To hop 2, move the counter 2 dots along the way the arrow points.

Problem 1: Put a counter on the black dot and hop it until it is back. Draw each hop on a small ring, and circle each hop that lands on every dot.

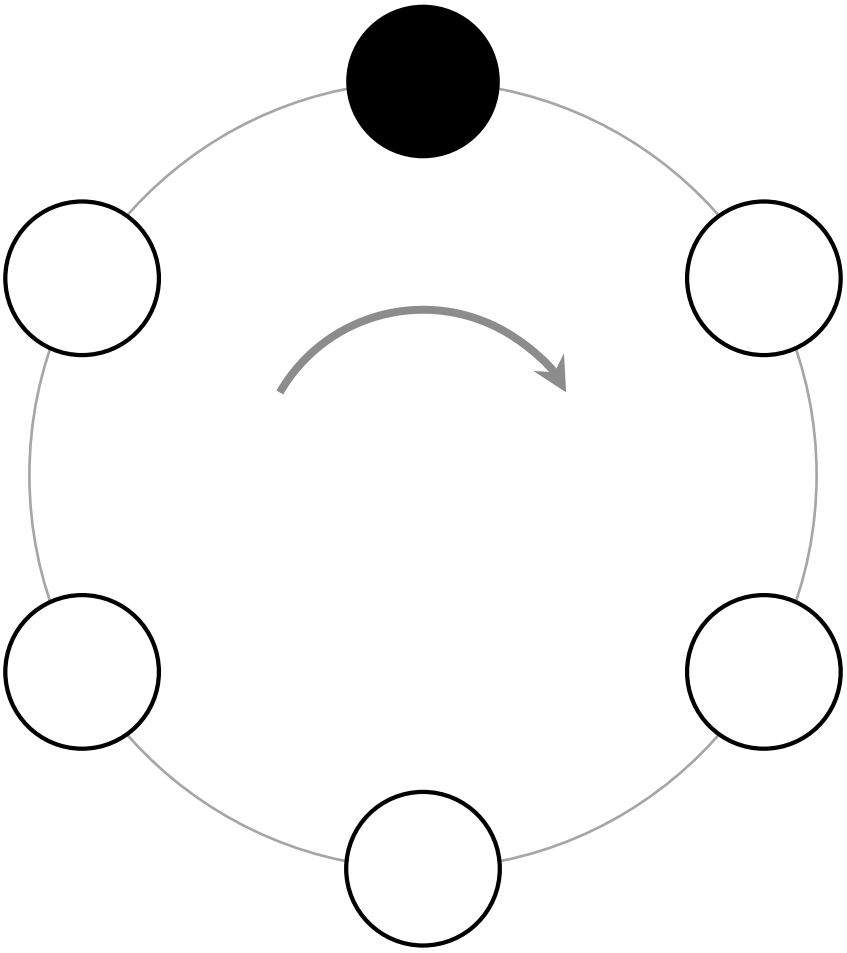

Problem 2: Do the same with this ring of 5 dots.

