One arrow moves to the center of the next small square. Right meets left at the same height; top meets bottom at the same place across. Keep moving in the arrow direction. Repeated copies continue beyond the page.

Problem 1: Start at H for each trip. Predict where it ends, then try it with your pawn.

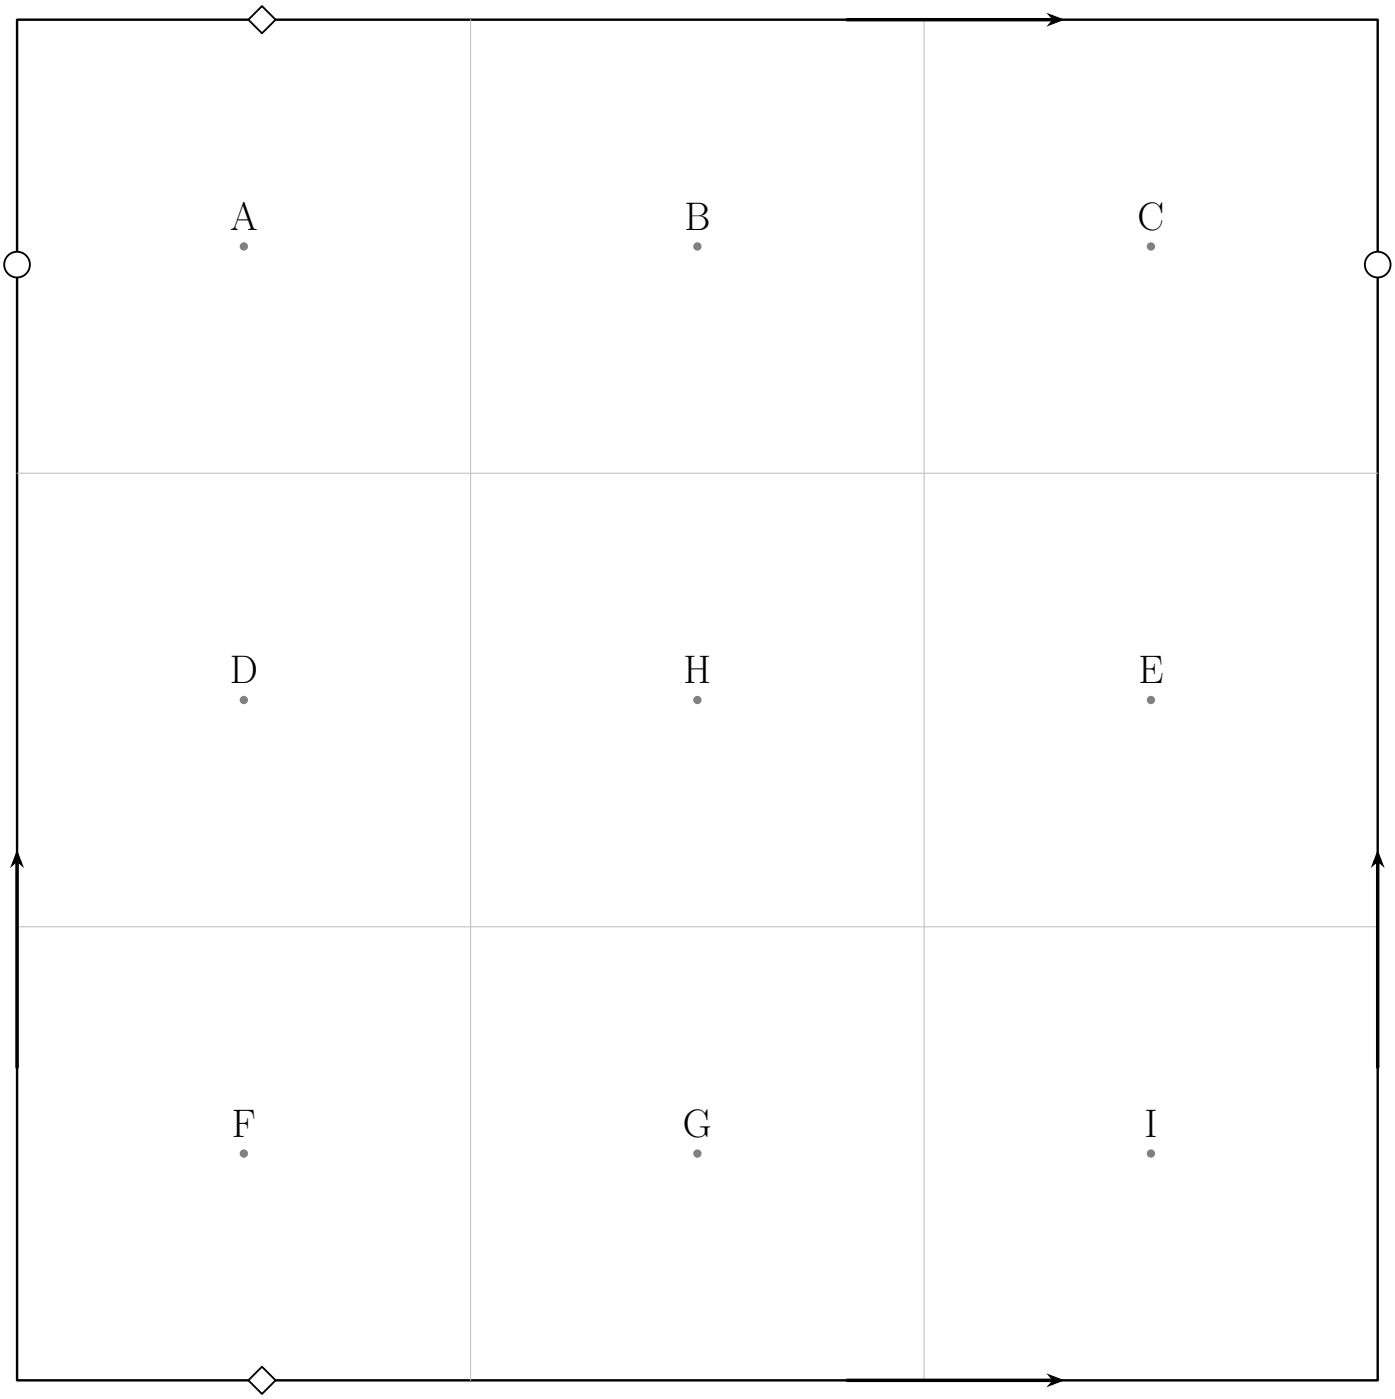

$\rightarrow \rightarrow \downarrow$ _____

$\uparrow \uparrow$ _____

$\leftarrow \downarrow$ _____

$\uparrow \uparrow \rightarrow \rightarrow$ _____

Problem 2: Make four different trips from H back to H. Choose trips whose replays finish in different copies of H on the repeated map.

Problem 3: The original copy is (0,0). A full copy is three small-cell steps wide. One copy right adds 1 to the first number; one copy up adds 1 to the second. Find the finishing copy for each trip from H.

$\rightarrow \rightarrow \rightarrow \uparrow \uparrow \uparrow$

$\rightarrow \rightarrow \leftarrow \leftarrow$

$\uparrow \uparrow \uparrow \rightarrow \rightarrow \rightarrow$

$\rightarrow \rightarrow \rightarrow \uparrow \uparrow \uparrow \leftarrow \leftarrow \leftarrow \downarrow \downarrow \downarrow$
