jump too big

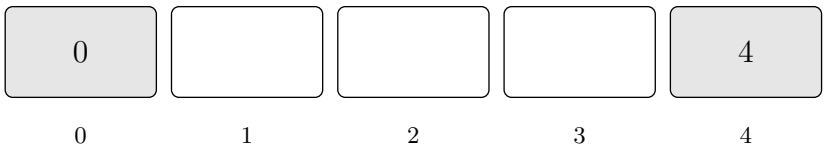

Problem 1: Make different landscapes with these clues.

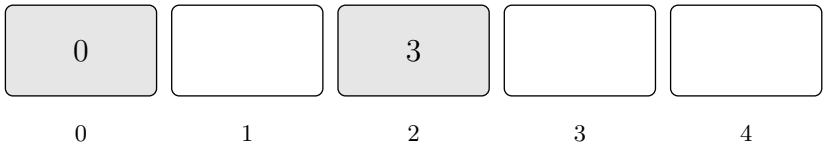

Problem 2: Put the starred marker as high as you can, then as low as you can.

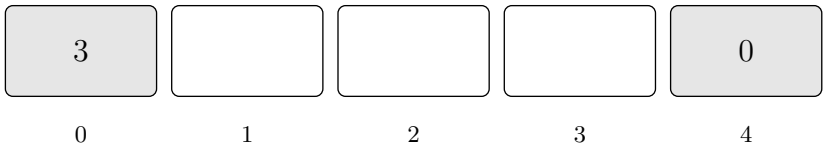

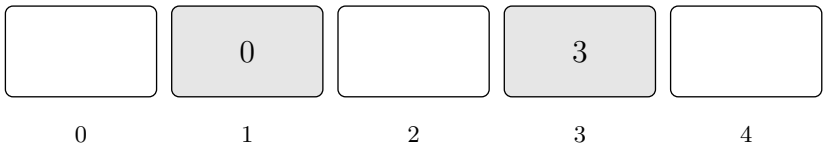

Problem 3: Move the right clue to 4. Find every landscape that works.

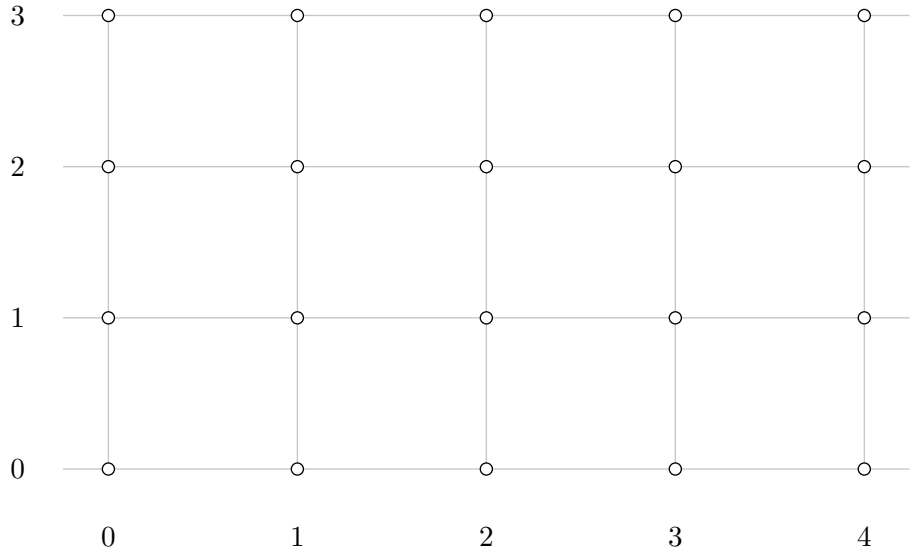

Problem 4: Which clues can go together? Build the ones that work.

