Week 26 / Same area, different boundaries / Problem menu

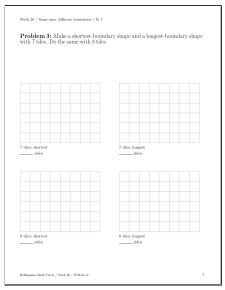

for adults: pick, then print

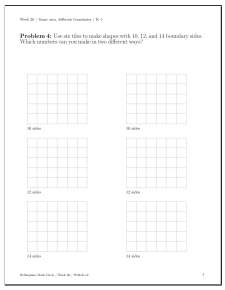

Every four-tile shape and its boundary
K–1 P1
first route

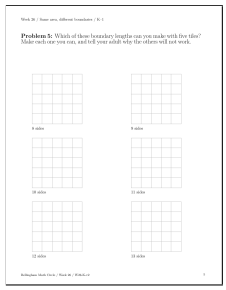

Shortest and longest with 5 and 6 tiles
K–1 P2
first route

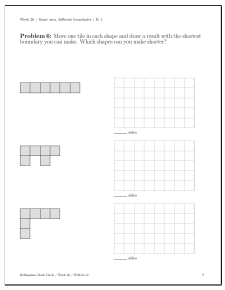

Shortest and longest with 7 and 8 tiles
K–1 P3
first route

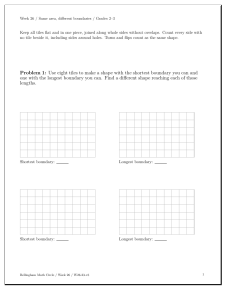

Six tiles with 10, 12 and 14 boundary sides
K–1 P4
return route

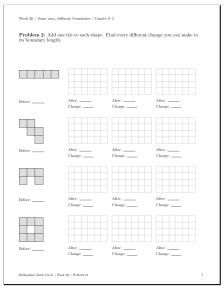

Which boundaries five tiles can make
K–1 P5
return route

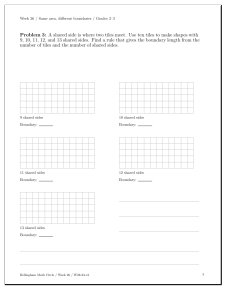

Move one tile to shorten the boundary
K–1 P6
return route

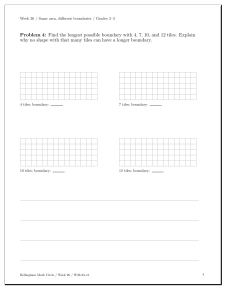

Shortest and longest eight-tile shapes, two of each
Grades 2–3 P1
first route

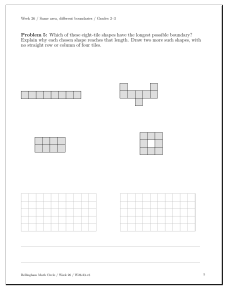

Every boundary change from adding one tile
Grades 2–3 P2
first route

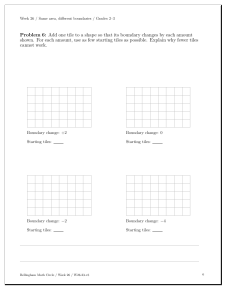

Shared sides and a rule for the boundary
Grades 2–3 P3
first/return route

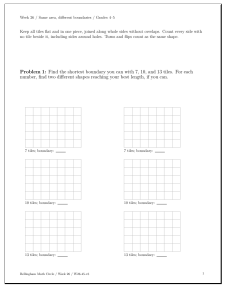

Longest boundary with 4, 7, 10 and 12 tiles
Grades 2–3 P4
first route

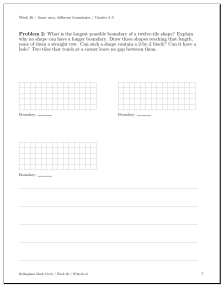

Which eight-tile shapes have the longest boundary?
Grades 2–3 P5
return route

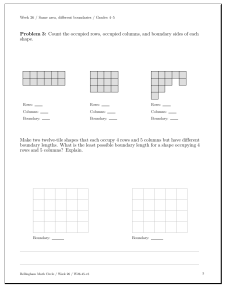

Fewest starting tiles for each boundary change
Grades 2–3 P6
return route

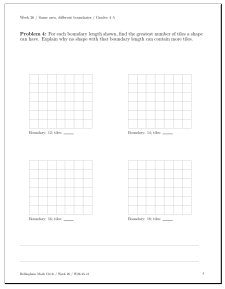

Shortest boundary with 7, 10 and 13 tiles, two ways
Grades 4–5 P1
first route

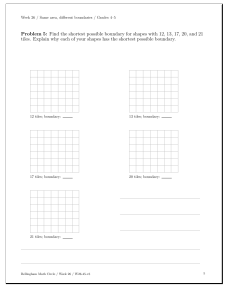

Longest twelve-tile boundary: blocks and holes
Grades 4–5 P2
return route

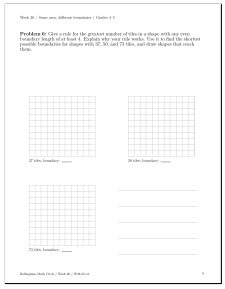

Rows, columns and boundary
Grades 4–5 P3
first/return route

Most tiles inside a given boundary
Grades 4–5 P4
first/return route

Shortest boundary for 12, 13, 17, 20 and 21 tiles
Grades 4–5 P5
first/return route

A rule for the greatest area, and 37, 50 and 73 tiles
Grades 4–5 P6
return route
