Use the four loose strips and the uncut row of squares. Each square is one unit. Lay strips along the ruler with both ends at printed marks.

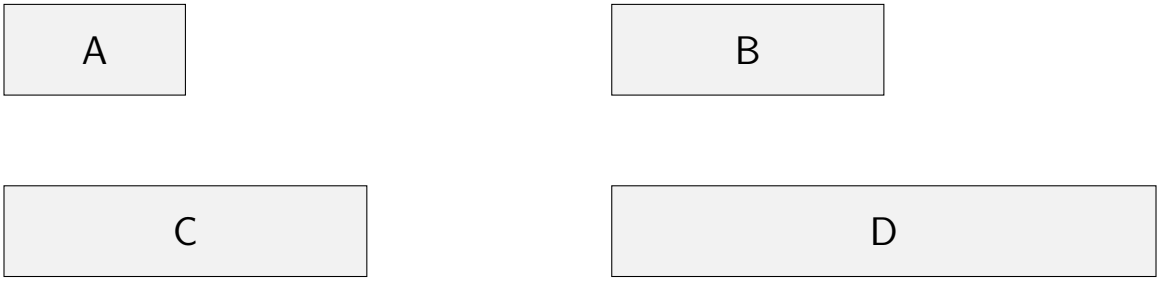

Problem 1: How many units long is each strip? Put each strip in different places on the ruler.

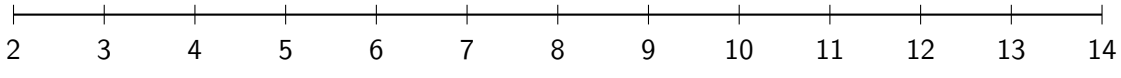

A: _____ B: _____ C: _____ D: _____

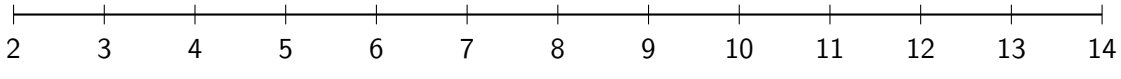

Problem 2: Find every place each strip can go with one end at 7. Draw its two ends on a ruler.

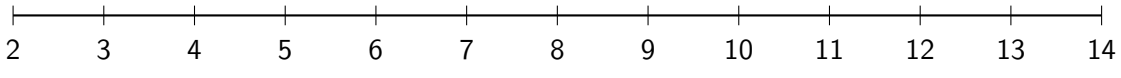

A

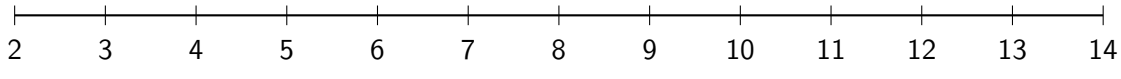

B

C

D

Problem 3: Which two strips can you put end to end and cover exactly with a third strip? Find every way.
