Keep the bands on the table. An adult makes every cut.

input process output

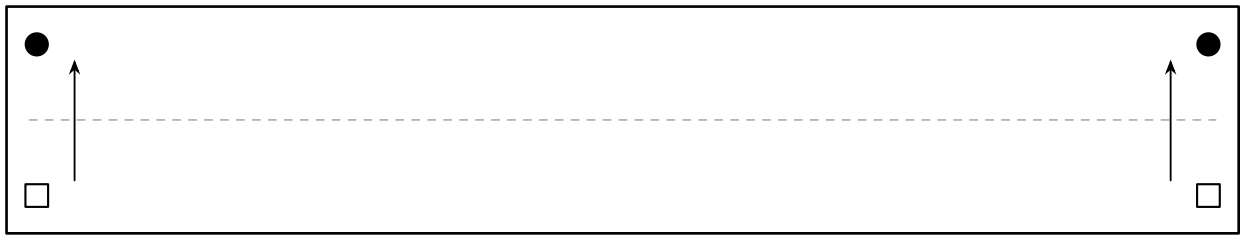

Join • to • and □ to □.

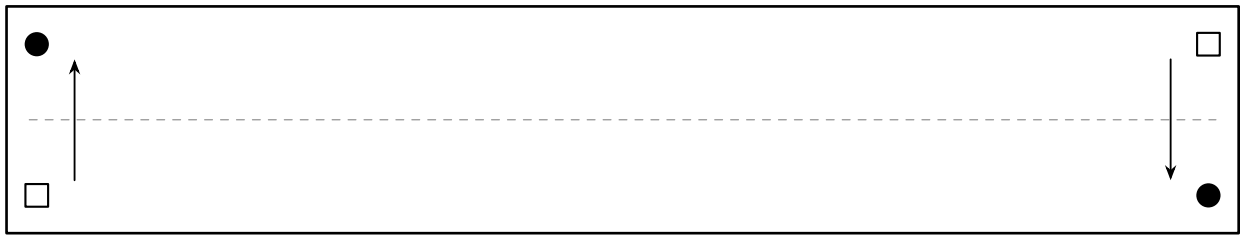

An edge trip stays on an edge, follows its seam marks, and stops on its first return to the start dot.

Problem 1: Trace every edge of A and B. Give each separate closed edge its own color.

