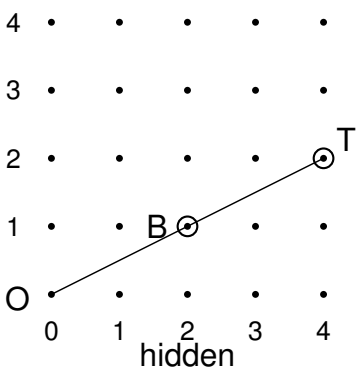
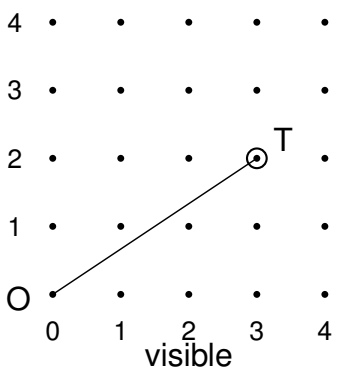
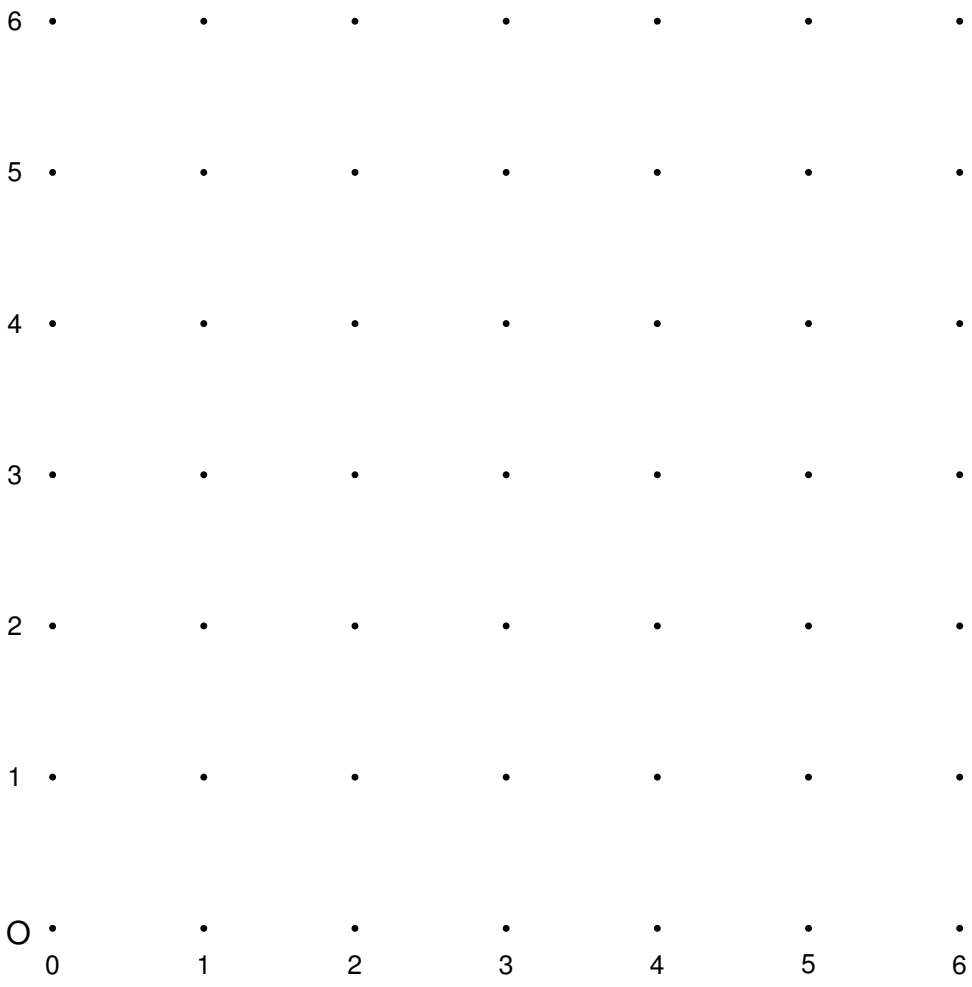
Stretch a thread from O to another dot T. A dot exactly on the thread between O and T blocks T. B marks a blocker. Keep O fixed while you test.

