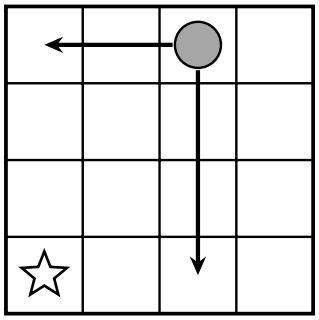
On your turn, slide the token straight left or straight down, toward the star's side, one or more squares. Whoever moves the token onto the star wins.



Problem 1: Play many games from the dot on each board. Circle if you would rather go first or second.

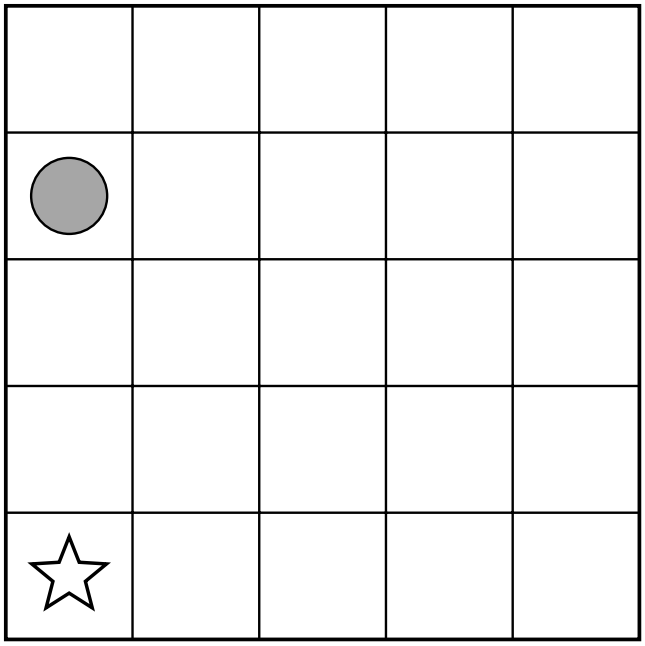
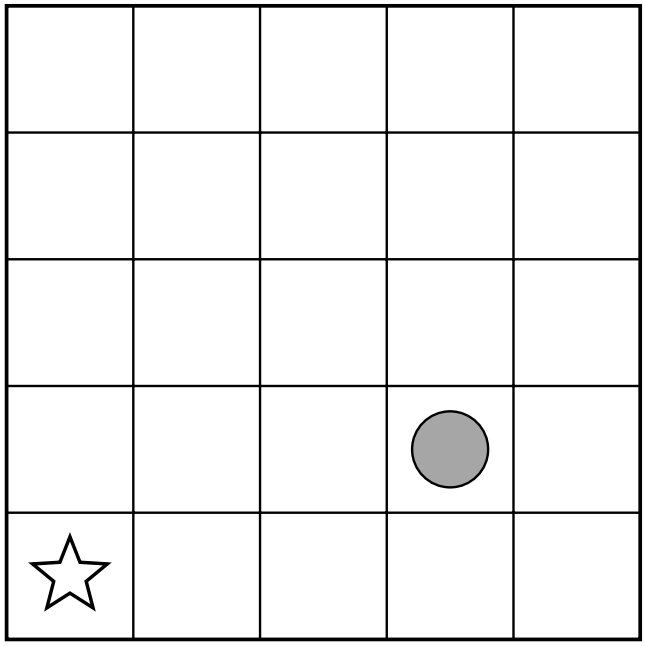
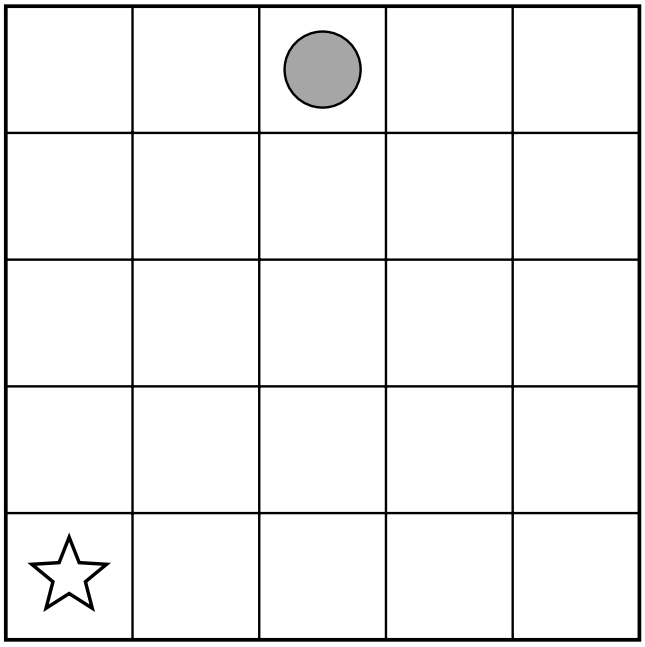
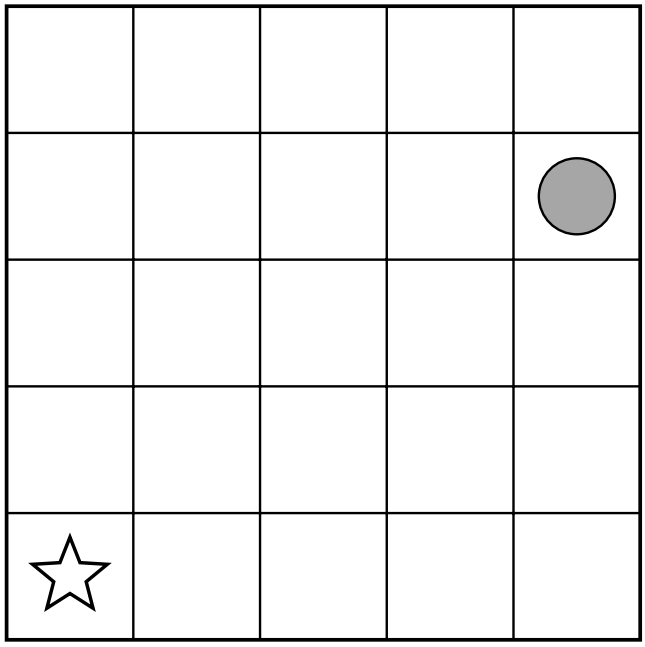
Problem 3: It is your turn, and the token is on the dot. Color the square you should move it to so that you can win.

