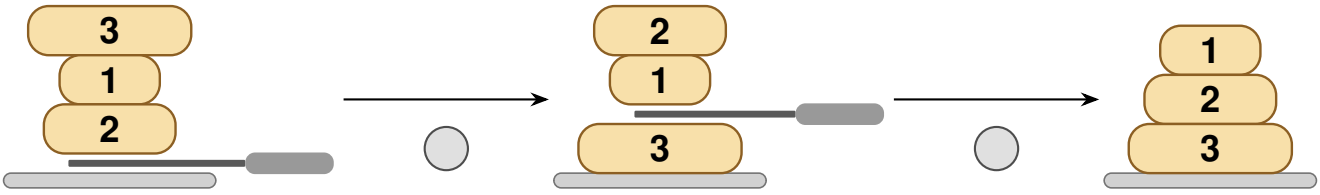
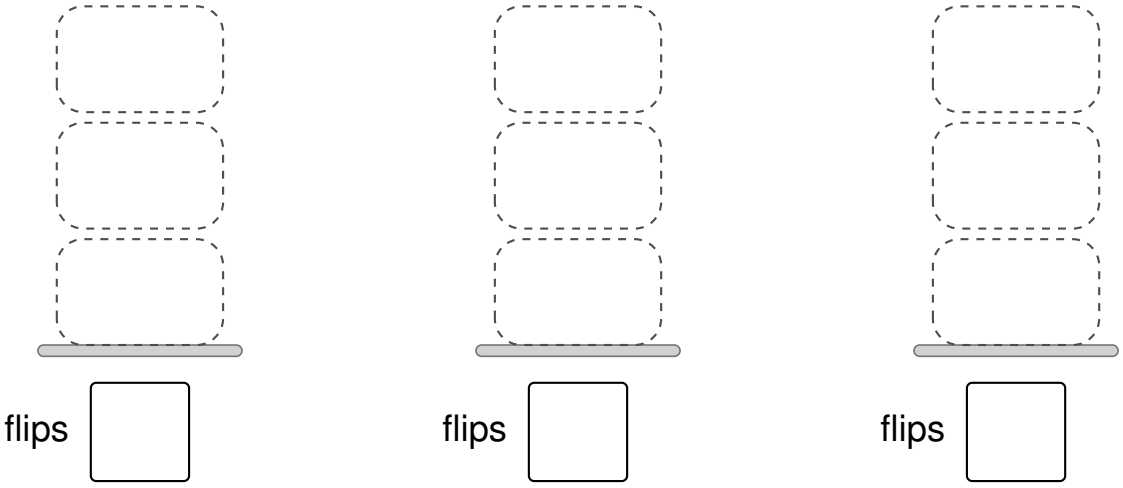
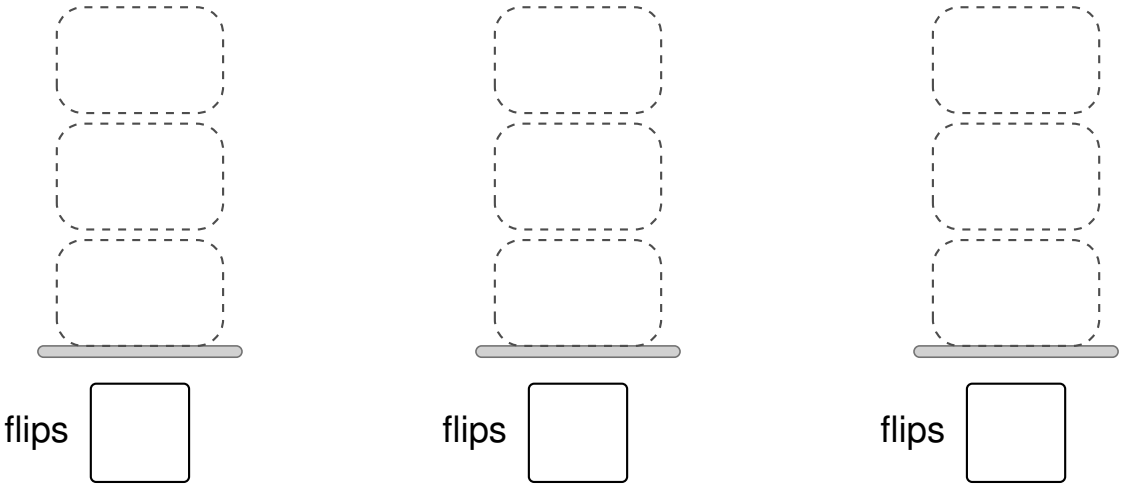
A stack is sorted when it goes from the smallest pancake on top to the biggest at the bottom. To flip, slide the spatula under a pancake and turn over everything above the spatula, all together. Put down a token for each flip.