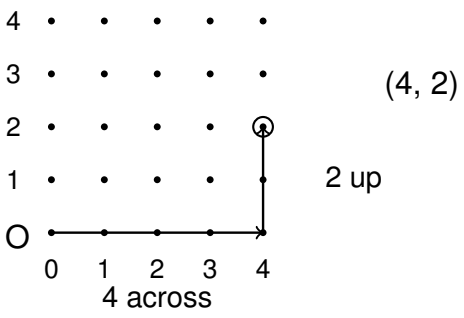


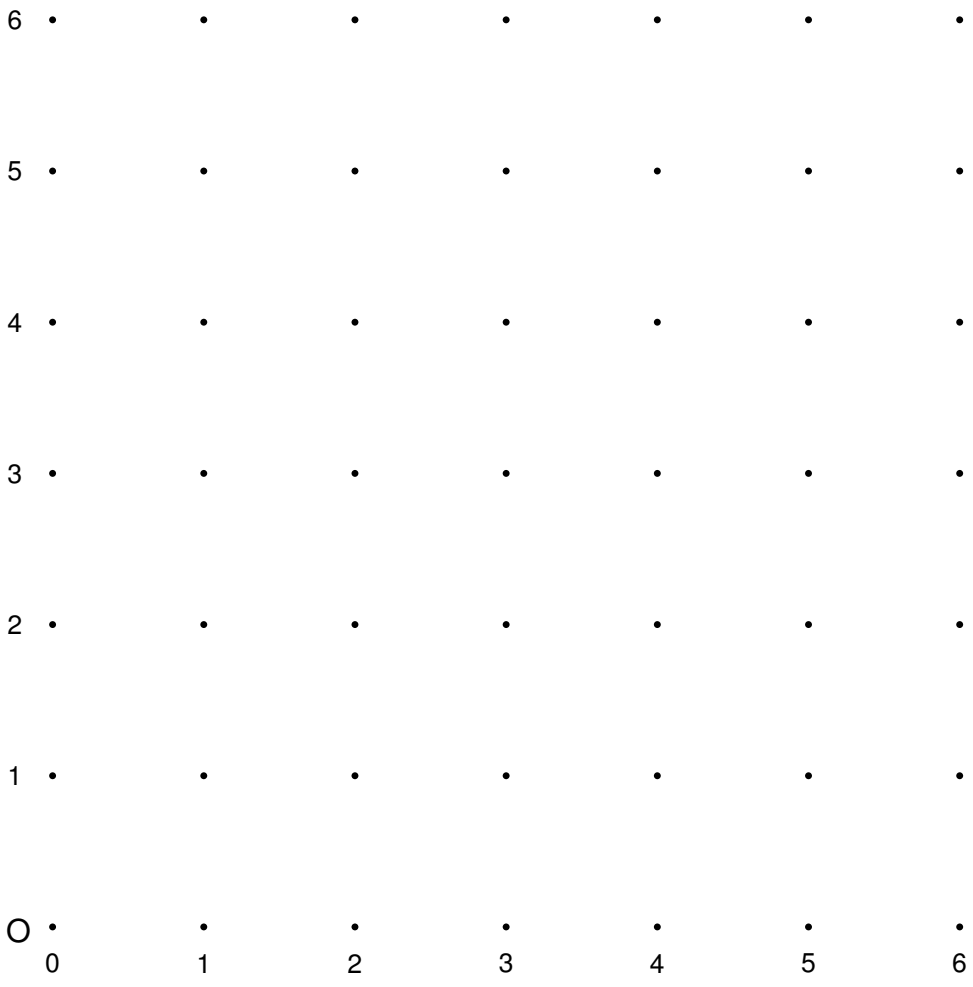


Problem 1: Circle every dot visible from O. For three hidden dots, mark their first blocker.



(4, 2) means 4 across and 2 up from O.





Problem 2: Test these targets: (6, 4), (6, 3), (5, 3), (5, 2), (4, 4) and (4, 1). Find every dot between O and each target.
