Put a counter on every spot. Start at 1 and go round and round the circle saying stand, sit, stand, sit. Flip over each counter that sits. Skip counters that are already flipped. When you get back to 1, keep going without starting over. When only one counter is standing, draw a ring around its number.

Problem 1: Play each circle.

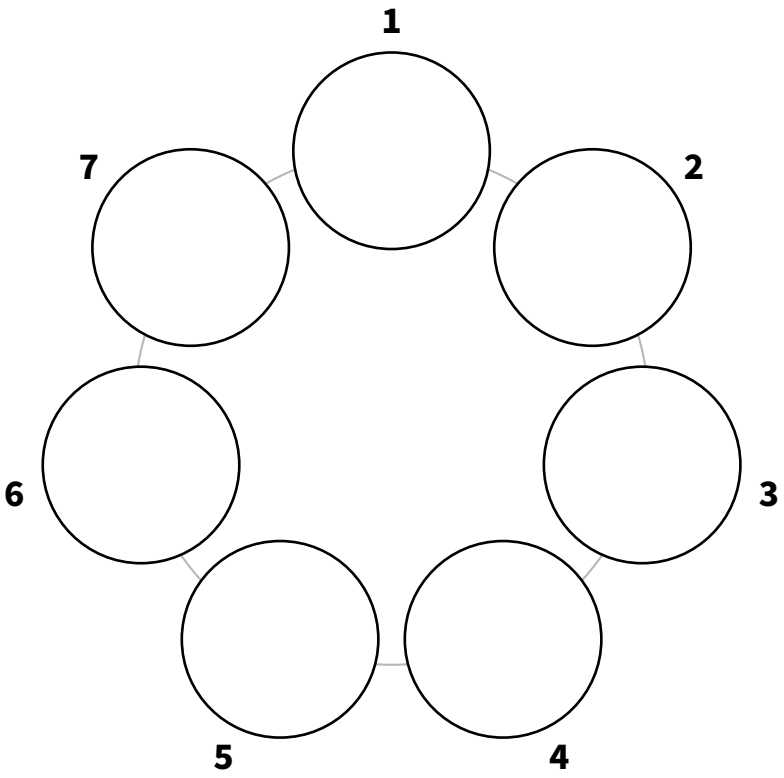

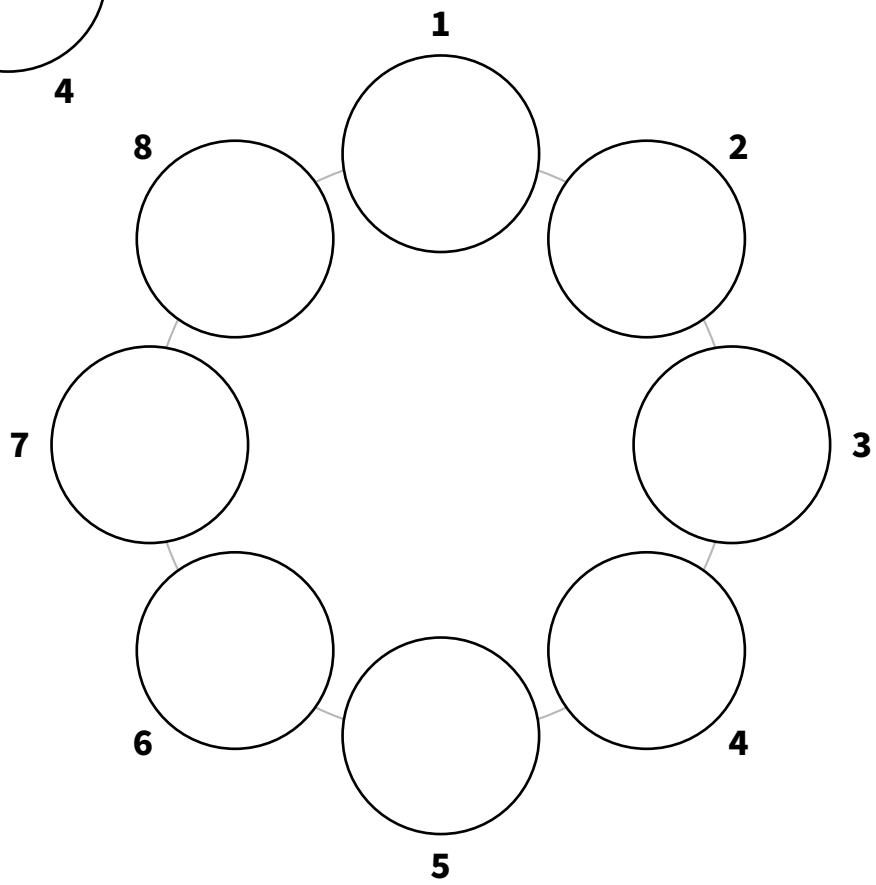

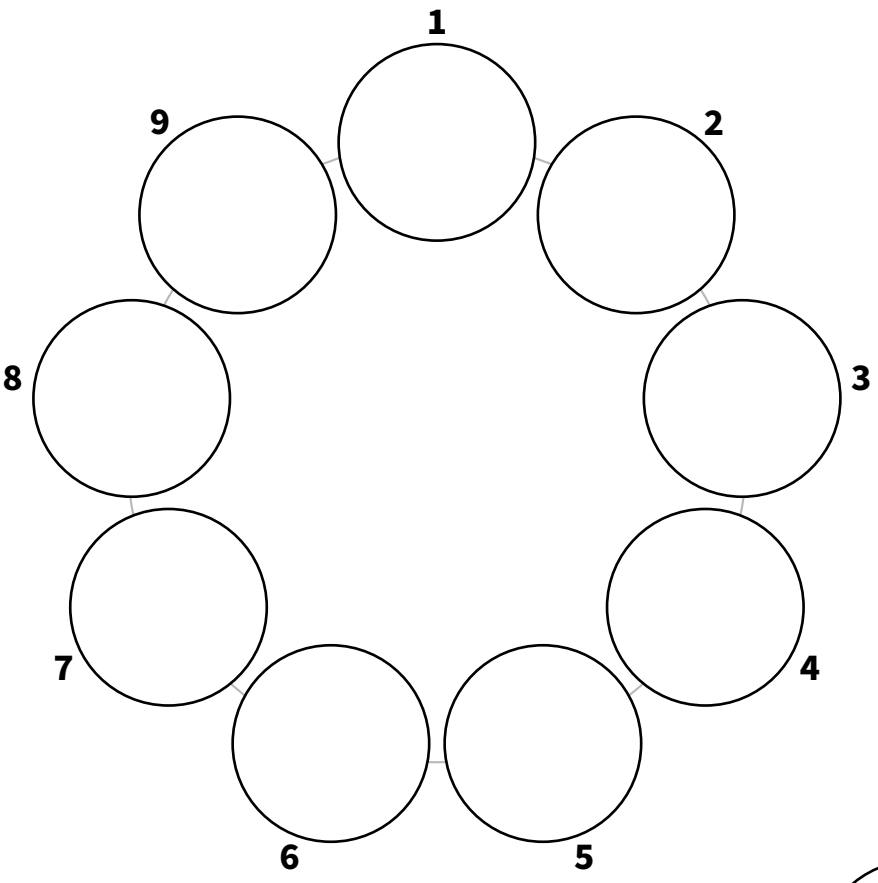

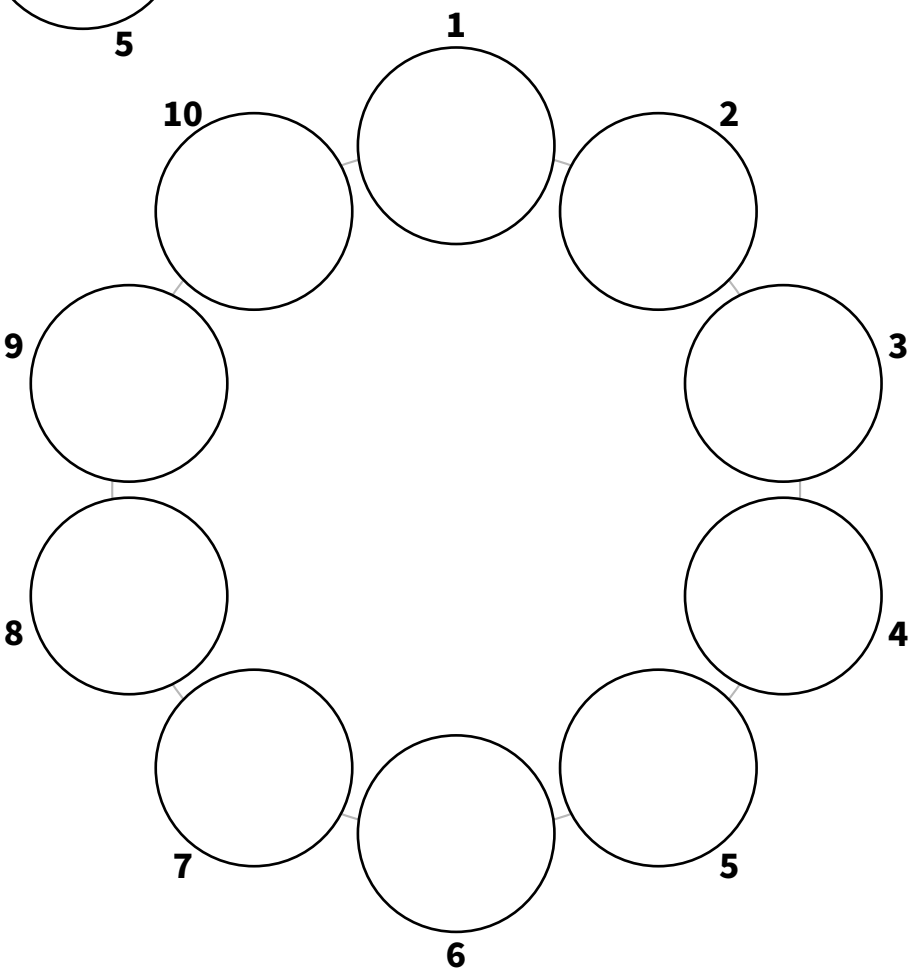

Problem 2: Before you play each circle, guess who will be last.

