Put one R, B, or Y counter on every dot. Keep the corner letters. Each outside side allows only the letters beside it. A little triangle has no lines inside.

Problem 1: Fill the dots with counters. Move the counters to put a little triangle with R, B, and Y in each of the four places, one at a time.

Problem 2: Can you fill the dots without making a little triangle with R, B, and Y?

Problem 3: Fill the dots to make as many little triangles with R, B, and Y as you can.
