Build the towers on a strip and play with a partner. Take turns. On your turn, take one whole tower from either end of the row. At the end, each player snaps their cubes into one stack. The taller stack wins. If the stacks are the same height, it is a tie.

Problem 1: Play each row two times, taking turns to go first. Ring who won each game, or ring tie.

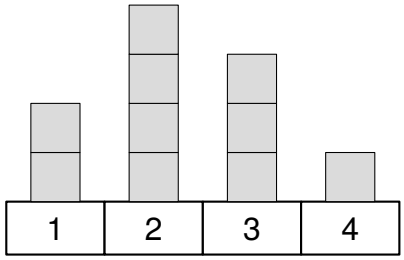

went first went second tie

went first went second tie

went first went second tie

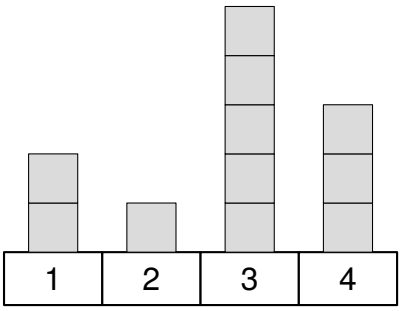

went first went second tie

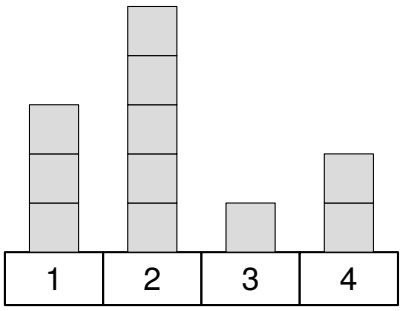

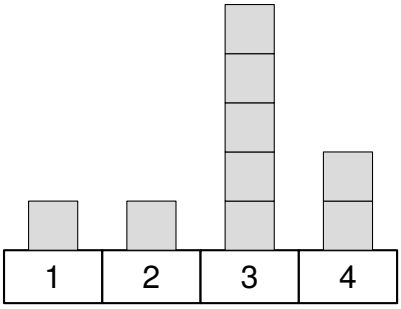

went first went second tie

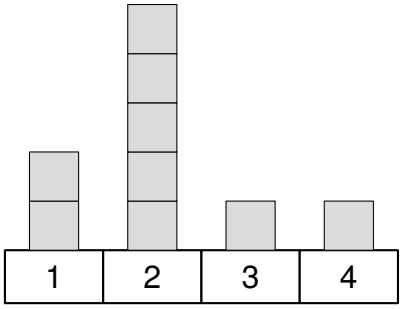

went first went second tie

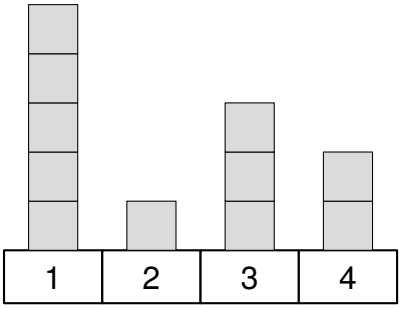

Problem 2: You go first. Which tower should you take first so that you win, however your partner plays? Ring it.

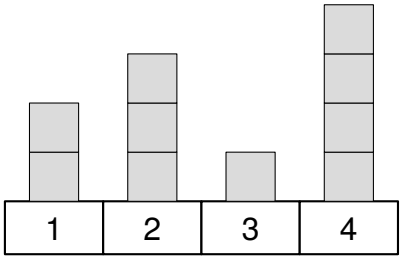

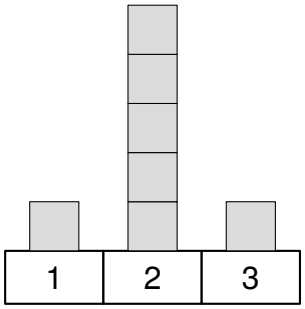

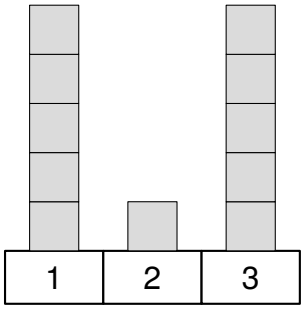

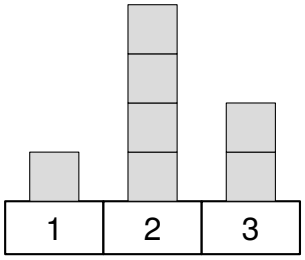

Problem 3: Is it better to go first or second on each row? Ring 1st or 2nd.

