
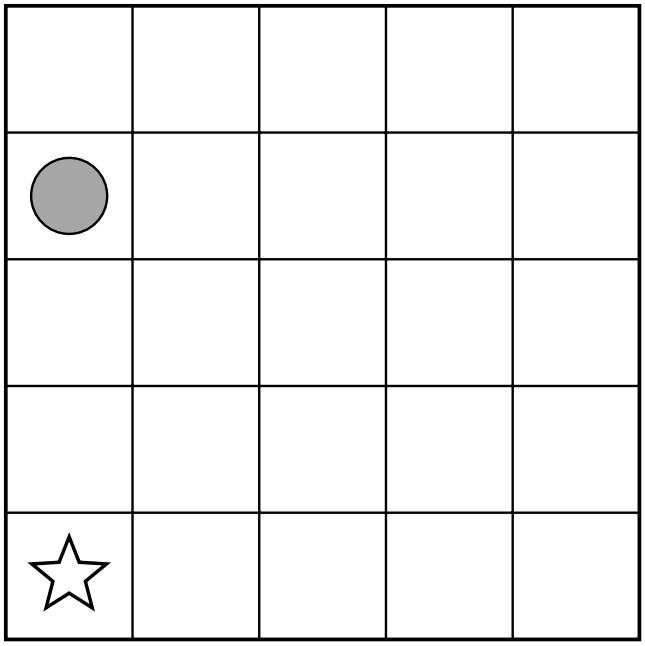
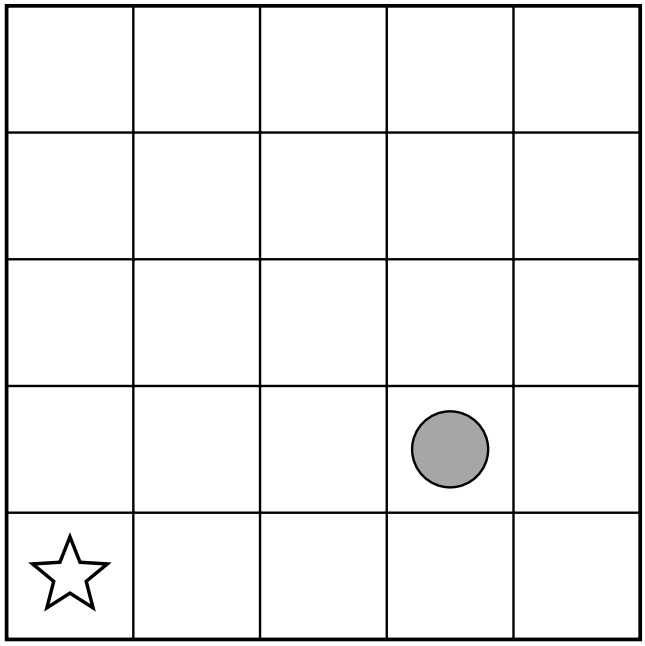
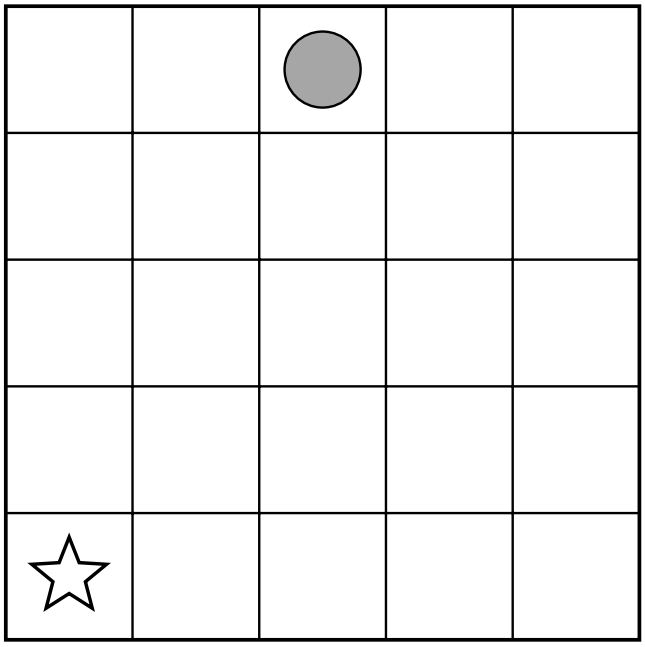
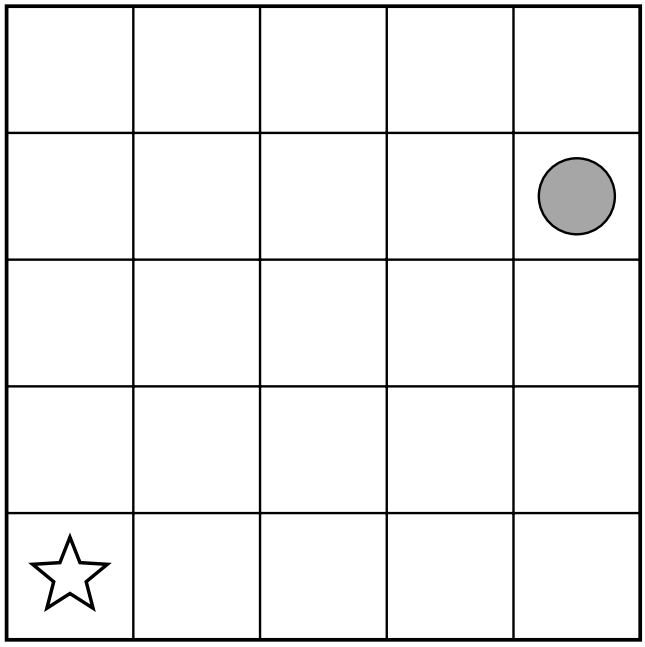
On your turn, slide the token straight left or straight down, toward the star's side, one or more squares. Whoever moves the token onto the star wins.