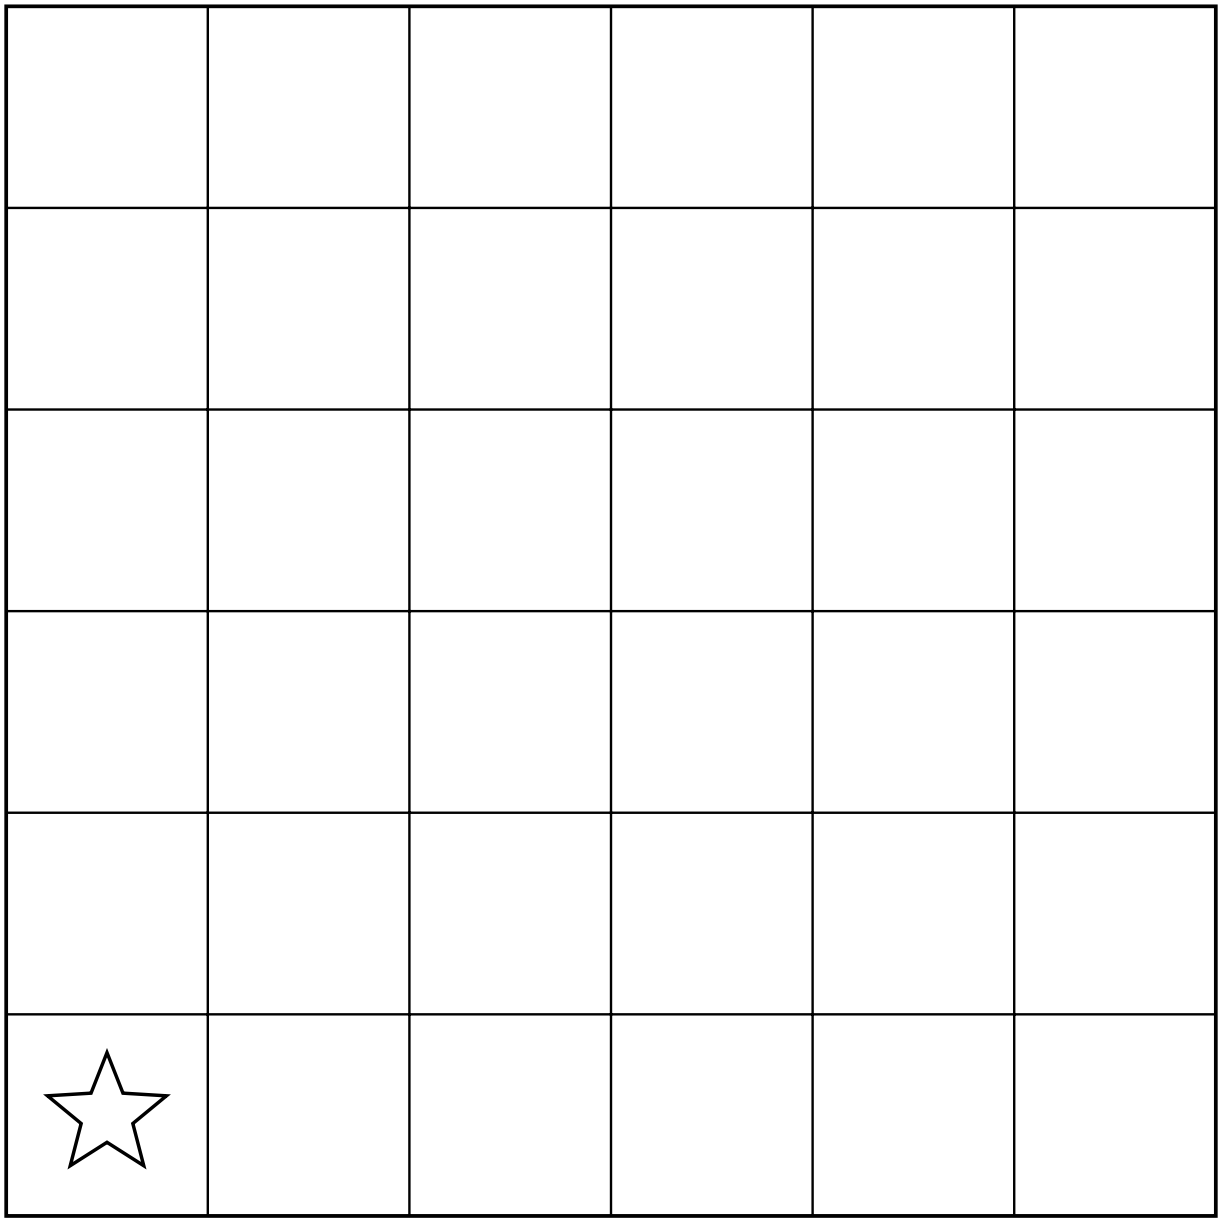




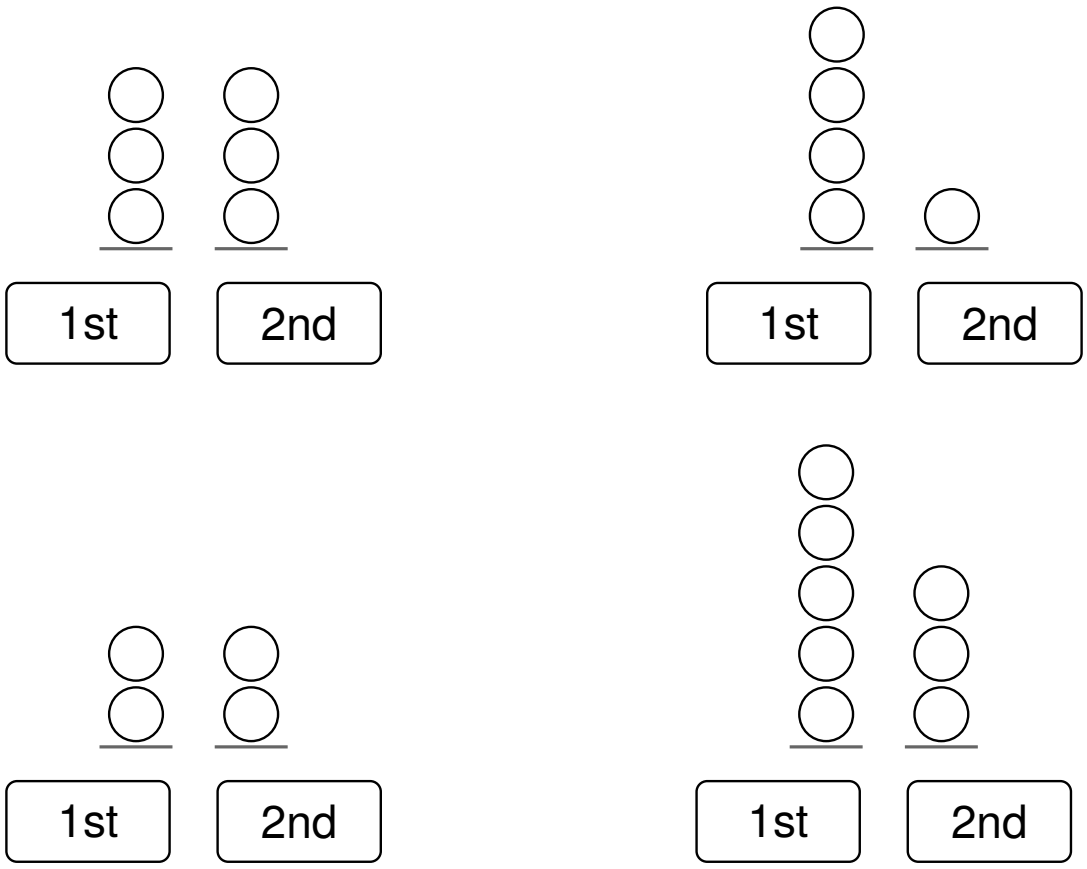




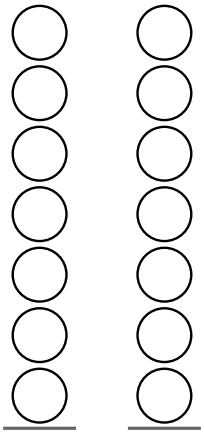
Problem 4: Play many games on this board, starting on any square except the star. Color every square you want to move the token to.



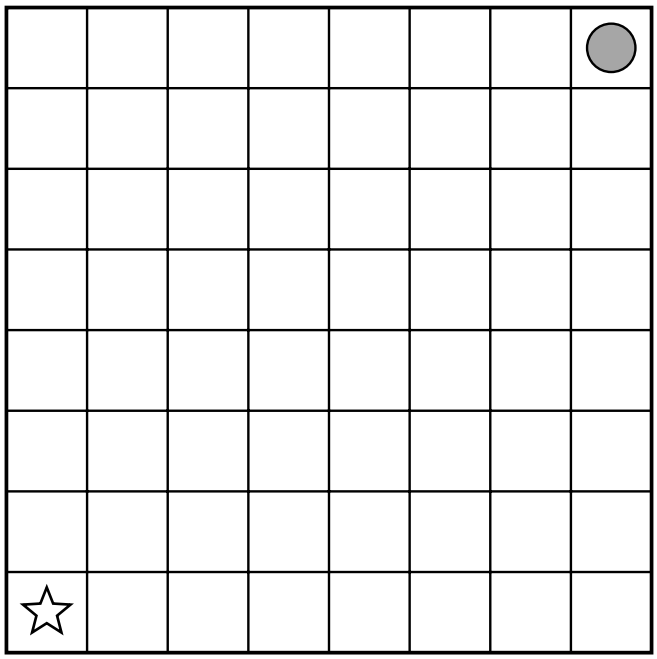
