

Problem 1: Fill each shape with small pieces of the same colour, with no gaps and no piece sticking out. Then do the same on the biggest green, blue, red and yellow pieces on your table. Write how many pieces you used, or draw an X if it can't be done.

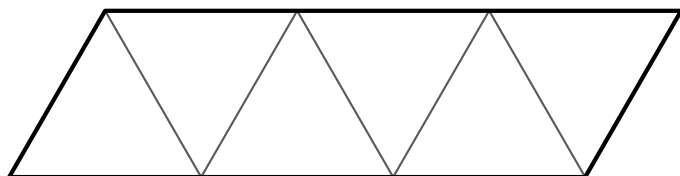

Problem 2: Take turns with a partner putting a blue piece on two empty small triangles. If you can't put one down, you lose. Circle the player who can always win on each board.
