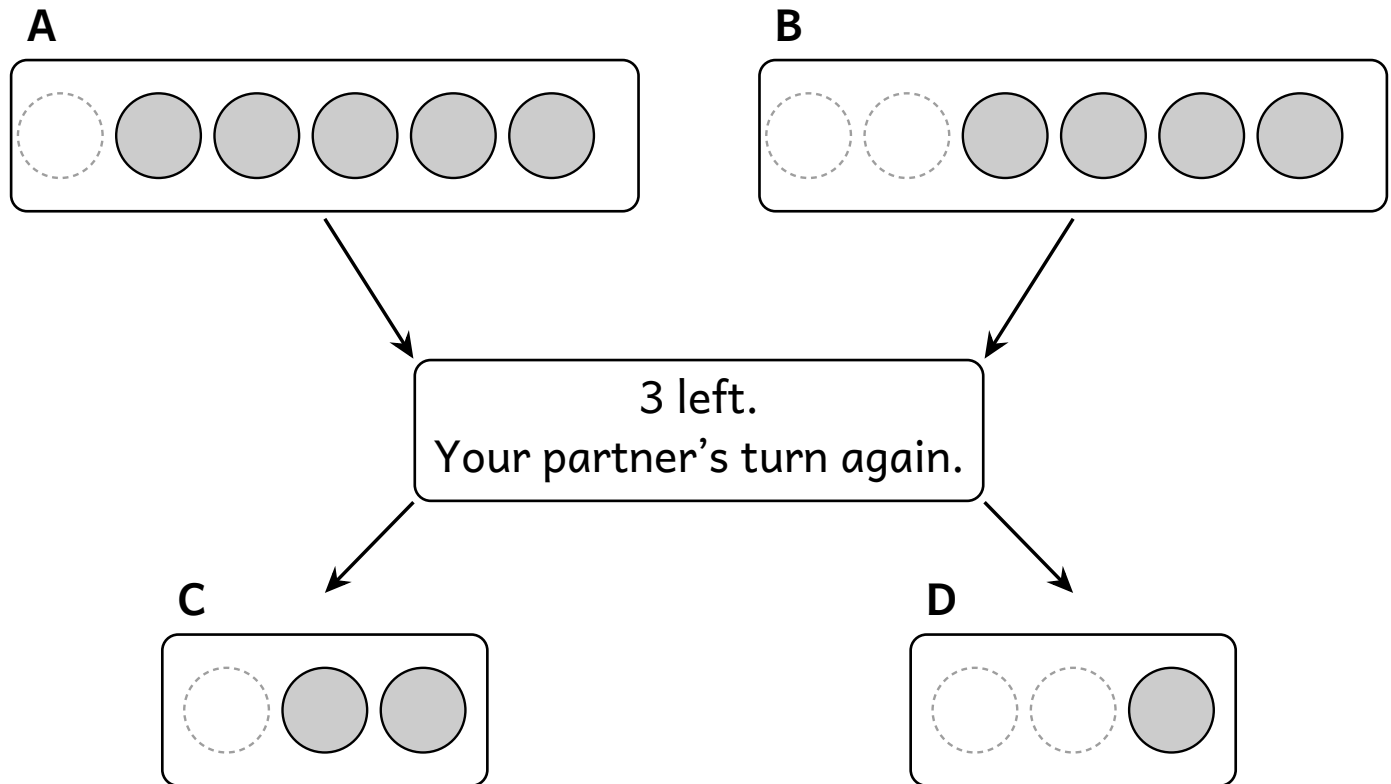

Problem 1: Play with 3 counters, then 4, then 5. Circle who you would rather be.

