Put each letter in one of two groups, with at least one letter in each group. Draw each group's stretched-band region and lightly shade its inside.

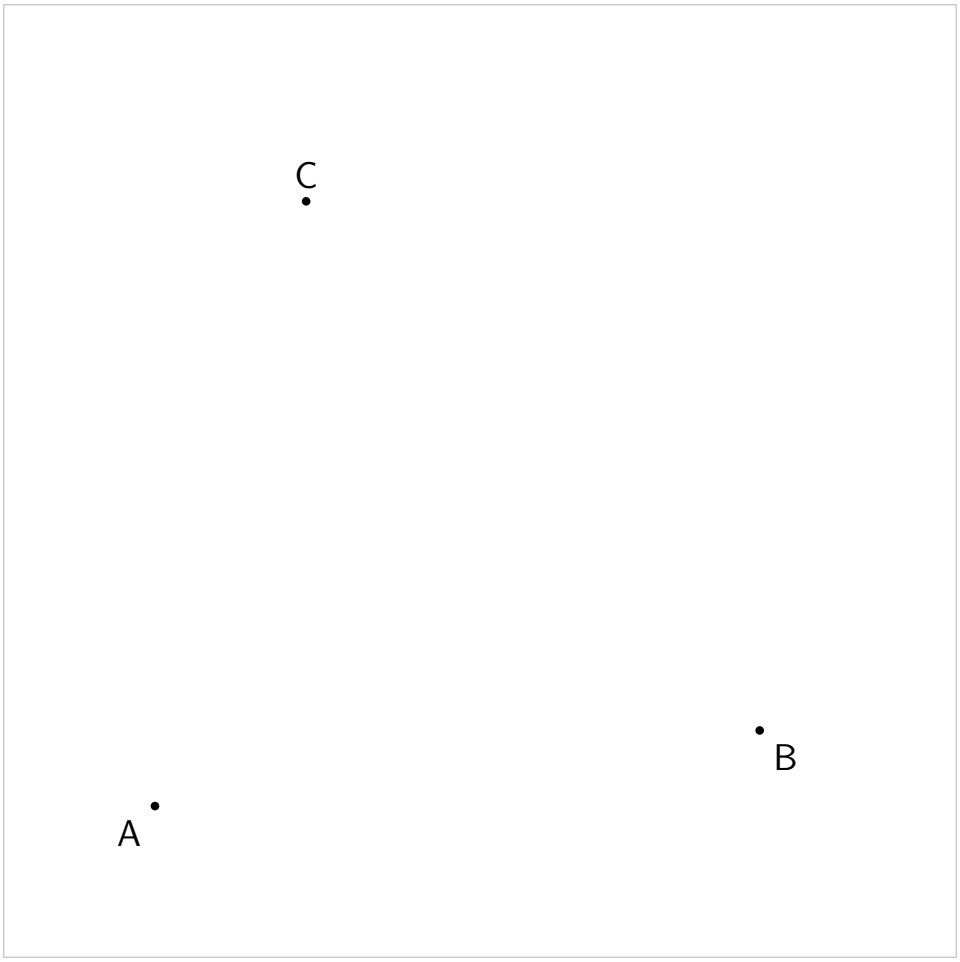

Problem 1: In each picture, make two groups whose regions meet. Draw both regions and mark a point they share.