A

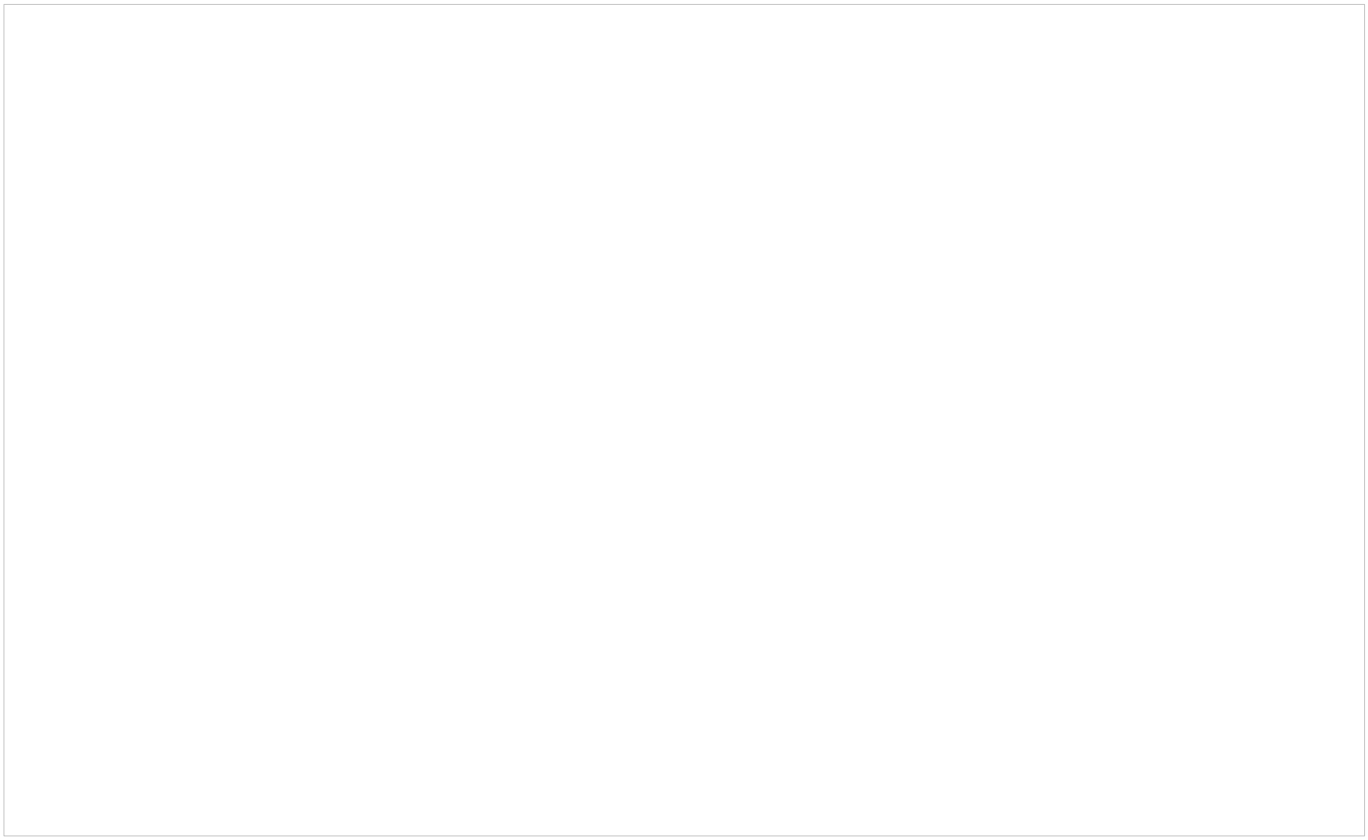

B

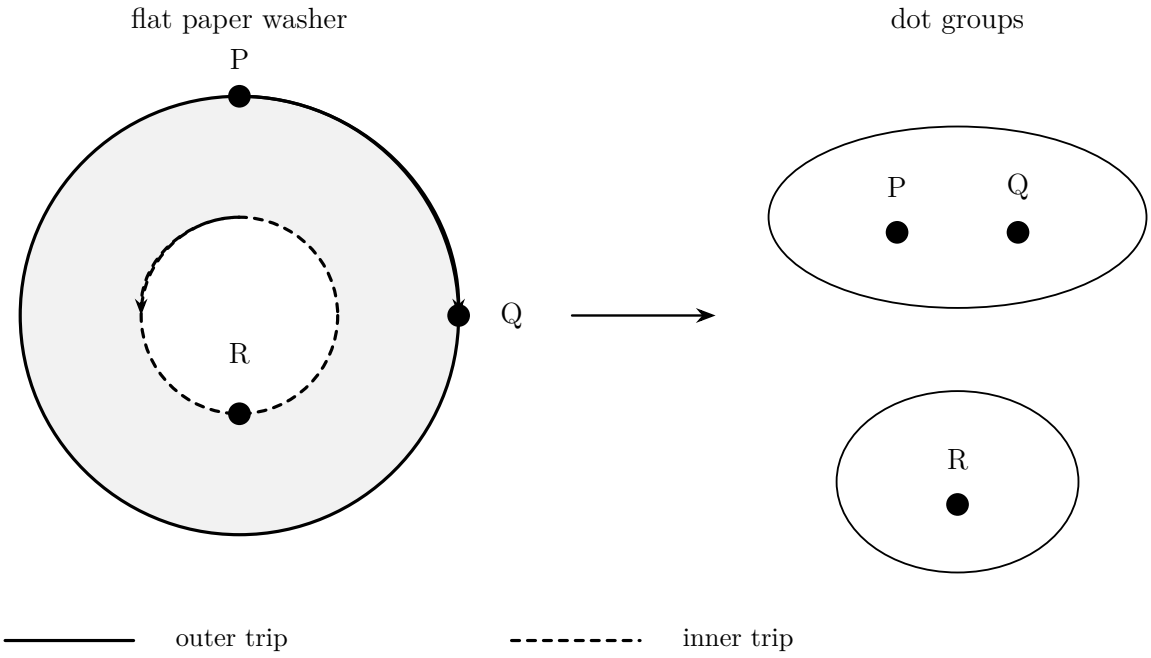

A: _____ B: _____

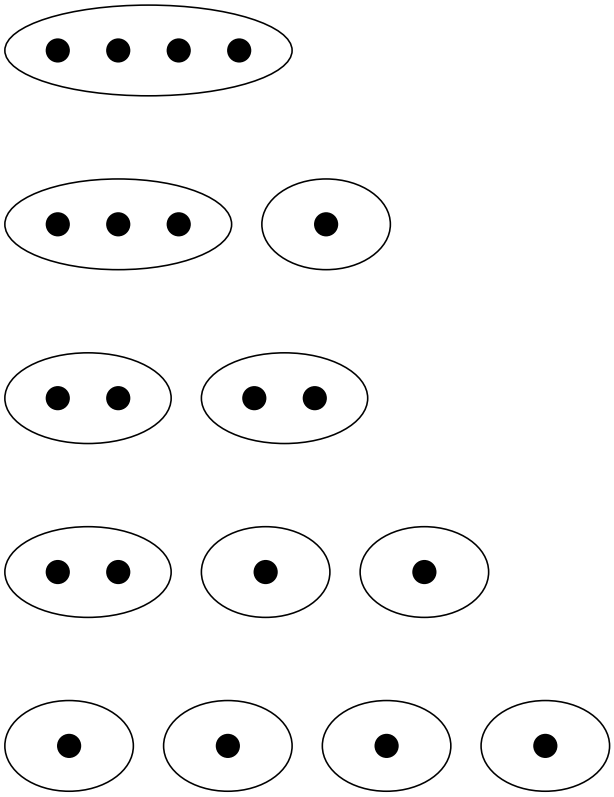

Problem 2: Put two dots on the edges of A so one edge trip reaches both, then try to place them so no one trip reaches both. Repeat with B.

Dots on one edge go in one ring.

Problem 3: Place four edge dots to match each picture on A and on B. Write yes or no in each blank. Each ring means a different closed edge; other edges may have no dots.