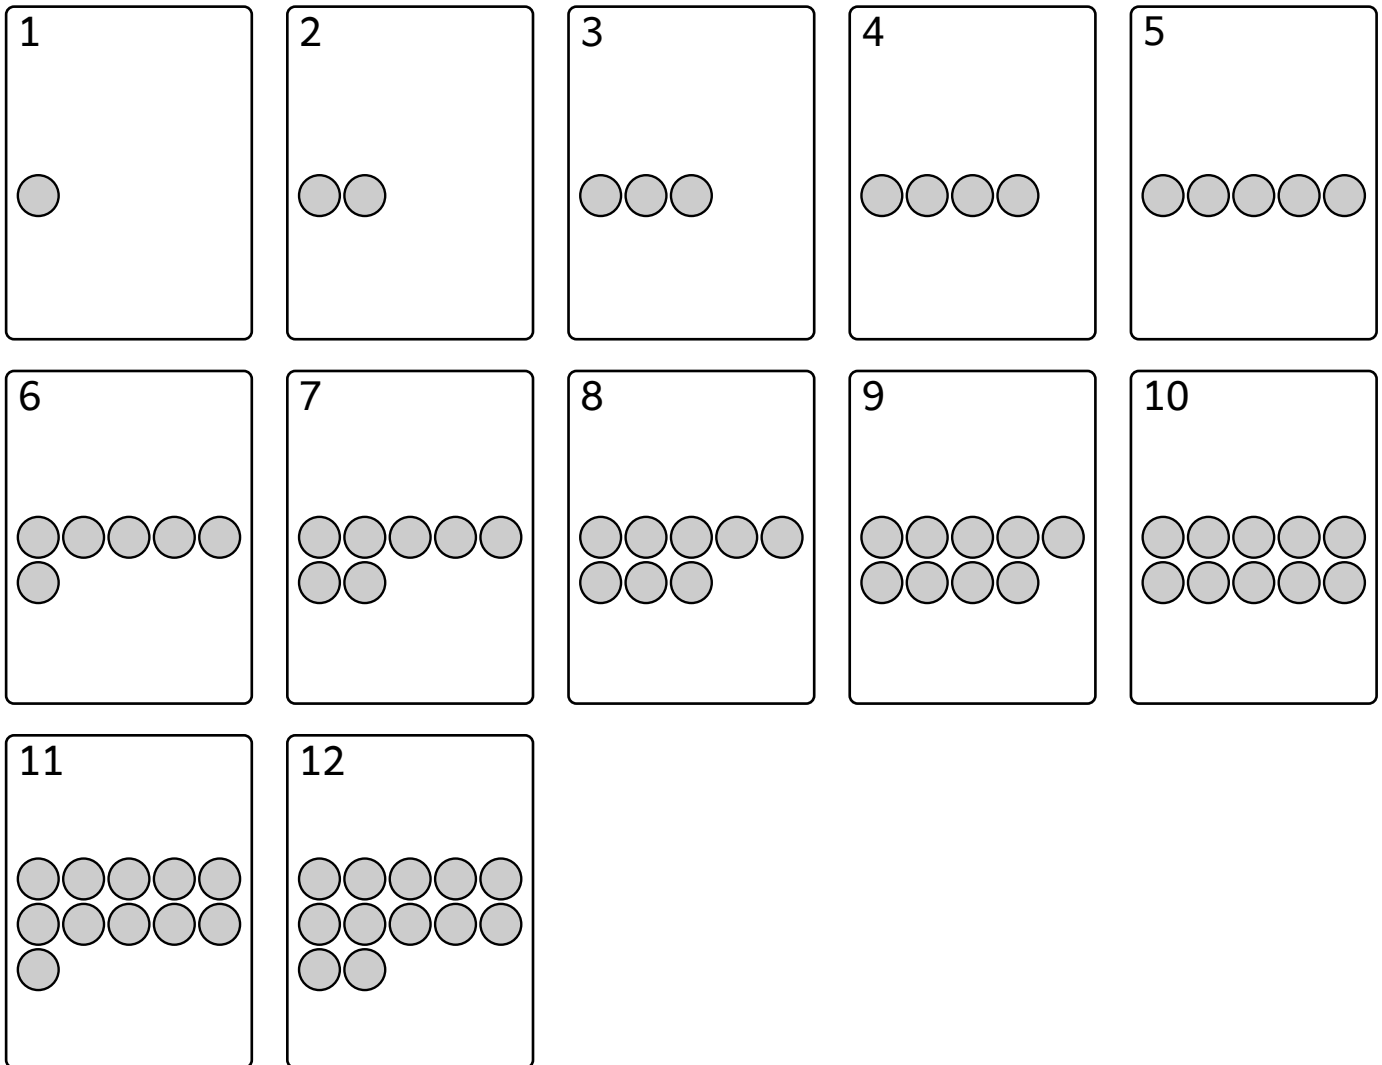

Problem 2: Play with 6 counters, then 7, then 8. Circle who you would rather be.

