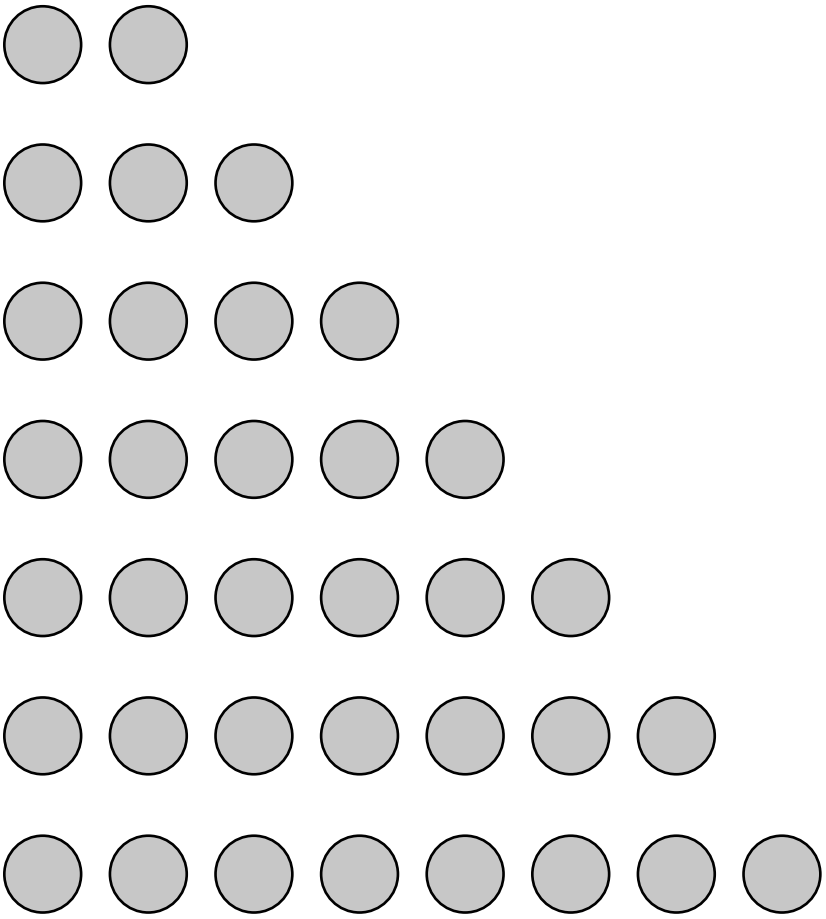
Two players take turns. On your turn, take 1 or 2 counters, or move the token 1 or 2 squares toward 0. Whoever takes the last counter, or puts the token on 0, wins.

Problem 1: Make each pile and play it many times with your partner. Circle whether you would rather go 1st or 2nd.



1st 2nd

Problem 2: With your partner, play the grown-up from 10. The grown-up goes first, and you colour the grown-up's squares.

0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

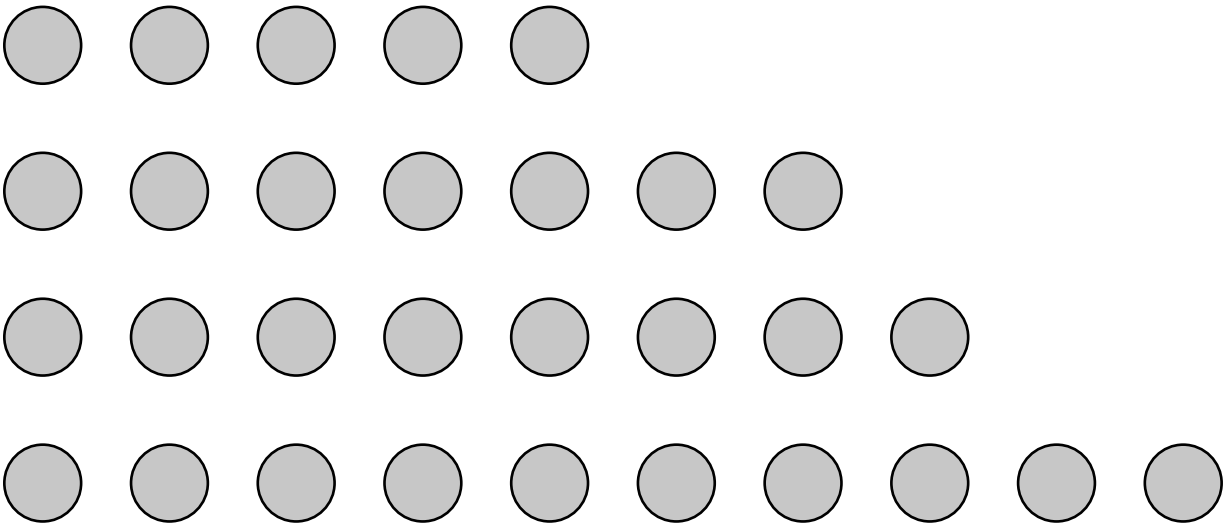
Problem 3: Now you go first from 10 against your partner. Colour your own squares.

0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

Problem 4: You go first against your partner with each pile. Circle the counters you take first so that you can win.



Problem 5: Your partner puts the token on a square from 1 to 10. Circle it, and circle 1st or 2nd so that you can win.

0	1	2	3	4	5	6	7	8	9	10
