Keep cords on the table. Move them without cutting or passing strands through each other. Use red (R), blue (B), and green (G).

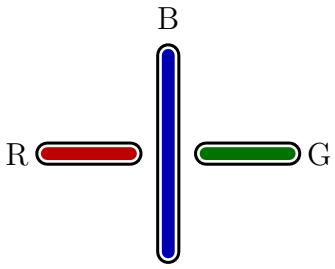

Follow X across the overpass to the next gap.

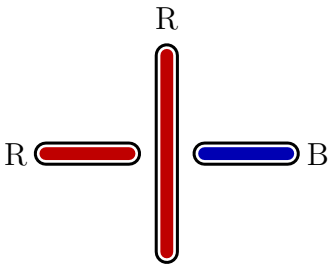

An arc runs between underpasses and continues through overpasses. A closed strand with no underpasses is one whole arc. Give each whole arc one color. At each crossing the colors must be all the same or all different.

valid

valid

invalid

Problem 6: Can the same colors at L and P give two different valid colorings of either whole picture? Explain using the crossing rule.