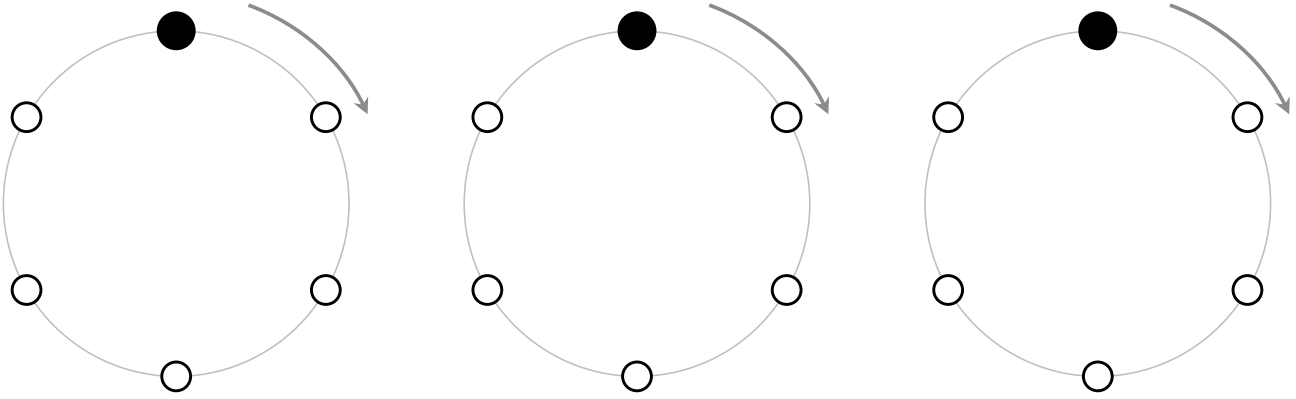

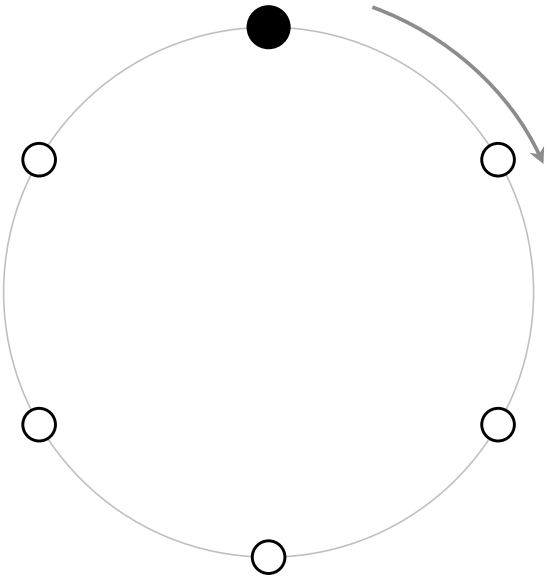

hop 1 hop 2 hop 3

Problem 3: Do the same with this ring of 6 dots.

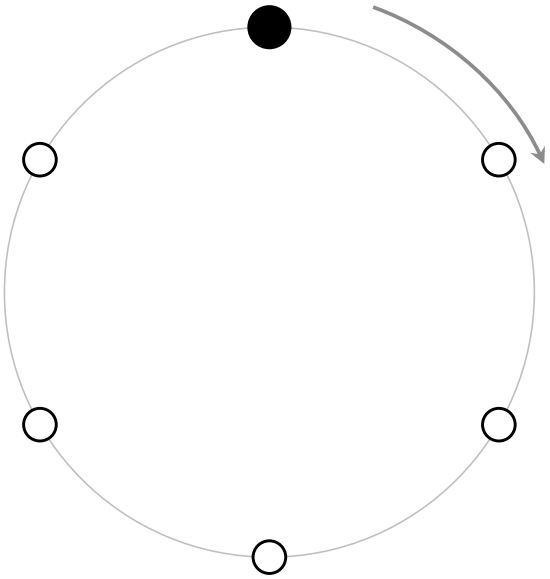

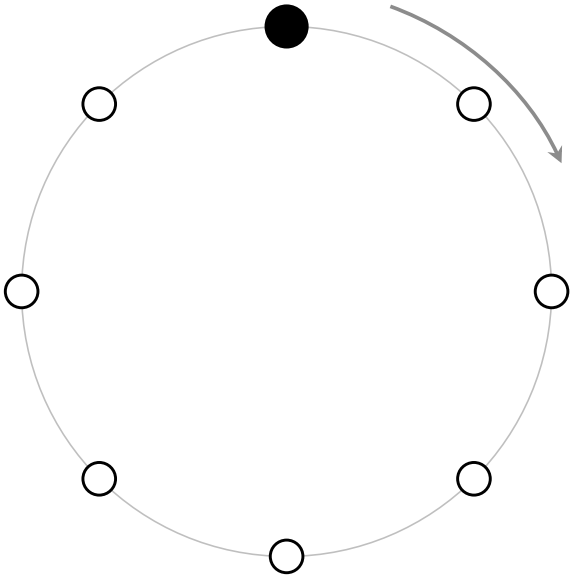

Problem 4: Draw the hops from the black dot until you are back. If a dot has no line, start again there with the same hop. Write in the box how many times you started.

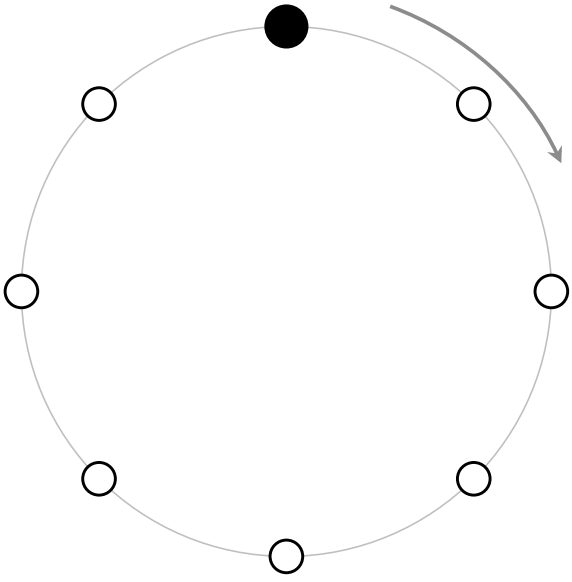

hop 2 ☐

hop 3 ☐

hop 2 ☐

hop 3 ☐