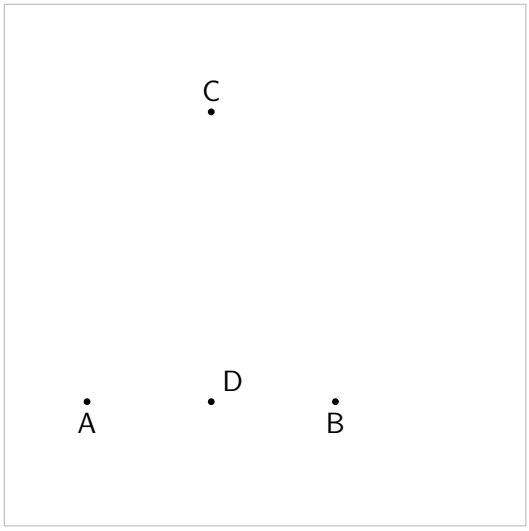

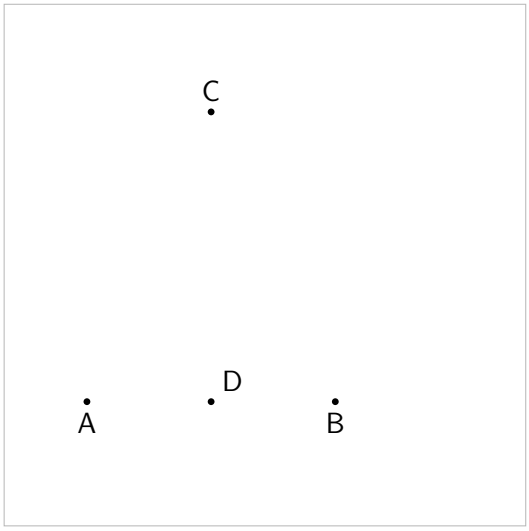

Problem 2: Keep A, B, and C fixed, and take turns placing D. Can the other player always make two regions that meet?

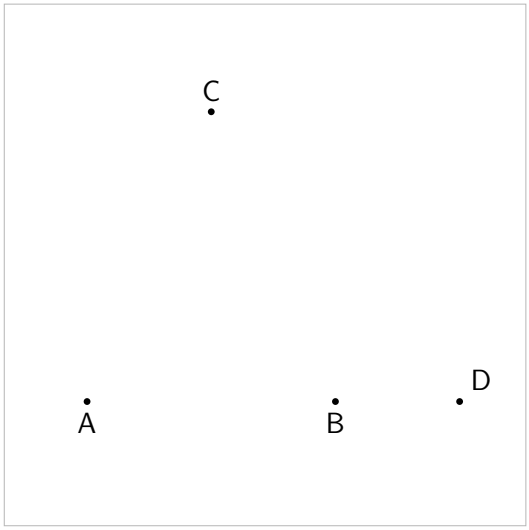

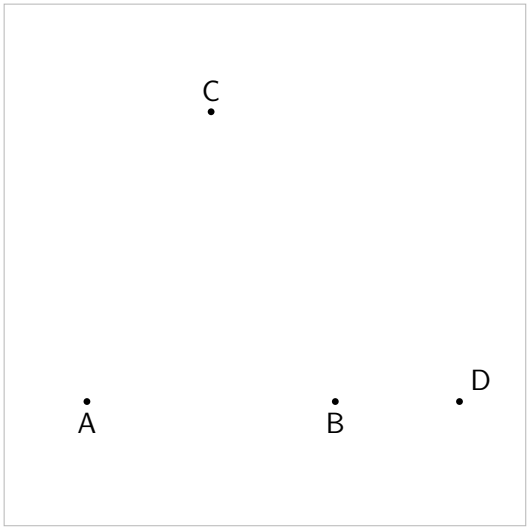

Problem 3: Take turns placing A, B, C, and D in the box. Can the other player always make two regions that meet?

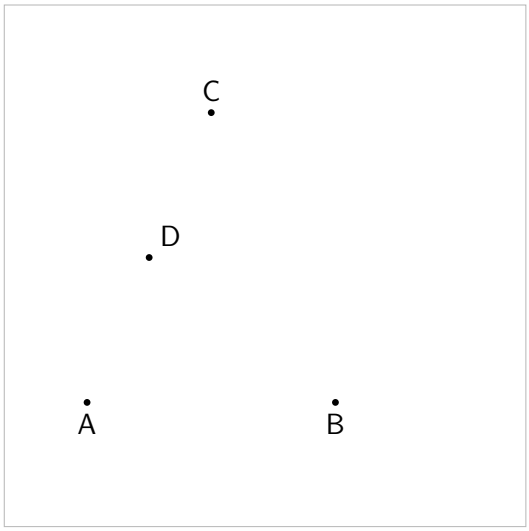

Problem 4: For each place of D, find two different ways to make two groups whose regions meet. Draw them.