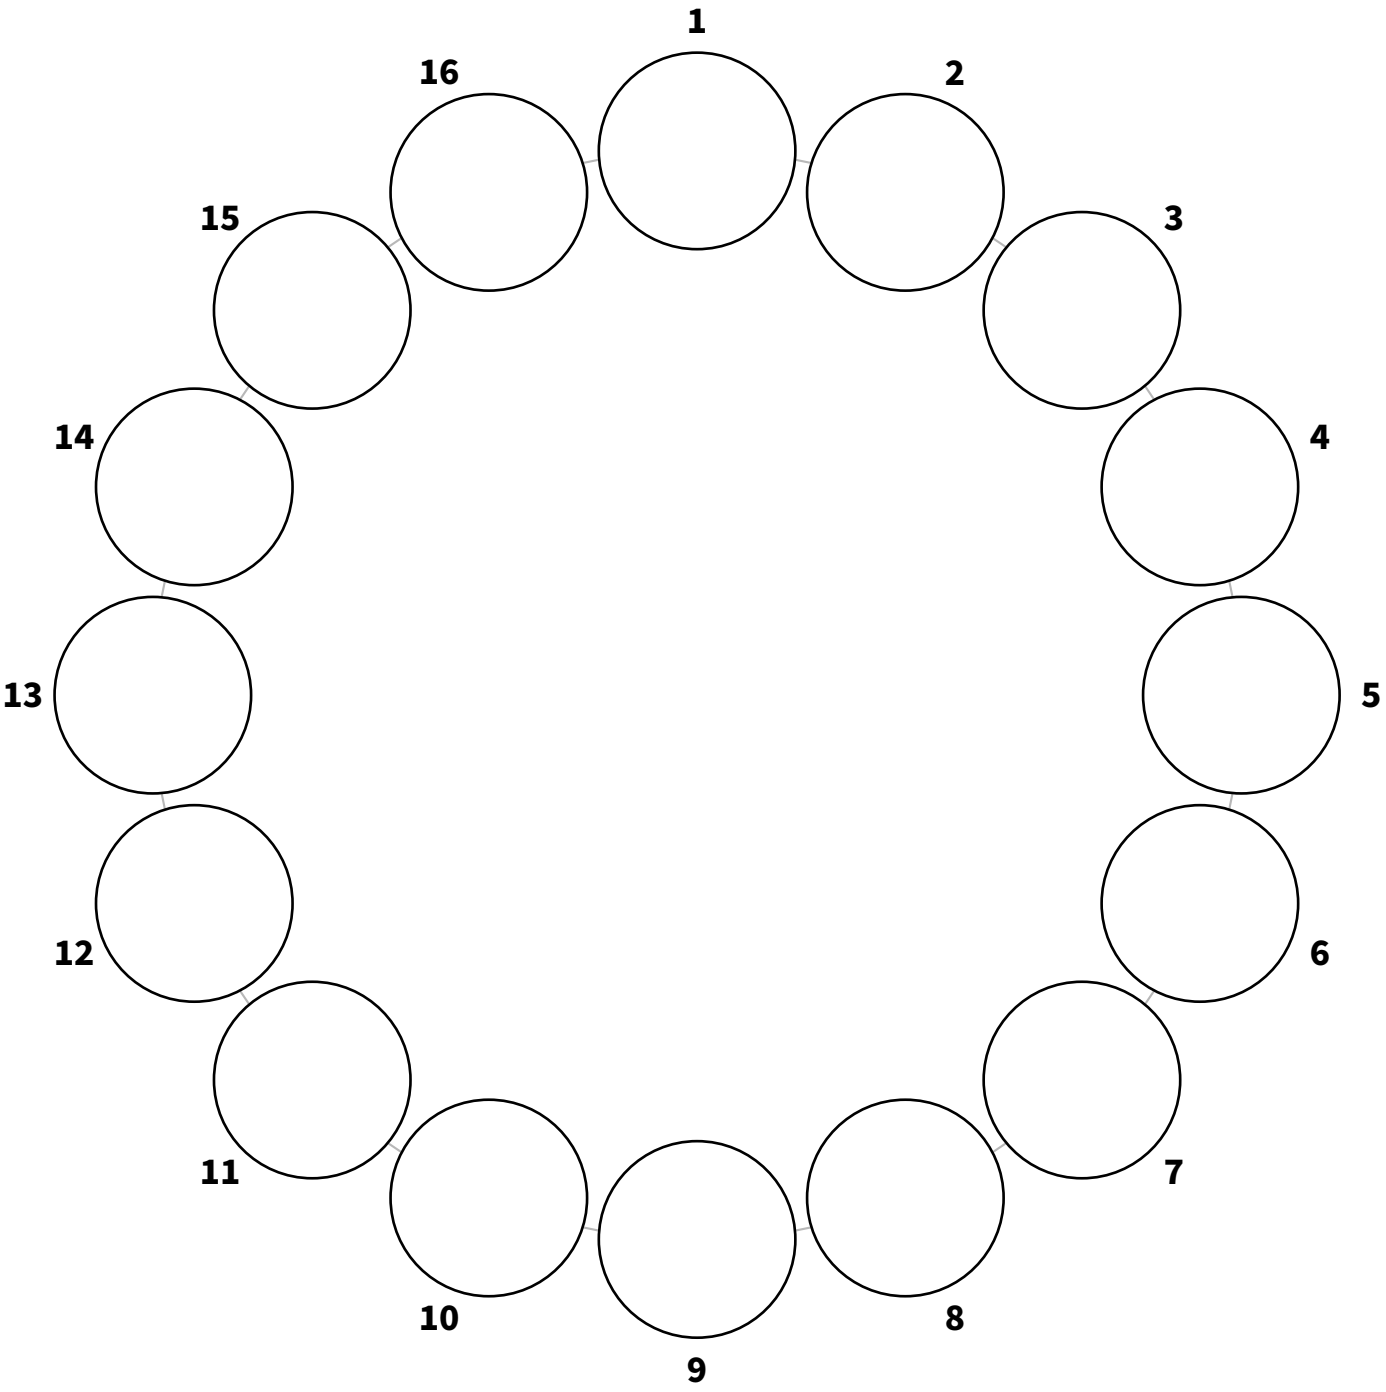

More circles for Problem 2.

Problem 3: Put a star by every circle where number 1 was last. Then guess who will be last in this circle of 16 before you play it.

