Two players take turns. On your turn, take 1 or 2 counters, or move the token 1 or 2 squares toward 0. Whoever takes the last counter, or puts the token on 0, wins.

Problem 6: Now move the token 1, 2 or 3 squares, starting on 10. Colour the first player's squares.

Play the grown-up, who goes first.

0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

Play your partner, and you go first.

0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

Problem 7: Now move the token 1 or 4 squares, starting on 8. Colour the first player's squares.

Play the grown-up, who goes first.

0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

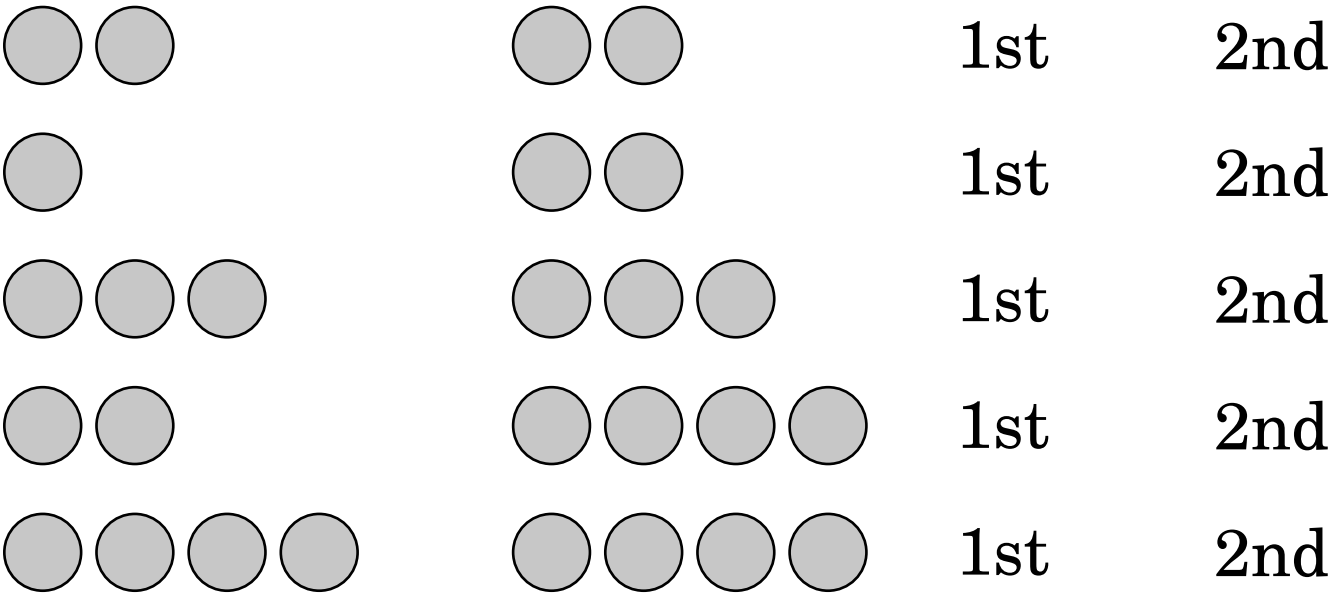
Play your partner, and you go first.

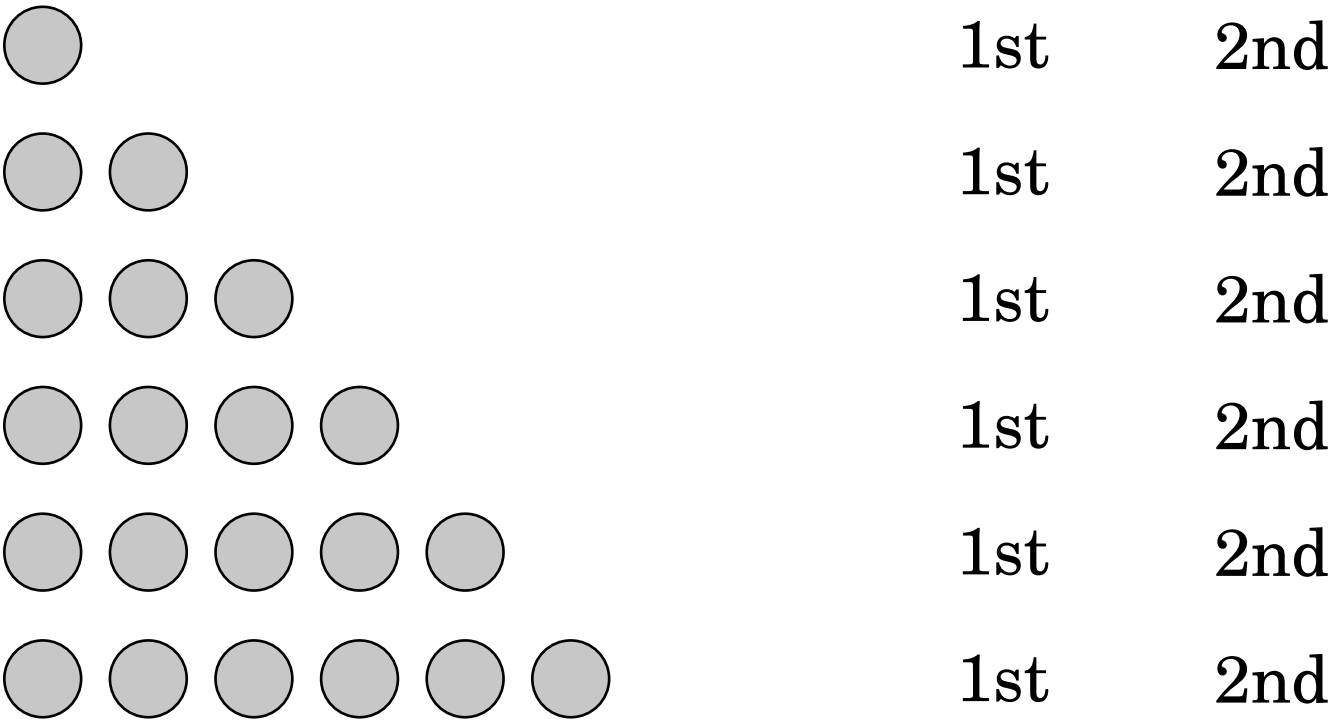
0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

0	1	2	3	4	5	6	7	8	9	10

Problem 8: Now make two piles, and take 1 or 2 counters from one pile. Whoever takes the last counter on the table wins.





Problem 9: Now whoever takes the last counter loses. Play each pile many times with your partner.
