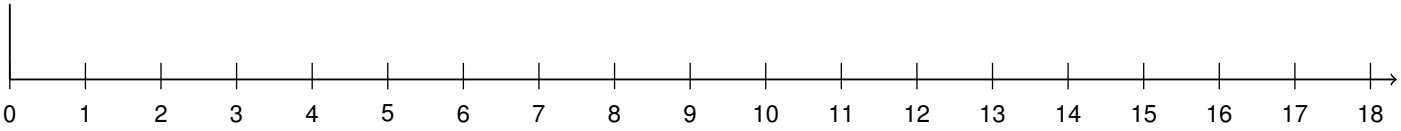
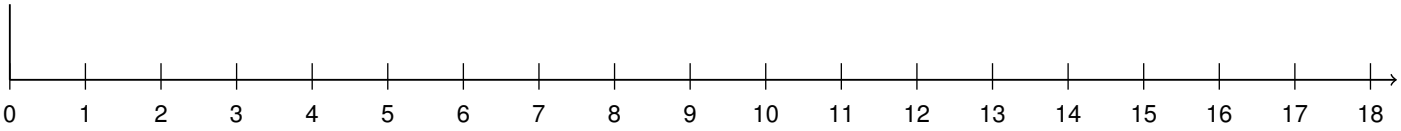
Problem 4: Use 3-rods and 4-rods to build every length from 6 through 18. Could you keep going forever?

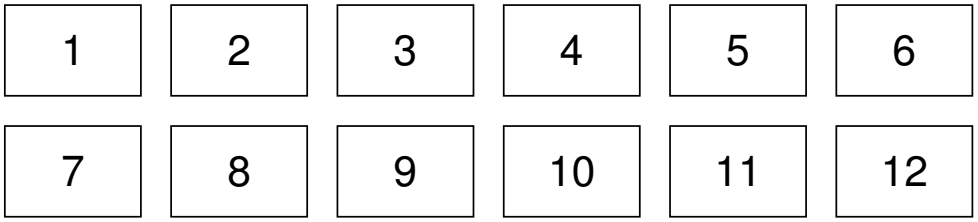
6	7	8	9	10	11	12
13	14	15	16	17	18	

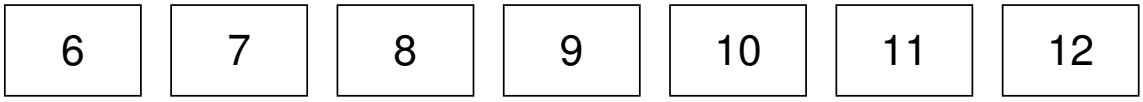
Mark a target on a ruler and build from 0 to the mark.

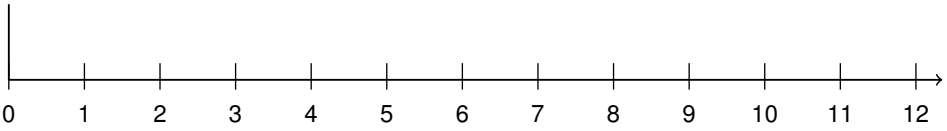




Problem 5: Use 2-rods and 4-rods to build lengths from 1 through 12. Show why some lengths cannot be built.







Problem 6: Choose two rod lengths from 2, 3, 4 and 5. Which pairs can build every target from 6 through 12?