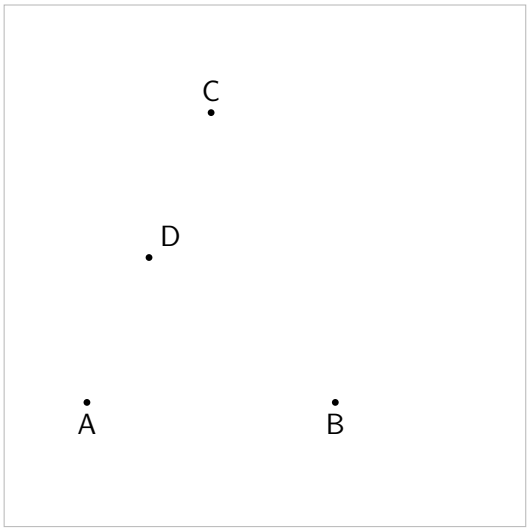

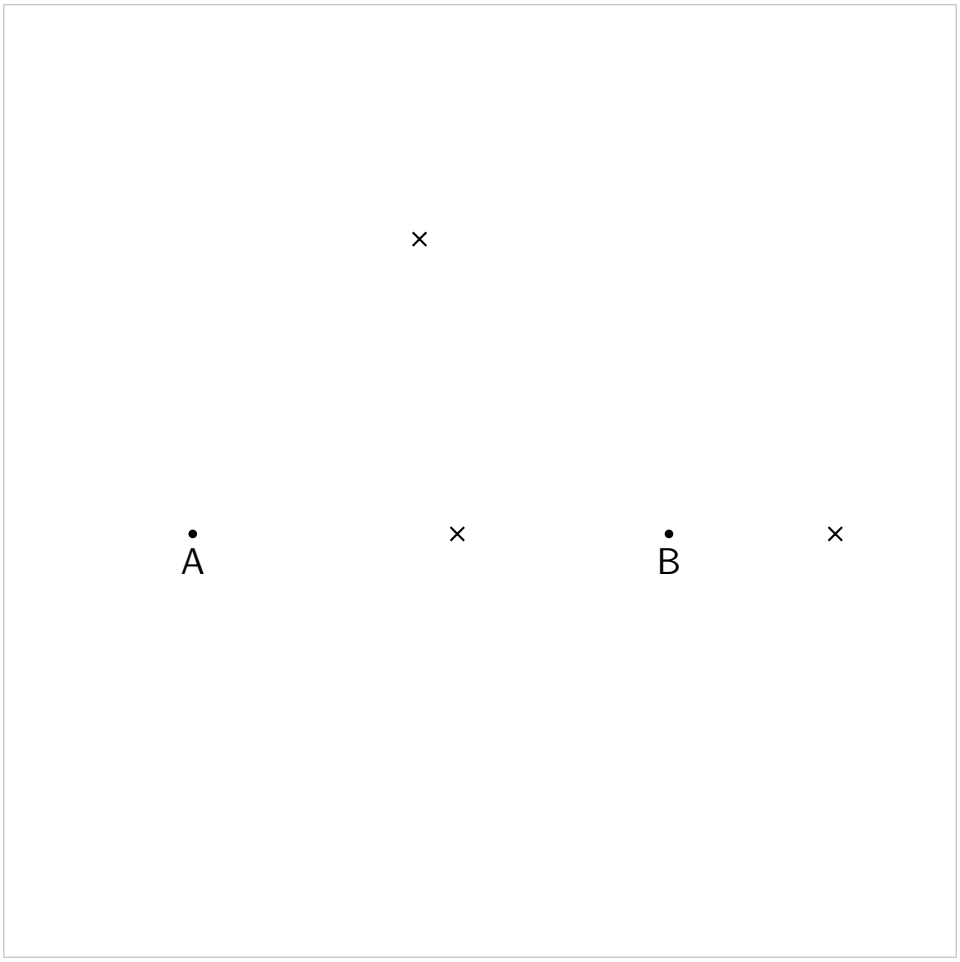

Problem 5: Put C on each cross in turn. Circle each cross where A, B, and C can make two groups whose regions meet.

Problem 6: Find two different ways to make two groups whose regions meet. Draw one group just above the dots and the other group just below.