A: ____ B: ____

A: ____ B: ____

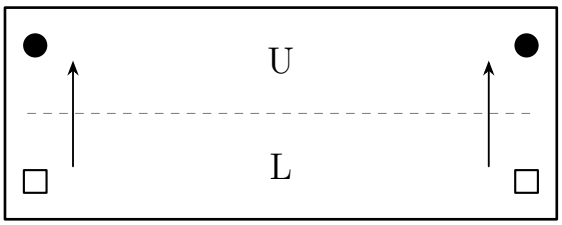

A: ____ B: ____

A: ____ B: ____

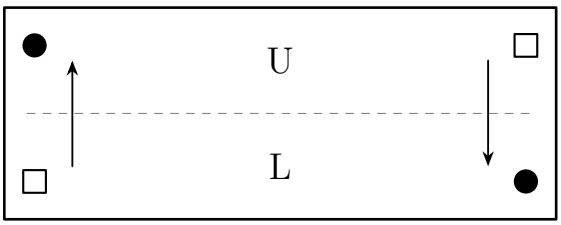

A: ____ B: ____

Problem 4: Guess how many pieces each band will make when an adult cuts its middle line. Ask the adult to cut A and B, and draw what you get.

A

B

I predict: _____

I predict: _____

after cutting A

after cutting B