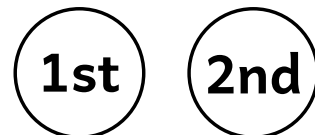

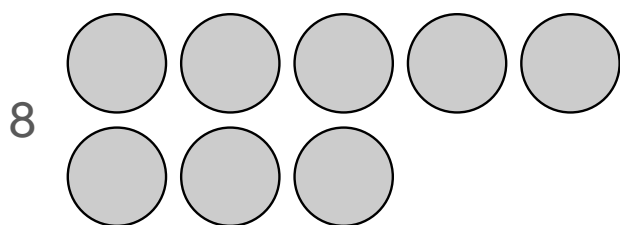

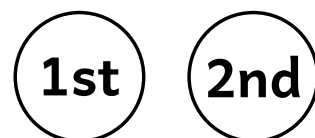

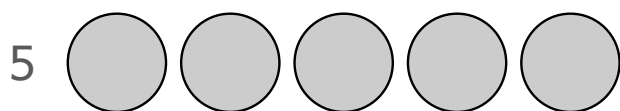

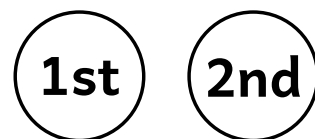

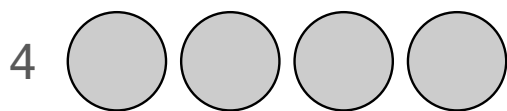

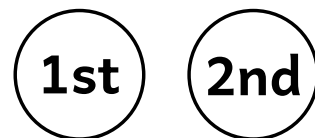

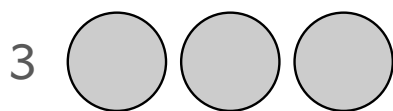

Problem 3: Your partner goes first with 6 counters. In each picture, cross out what you take so that you win.

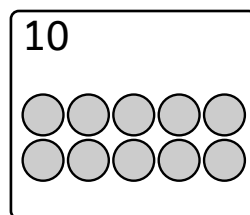

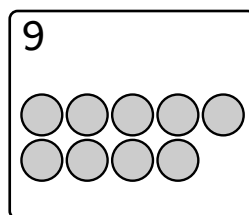

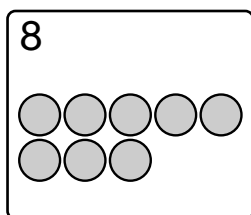

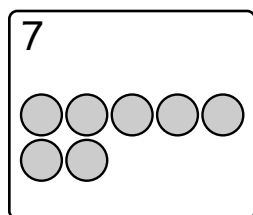

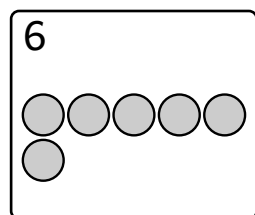

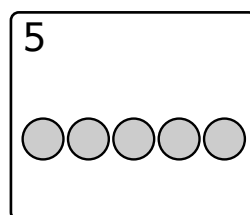

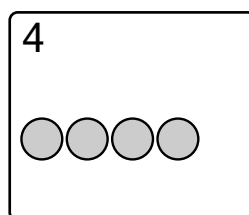

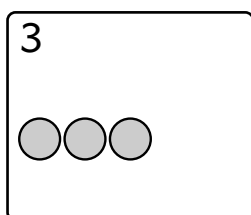

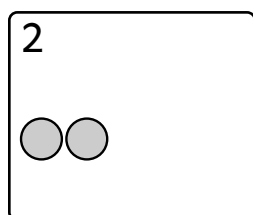

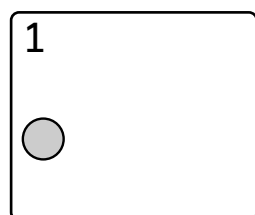

Problem 4: Here are piles from 1 to 12. Color every pile you would not want on your turn.

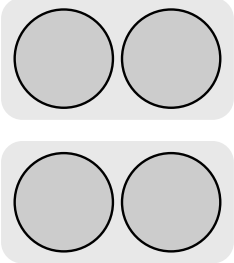

Problem 5: Now you may take 1, 2, or 3 counters. Play with 3, 4, 5, and 8 counters, and circle who you would rather be.

Problem 6: Now you may take 1 or 3 counters, but not 2. Color every pile you would not want on your turn.

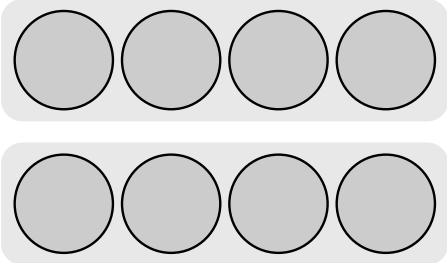

Problem 7: Make two rows like the picture. Take turns taking 1 or 2 counters from one row, and circle who you would rather be.

Problem 8: Now whoever takes the last counter loses. Play with 3, 4, 5, and 7 counters, taking 1 or 2 on each turn, and circle who you would rather be.

Problem 9: Whoever takes the last counter wins again. Make three rows like the picture, take 1 or 2 counters from one row on your turn, and circle who you would rather be.
