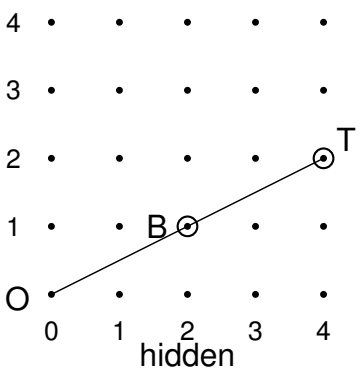
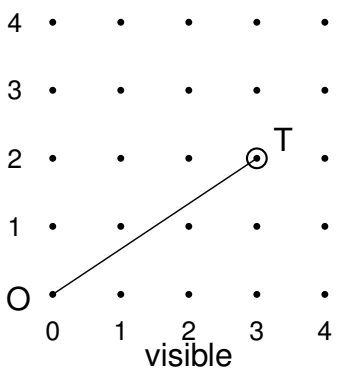
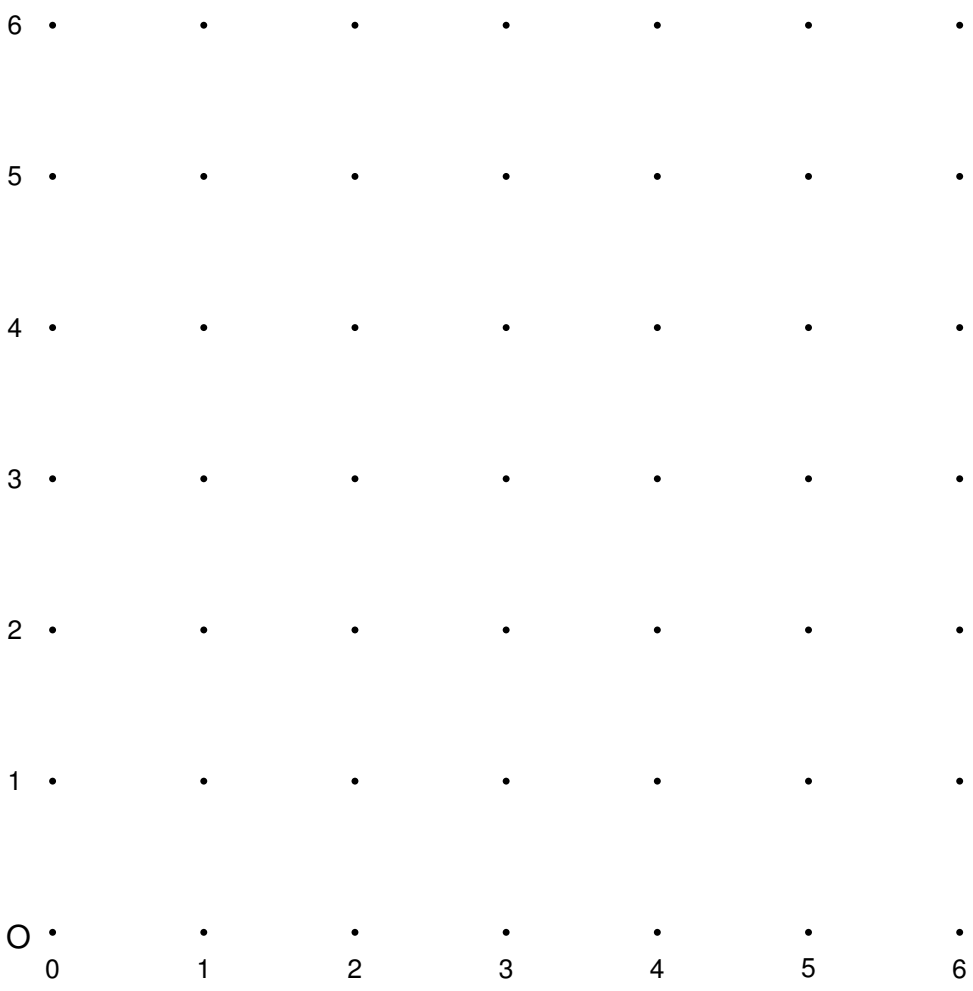
Stretch a thread from O to another dot T. A dot exactly on the thread between O and T blocks T. B marks a blocker. Keep O fixed while you test.