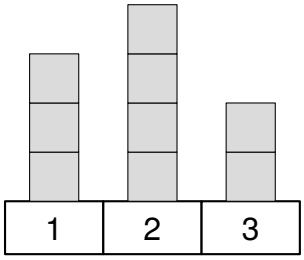

1st 2nd

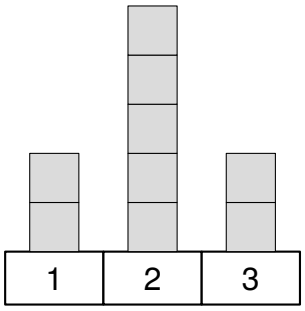

1st 2nd

1st 2nd

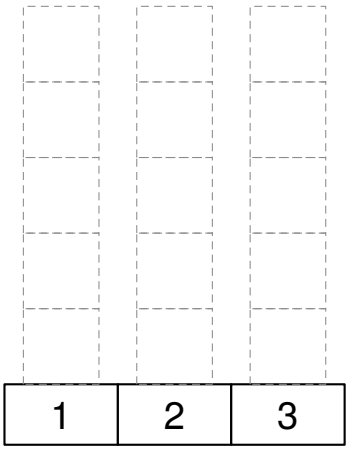

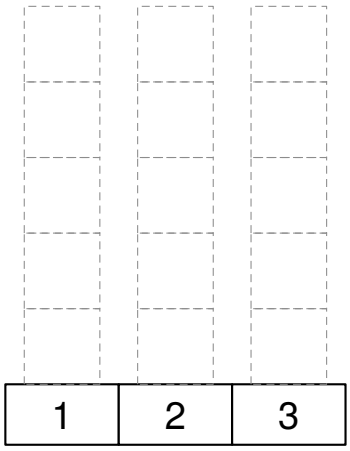

1st 2nd

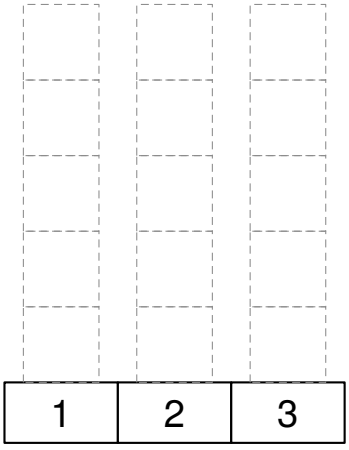

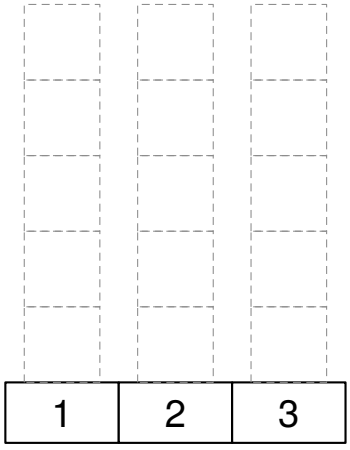

1st 2nd

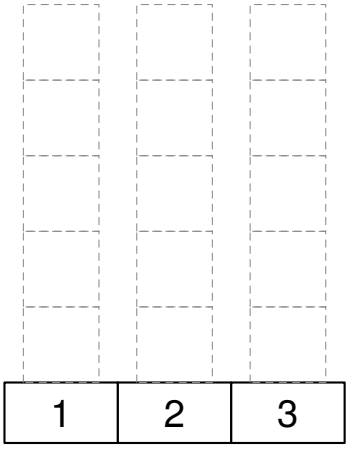

Problem 4: Make up rows of three towers where whoever goes first loses. Draw them.

