Join printed corners with straight lines. Lines inside a shape may meet at corners but may not cross. Fill the whole shape with triangles. Keep the corner numbers fixed. Use tracing paper to change printed lines.

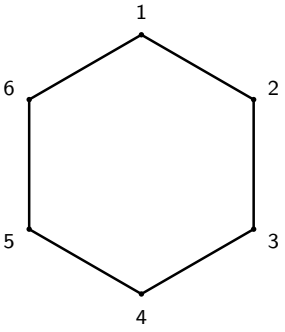

Problem 1: Fill each shape with triangles in two different ways.

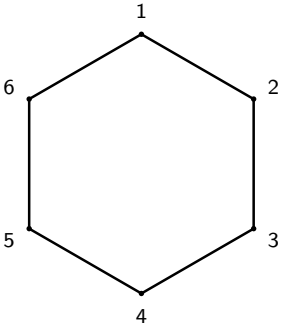

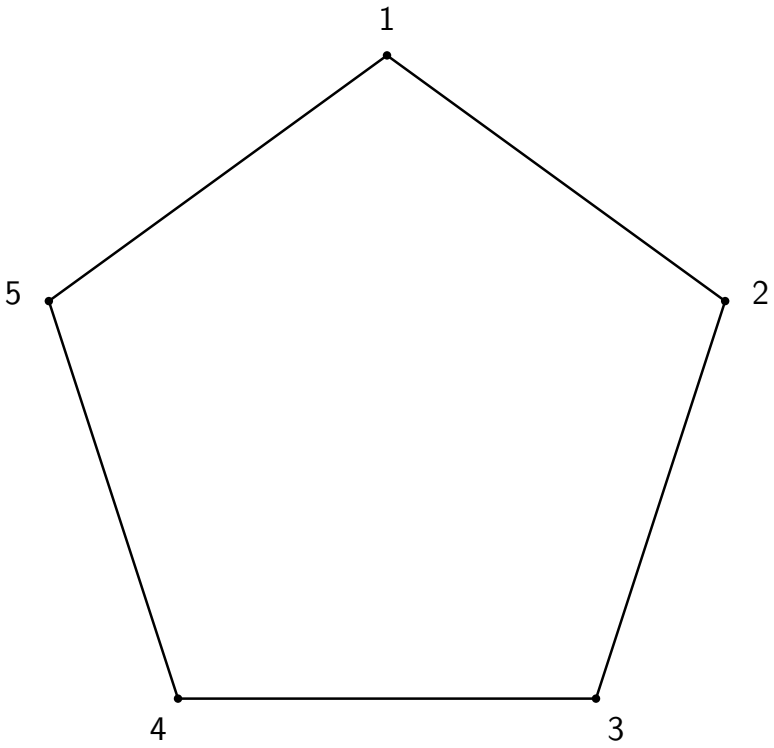

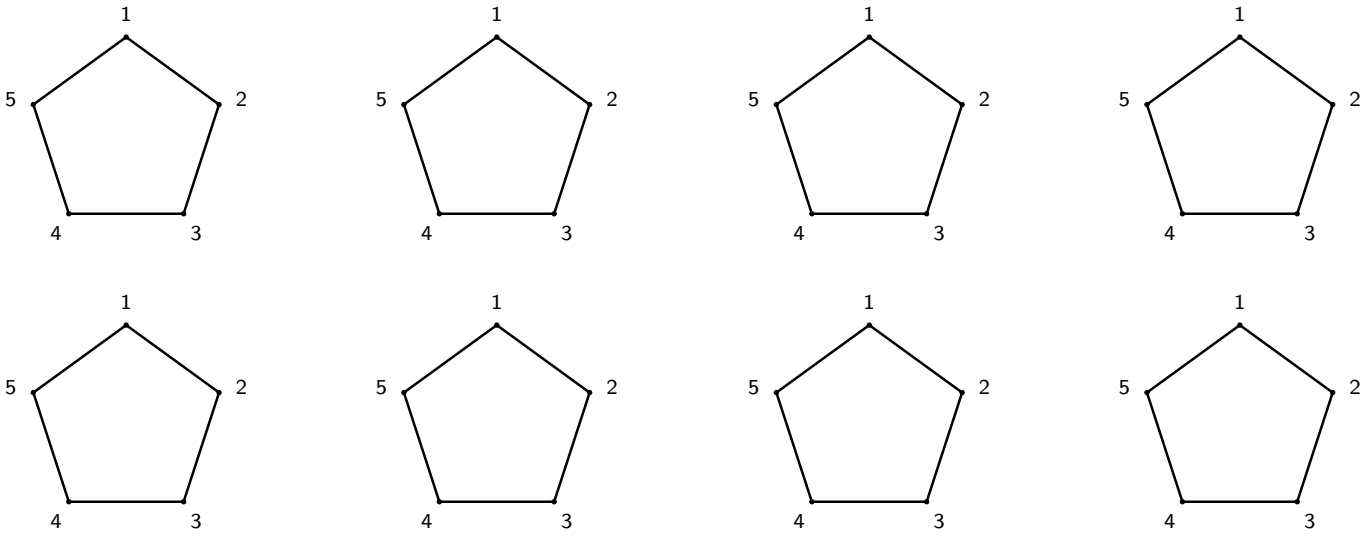

Problem 2: Find every way to fill this five-corner shape with triangles.

Problem 3: Can you fill this shape with 3 triangles, or with 4 triangles? Explain why any impossible case cannot work.