Problem 5: On your turn, take one or more counters from one pile, and whoever takes the last counter wins. Play with each pair of piles and circle if you would rather go first or second.

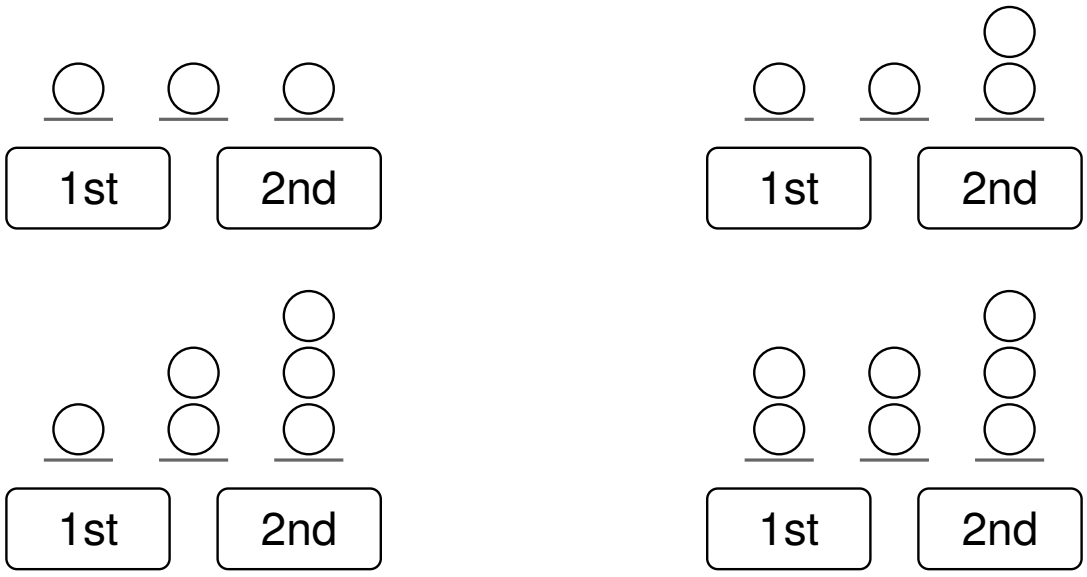


Problem 6: Your partner goes first with these two piles of 7. Show the adult how you can always win.



Problem 7: Play on the separate 8-by-8 board, with the token where the dot is. Your partner goes first. Show the adult how you can always win.





Problem 8: Make each set of three piles with counters and play many games. Circle if you would rather go first or second.