Problem 3: It is your turn, and the token is on the dot. Color the square you should move it to so that you can win.

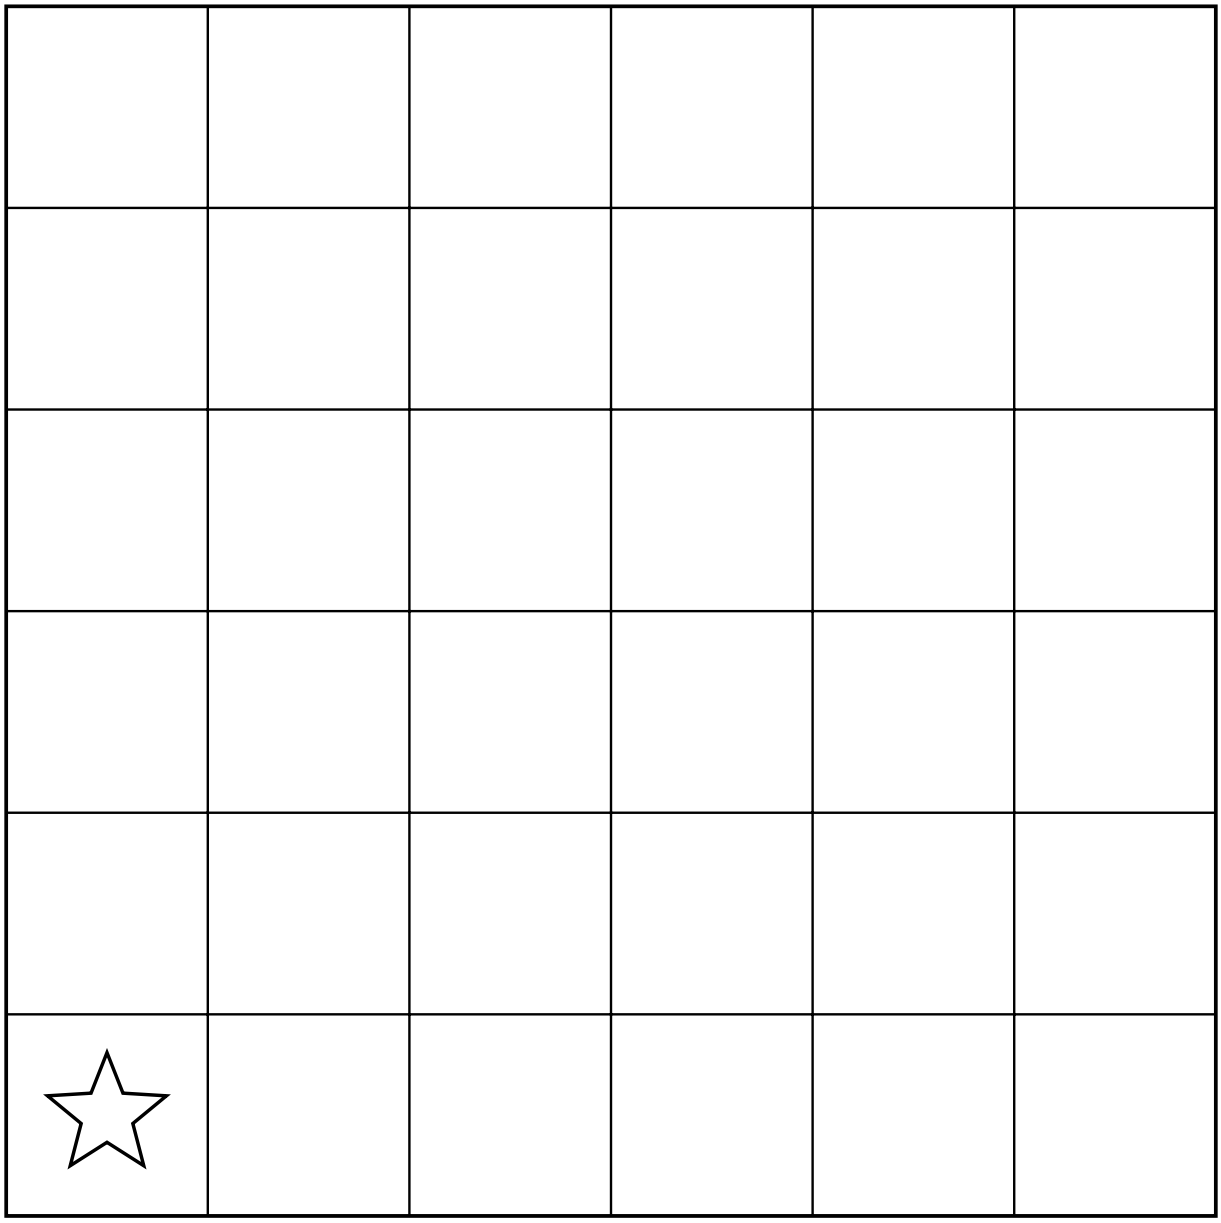




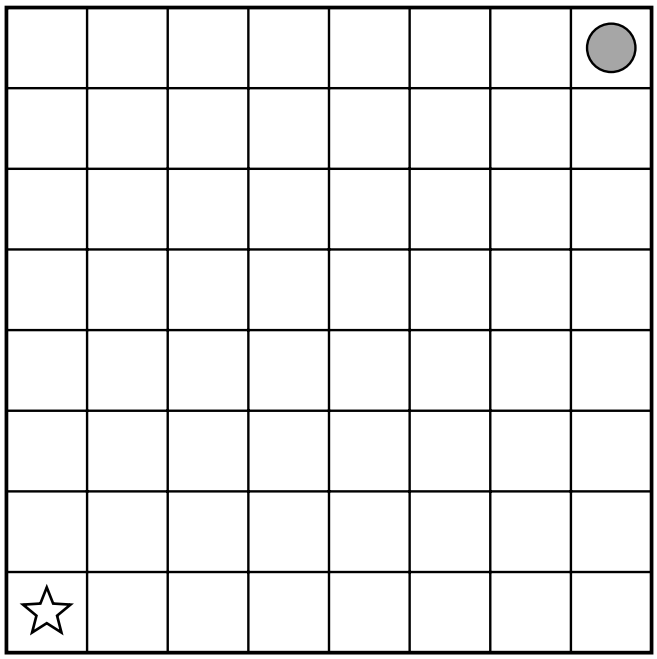


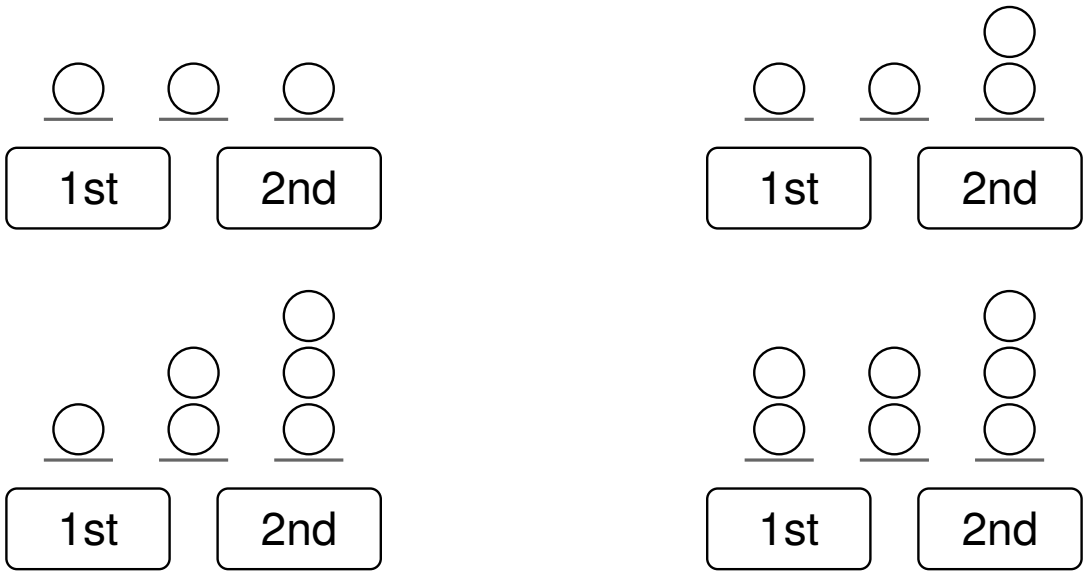


Problem 4: Play many games on this board, starting on any square except the star. Color every square you want to move the token to.



Problem 7: Play on the separate 8-by-8 board, with the token where the dot is. Your partner goes first. Show the adult how you can always win.





Problem 8: Make each set of three piles with counters and play many games. Circle if you would rather go first or second.