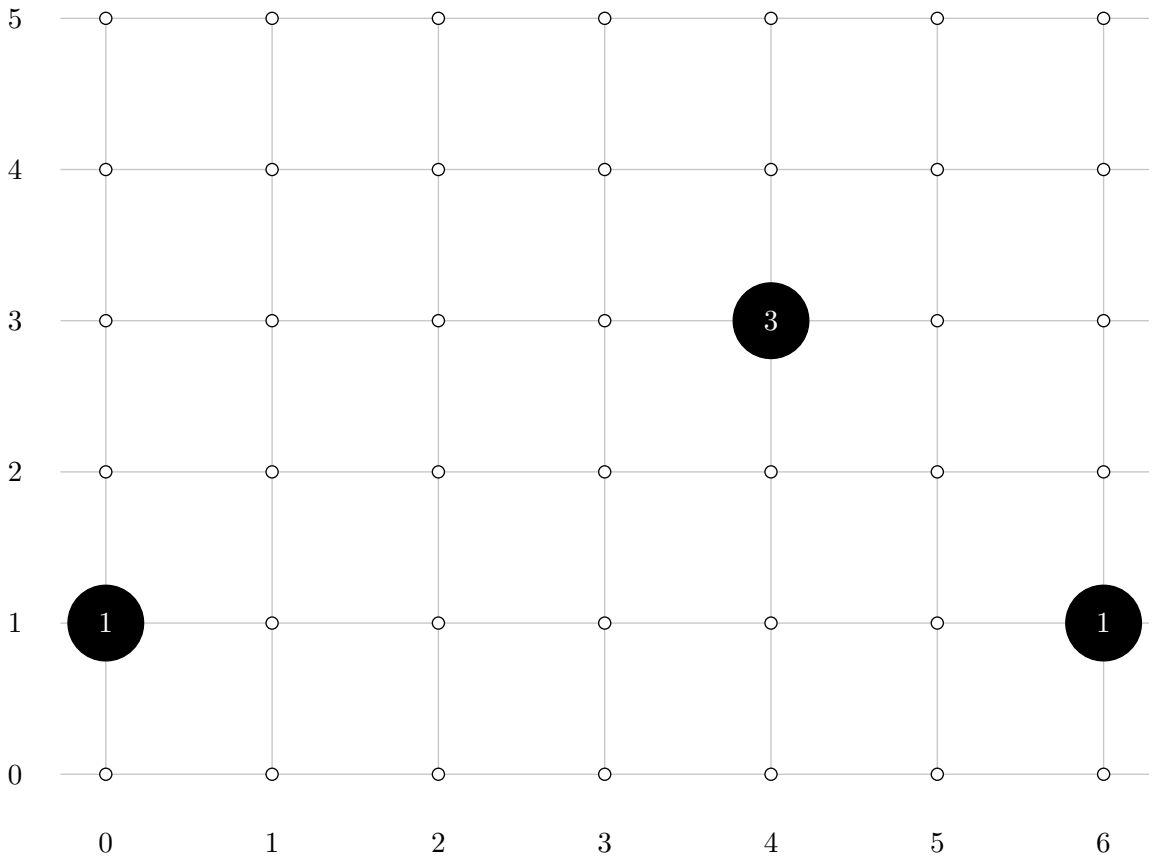

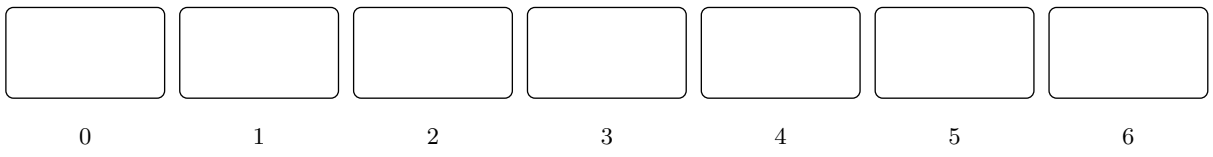

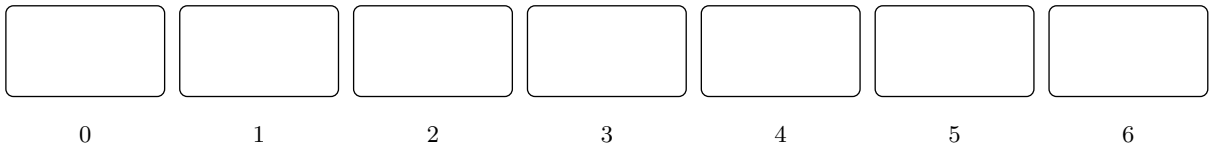

Problem 5: Make three different landscapes with these clues.

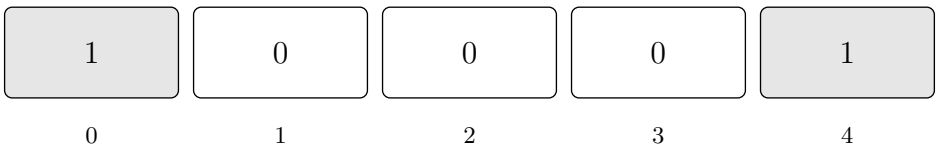

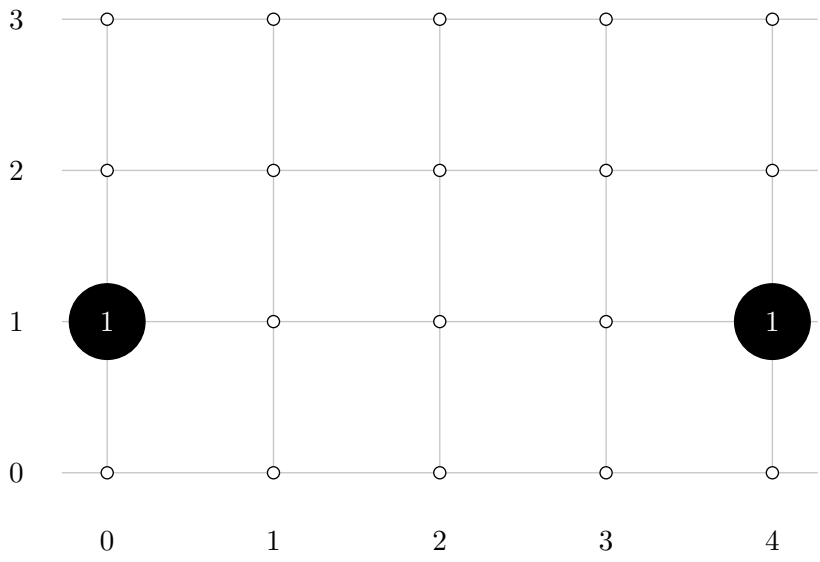

Problem 6: Move one white marker one level up or down in its own column each turn, keeping the rule. Reach the second landscape in as few moves as you can.

Problem 7: Put two clues on this board for a friend to solve.