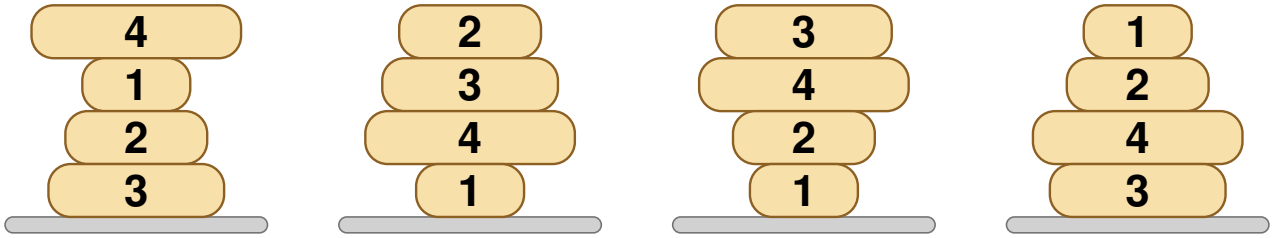


Problem 1: Find all six ways to stack pancakes 1, 2 and 3, and sort each one with as few flips as you can. Circle the stack that needs the most flips.



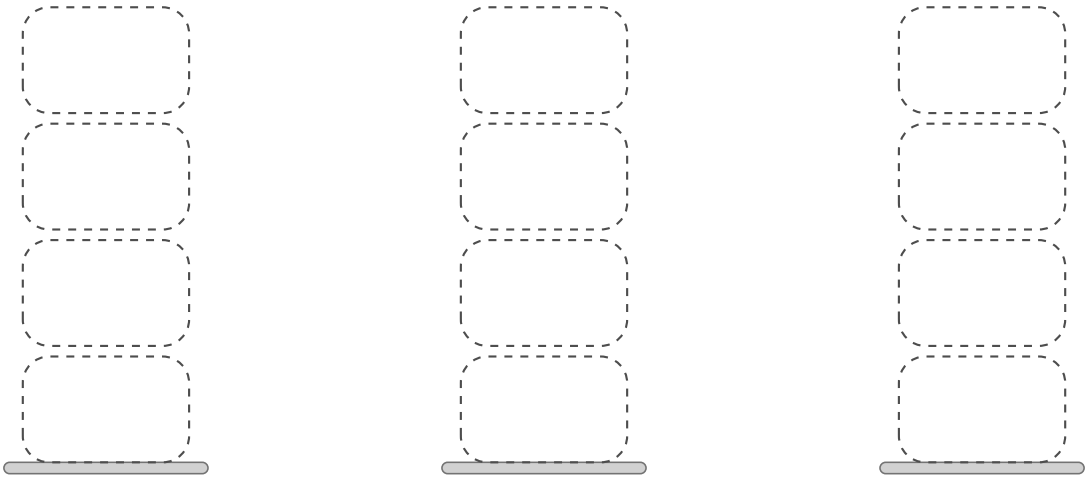


Problem 2: Build each stack of four and sort it with as few flips as you can.

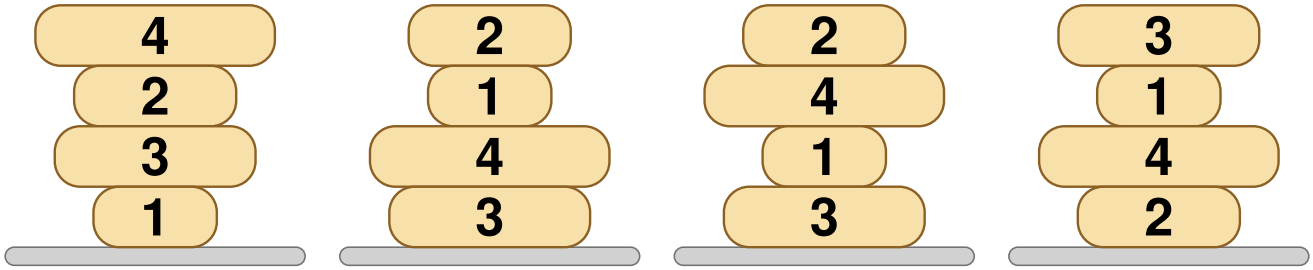


flips ☐ flips ☐ flips ☐ flips ☐

Problem 3: Find every mixed-up stack of pancakes 1, 2, 3 and 4 that you can sort with one flip.

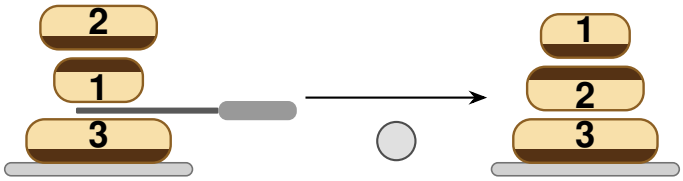


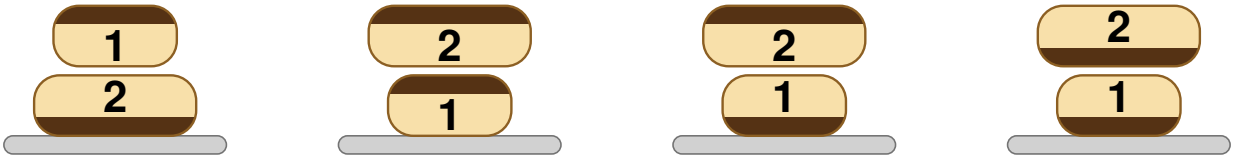
Problem 4: Build each stack and sort it with as few flips as you can.



flips ☐ flips ☐ flips ☐ flips ☐

Problem 5: Each pancake has a dark side. Sort each stack so every dark side ends facing down, with as few flips as you can.





flips ☐ flips ☐ flips ☐ flips ☐

Problem 6: Find the stack of pancakes 1 and 2 that needs the most flips. Draw it with its dark sides.