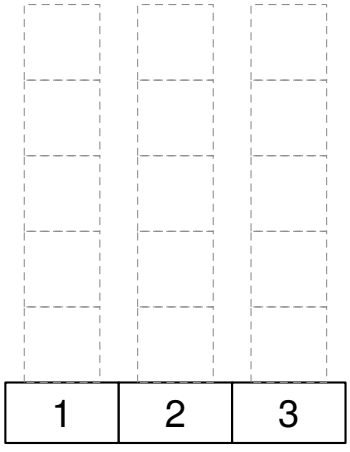

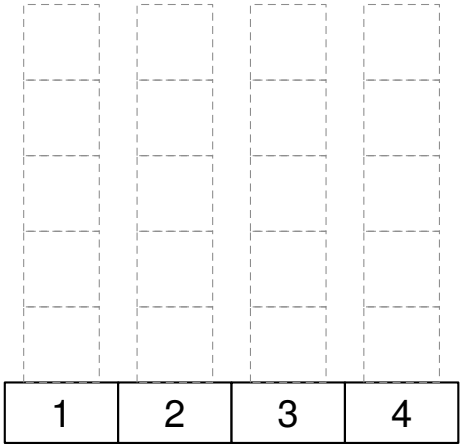

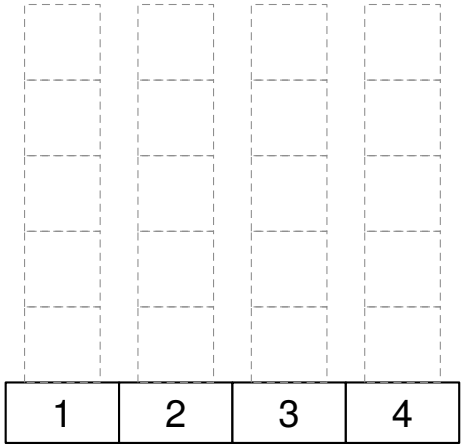

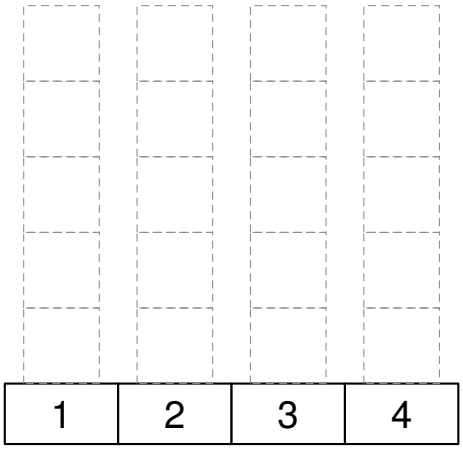

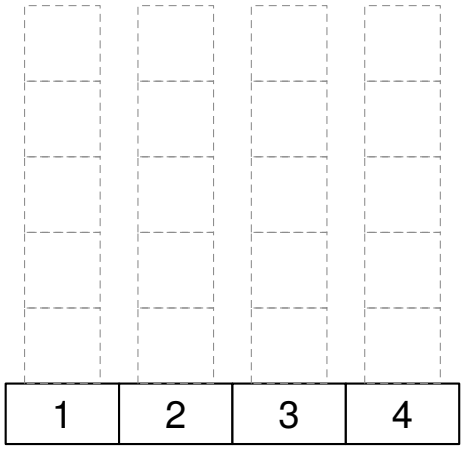

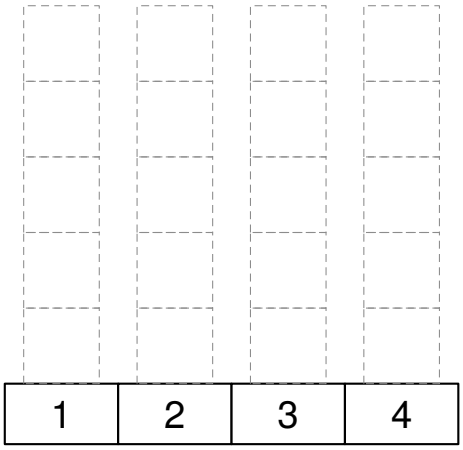

Problem 5: Can you make a row of four towers where whoever goes first loses?

