The small numbers match the six tickets. A secret ticket picks the face that shows, with its number covered. You see only the color. Every ticket has the same chance.

Problem 1: Find every pair of tickets that show the same color but hide different colors.

Problem 2: You are told only that red is showing. Which hidden color is the better guess, and why?

red underneath

blue underneath

Problem 3: You are told only that blue is showing. Does the better guess change?

red underneath

blue underneath