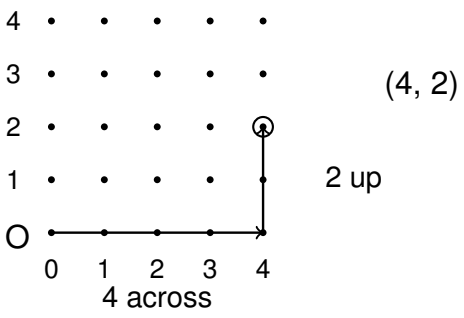


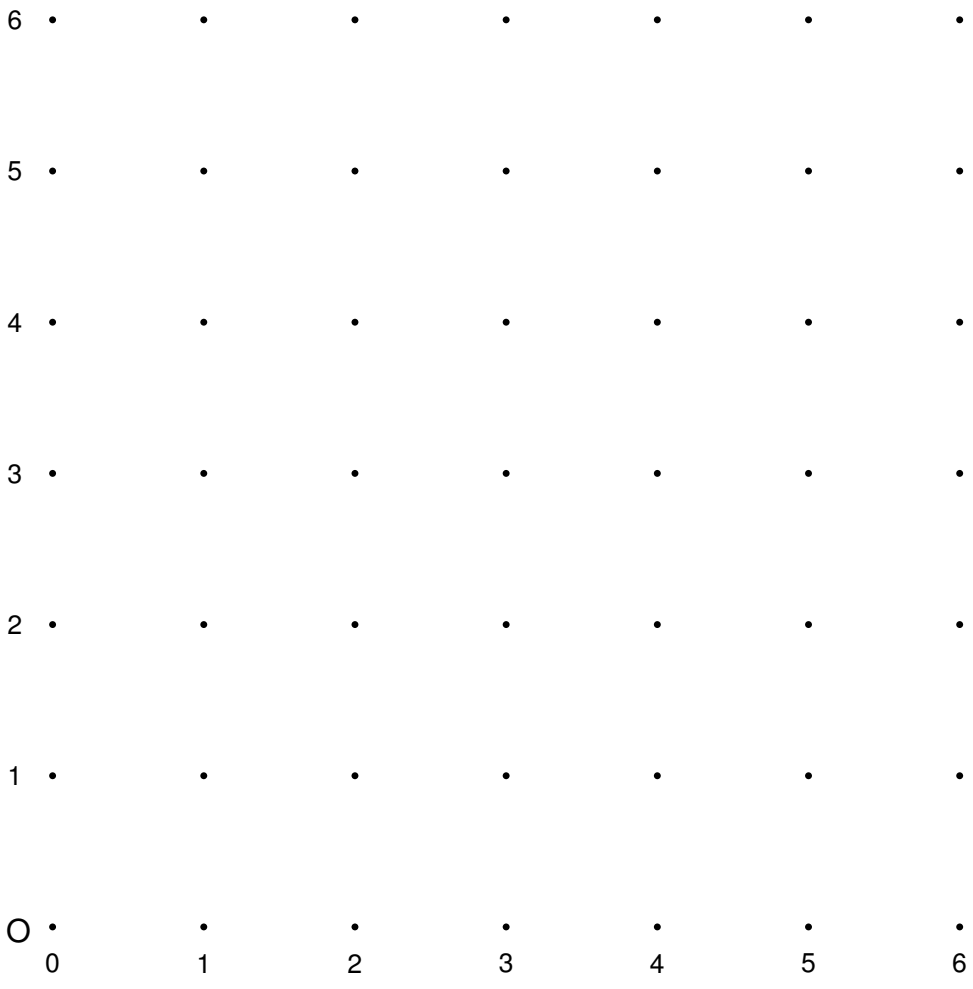


Problem 1: Find three visible targets and three hidden targets with different numbers of blockers. Mark each blocker.



(4, 2) means 4 across and 2 up from O.





Problem 2: For each target, find the first dot after O on its line and every blocker: (6, 4), (6, 3), (5, 3), (6, 6), (6, 0) and (0, 6).