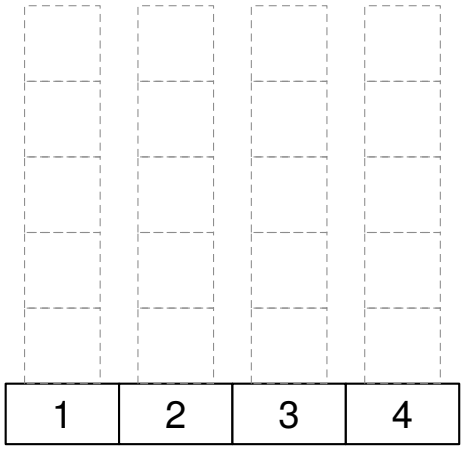

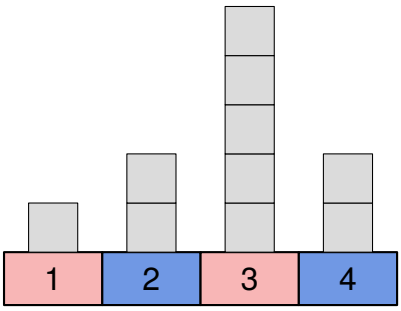

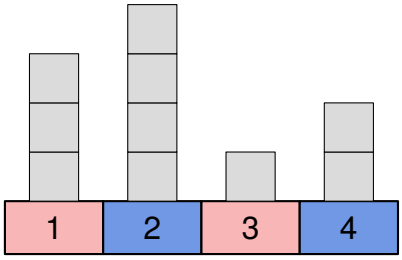

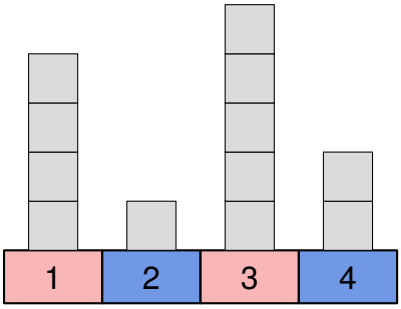

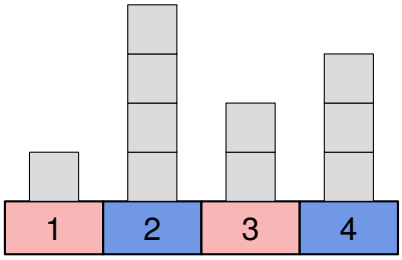

Problem 6: You and your partner play the grown-up together. The grown-up goes first on the colored strip. Can you beat the grown-up?

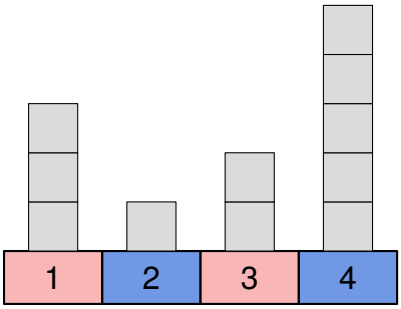

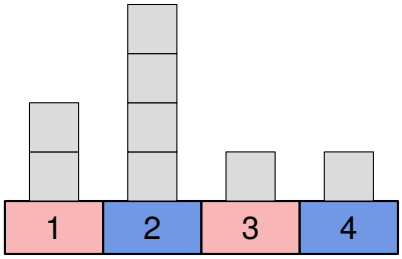

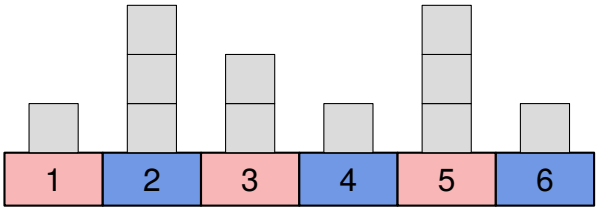

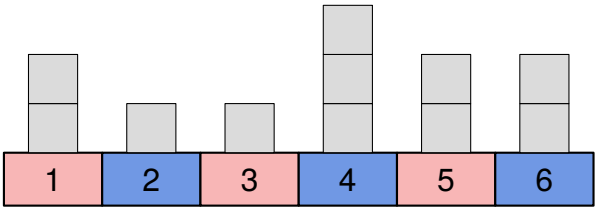

Problem 7: Now you go first on the colored strip. Can you play so that your partner can never beat you?

Problem 8: You go first on these colored rows. Which rows can you win, however your partner plays? Ring them.