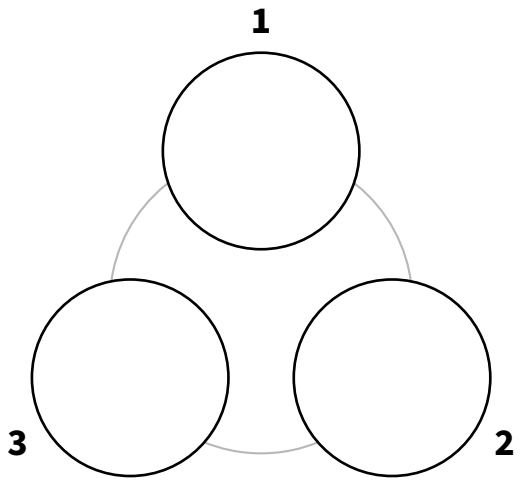

Problem 4: Which circles left number 3 standing? Which circles left number 5 standing?

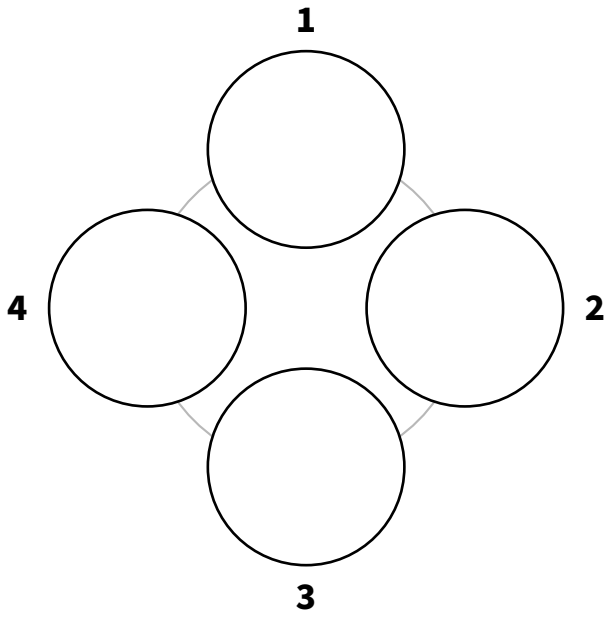

3

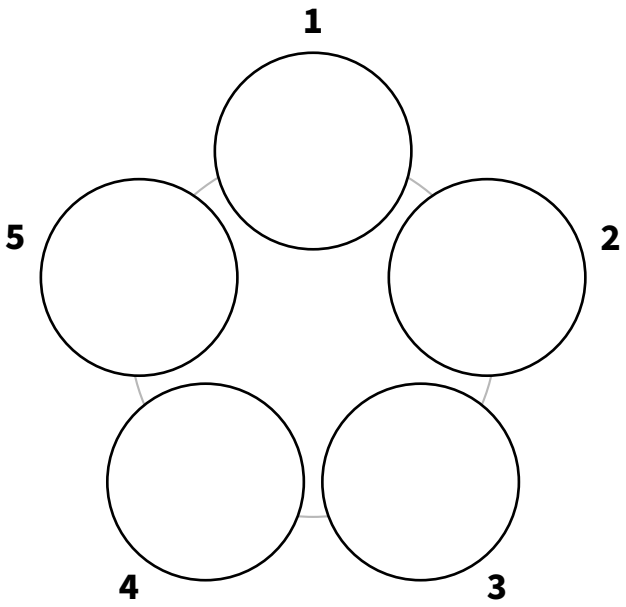

5

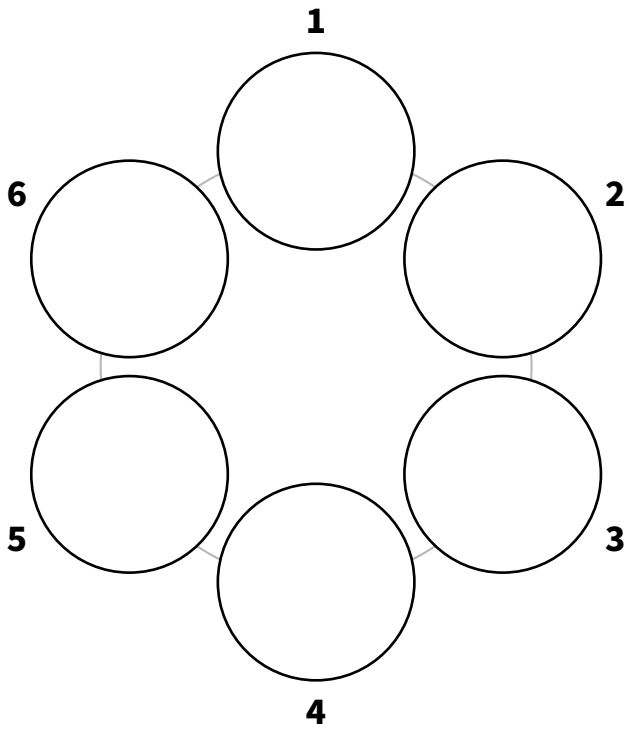

Problem 5: Can number 2 ever be the last one standing? Explain.

Problem 6: Now go round saying stand, stand, sit. Play each circle.

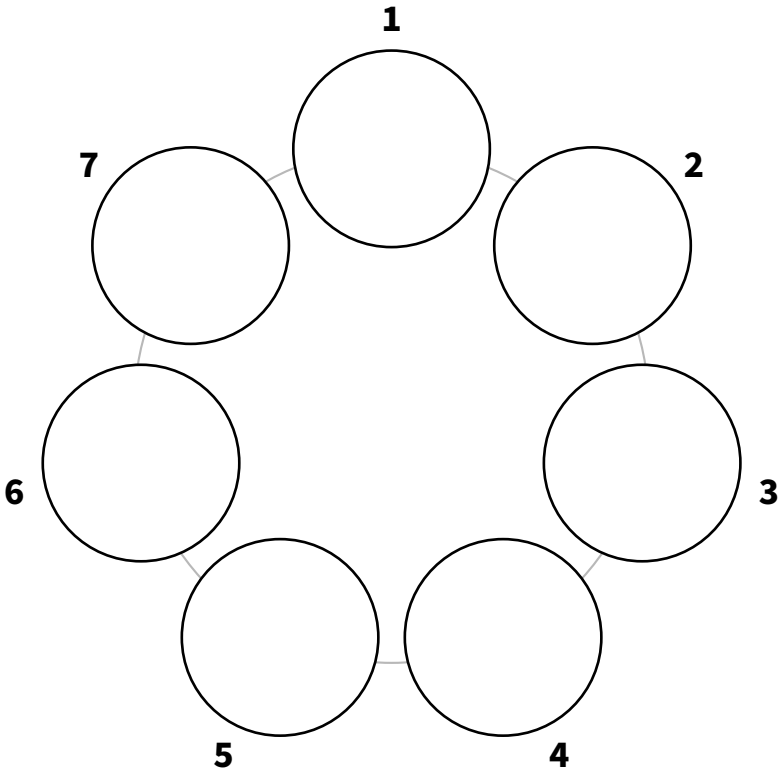

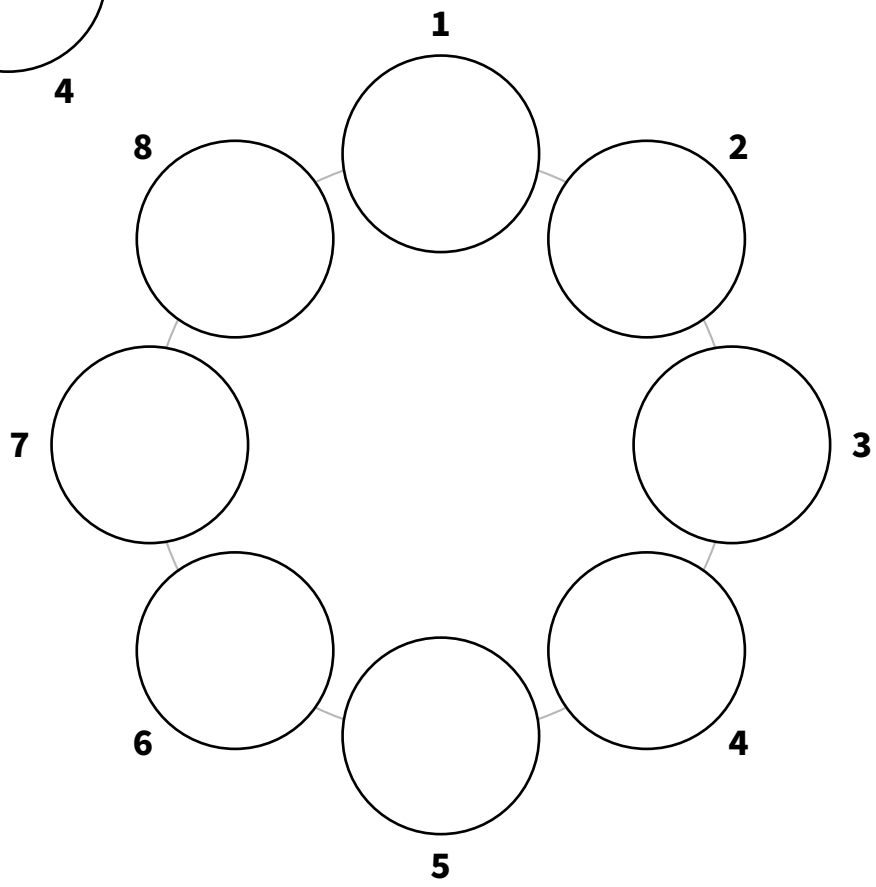

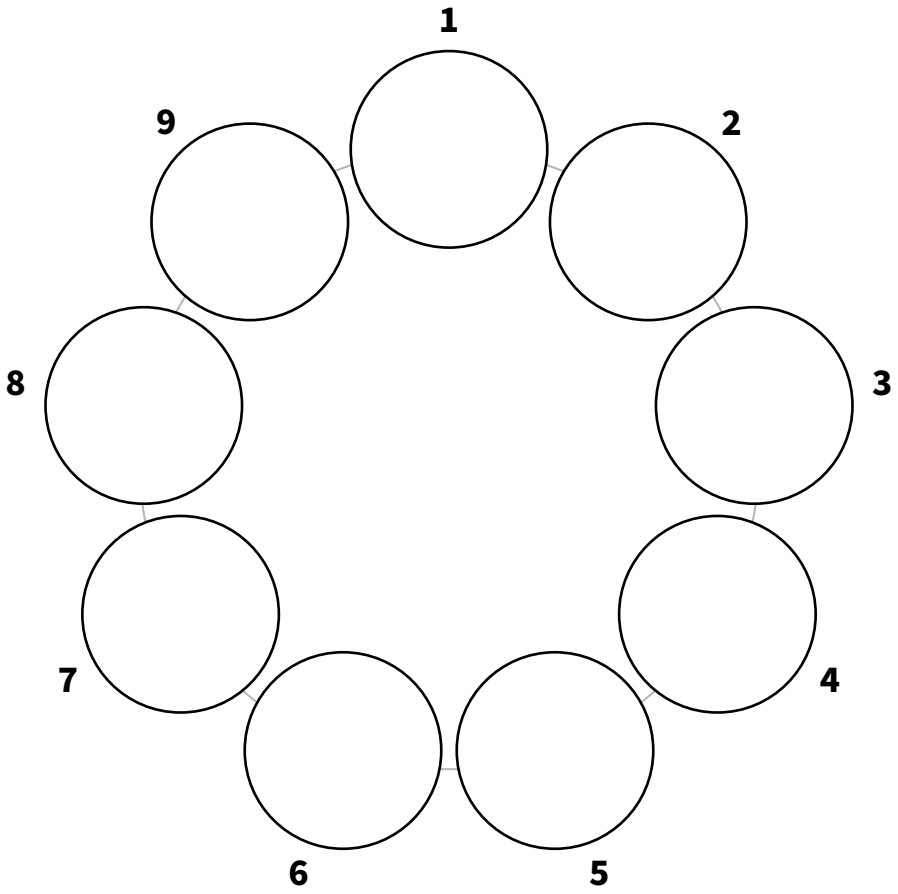

More circles for Problem 6.

Problem 7: Go round saying stand, stand, sit. Where should you stand in this circle of 9 to be the last one standing?

Problem 8: When you go round saying stand, stand, sit, can number 3 ever be the last one standing? Explain.
